Perley, 2011-11-01 Published through the Recovering Languages and Literacies of the Americas initiative supported by the Andrew W Mellon Foundation Today indigenous communities throughout North America are grappling with the dual issues of language loss and revitalization While many communities are making efforts to bring their traditional languages back through educational programs for some communities these efforts are not enough or have come too late to

stem the tide of language death which occurs when there are no remaining fluent speakers and the language is no longer used in regular communication The Maliseet language as spoken in the Tobique First Nation of New Brunswick Canada is one such endangered language that will either be revitalized and survive or will die off Defying Maliseet Language Death is an ethnographic study by Bernard C Perley a member of this First Nation that examines the role of the Maliseet language and its survival in Maliseet identity processes Perley examines what is being done to keep the Maliseet language alive who is actively involved in these processes and how these two factors combine to promote Maliseet language survival He also explores questions of identity asking the important question If Maliseet is no longer spoken are we still Maliseet This timely volume joins the dual issues of language survival and indigenous identity to present a unique perspective on the place of language within culture

Linguistic Counter-Standardization Neriko Musha Doerr, 2024-10-21 Language standardization is problematic because it imposes the dominant group's linguistic variety as the only correct one and promotes the idea of unit thinking i.e. seeing the world as consisting of bounded internally homogeneous units This volume examines intentional practices to subvert such processes of language standardization what we call counter standardization practices in language education and other contexts By suggesting alternative classroom pedagogies language reclamation processes for indigenous populations and discourses about mispronunciation this volume explores more liberatory approaches the post unit thinking of language

Native American Language Ideologies Paul V. Kroskrity, Margaret C. Field, 2009-04-15 Beliefs and feelings about language vary dramatically within and across Native American cultural groups and are an acknowledged part of the processes of language shift and language death This volume samples the language ideologies of a wide range of Native American communities from the Canadian Yukon to Guatemala to show their role in sociocultural transformation These studies take up such active issues as insiderness in Cherokee language ideologies contradictions of space time for the Northern Arapaho language socialization and Paiute identity and orthography choices and language renewal among the Kiowa The authors including members of indigenous speech communities who participate in language renewal efforts discuss not only Native Americans' conscious language ideologies but also the often revealing relationship between these beliefs and other more implicit realizations of language use as embedded in community practice The chapters discuss the impact of contemporary language issues related to grammar language use the relation between language and social identity and emergent language ideologies themselves in Native American speech communities And although they portray obvious variation in attitudes toward language across communities they also reveal commonalities notably the emergent ideological process of iconization between a language and various national ethnic and tribal identities As fewer Native Americans continue to speak their own language this timely volume provides valuable grounded studies of language ideologies in action those indigenous to Native communities as well as those imposed by outside institutions or language researchers It considers the emergent interaction of indigenous and imported ideologies and the resulting effect on language beliefs practices and

struggles in today's Indian Country as it demonstrates the practical implications of recognizing a multiplicity of indigenous language ideologies and their impact on heritage language maintenance and renewal **Attitudes to Endangered Languages** Julia Sallabank, 2013-12-19 Language attitudes and ideologies are of key importance in assessing the chances of success of revitalisation efforts for endangered languages. However few book length studies relate attitudes to language policies or address the changing attitudes of non speakers and the motivations of members of language movements. Through a combination of ethnographic research and quantitative surveys this book presents an in depth study of revitalisation efforts for indigenous languages in three small islands round the British Isles. The author identifies and confronts key issues commonly faced by practitioners and researchers working in small language communities with little institutional support. This book explores the complex relationship of ideologies identity and language related beliefs and practices and examines the implications of these factors for language revitalisation measures. Essential reading for researchers interested in language endangerment and revitalisation sociolinguistics linguistic anthropology and language policy and planning as well as language planners and campaigners **The Vanishing Languages of the Pacific Rim** Osahito Miyaoka, Osamu Sakiyama, Michael E.
