## **Java With Borland C :**

*Java with Borland C++* Chris H. Pappas, William H. Murray, 1996 Designed to teach users of Borland C to programme in Java this book explains language techniques and how to use the components in the Borland C 5 0 package to create efficient Java programmes Readers learn to integrate Java applets with HTML documents to use audio video and animations and to adapt the more advanced Java features     An Introduction to Object-Oriented Programming in C++ Graham M.

Seed, 2012-12-06 Why Another Book on c and why Programming and Graphics Anyone who has browsed through the Computing section of a bookshop assuming it has one will not need much convincing that there are a lot of C books out there So why add yet another to the shelf This book attempts to introduce you to the C language via computer graphics because the object oriented programming features of C naturally lend themselves to graphics Thus this book is based around a central theme computer graphics and the development of real object oriented tools for graphical modelling This approach is adopted as opposed to learning by small unrelated often hypothetical examples because I didn t want to introduce C as a collection of language features While introducing the syntax and features of C it is just as important to demonstrate simultaneously the reason for such features and when to apply them in other words language and design are given equal priority Also a key objective in writing this book is to present you with a comprehensive introductory text on programming in the C language

**Developing Intranet Applications with Java** Jerry Ablan, 1996 This high level guide focuses on developing intranet oriented applications with Java Java s platform independence makes it ideally suited as a language for intranet applications
