Anatomy and the Organization of Knowledge, 1500-1850 Brian Muñoz, Matthew Landers, 2015-10-06 Across early modern Europe the growing scientific practice of dissection prompted new and insightful ideas about the human body This collection of essays explores the impact of anatomical knowledge on wider issues of learning and culture

Mathematical Correspondences and Critical Editions Maria Teresa Borgato, Erwin Neuenschwander, Irène Passeron, 2019-03-22 Mathematical correspondence offers a rich heritage for the history of mathematics and science as well as cultural history and other areas It naturally covers a vast range of topics and not only of a scientific nature it includes letters between mathematicians but also between mathematicians and politicians publishers and men or women of culture Wallis Leibniz the Bernoullis D Alembert Condorcet Lagrange Gauss Hermite Betti Cremona Poincaré and van der Waerden are undoubtedly authors of great interest and their letters are valuable documents but the correspondence of less well known authors too can often make an equally important contribution to our understanding of developments in the history of science Mathematical correspondences also play an important role in the editions of collected works contributing to the reconstruction of scientific biographies as well as the genesis of scientific ideas and in the correct dating and interpretation of scientific writings This volume is based on the symposium Mathematical

Correspondences and Critical Editions held at the 6th International Conference of the ESHS in Lisbon Portugal in 2014 In the context of the more than fifteen major and minor editions of mathematical correspondences and collected works presented in detail the volume discusses issues such as History and prospects of past and ongoing edition projects Critical aspects of past editions The complementary role of printed and digital editions Integral and partial editions of correspondence Reproduction techniques for manuscripts images and formulae and the editorial challenges and opportunities presented by digital technology *General Catalogue of Printed Books* British Museum. Department of Printed Books, 1969 Stranded Encyclopedias, 1700-2000 Linn Holmberg, Maria Simonsen, 2021-02-17 In *Stranded Encyclopedias 1700 2000 Exploring Unfinished Unpublished Unsuccessful Encyclopedic Projects* fourteen scholars turn to the archives to challenge the way the history of modern encyclopedism has long been told Rather than emphasizing successful publications and famous compilers they explore encyclopedic enterprises that somehow failed With a combined attention to script print and digital cultures the volume highlights the many challenges facing those who have pursued complete knowledge in the past three hundred years By introducing the concepts of stranded and strandedness it also provides an analytical framework for approaching aspects often overlooked in histories of encyclopedias books and learning the unpublished the unfinished the incomplete the unsuccessfully disseminated and the no longer updated By examining these aspects in a new and original way this book will be of value to anyone interested in the history of encyclopedism and lexicography the history of knowledge language and ideas and the history of books writing translating and publishing Chapters 1 and 4 are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) **The Encyclopédie** John Lough, 1989 **From Kant to Hilbert Volume 2** William Bragg Ewald, 2005-04-21 Immanuel Kant's Critique of Pure Reason is widely taken to be the starting point of the modern period of mathematics while David Hilbert was the last great mainstream mathematician to pursue important nineteenth century ideas This two volume work provides an overview of this important era of mathematical research through a carefully chosen selection of articles They provide an insight into the foundations of each of the main branches of mathematics algebra geometry number theory analysis logic and set theory with narratives to show how they are linked Classic works by Bolzano Riemann Hamilton Dedekind and Poincaré are reproduced in reliable translations and many selections from writers such as Gauss Cantor Kronecker and Zermelo are here translated for the first time The collection is an invaluable source for anyone wishing to gain an understanding of the foundation of modern mathematics The Autocritique of Enlightenment Mark Hullung, 2017-09-29 Of all the critiques of the Enlightenment the most telling may be found in the life and writings of Jean Jacques Rousseau This searching long overlooked auto critique receives its first full treatment by Mark Hullung Here he restores Rousseau to his historical context the world of the philosophes and shows how he employed the arsenal of Voltaire Diderot and others to launch a powerful attack on their version of the Enlightenment With great intellectual skill and rhetorical force Rousseau

exposed the inconsistencies and shortcomings of the Enlightenment the psychology of Locke the genre of philosophical and conjectural history the latest applications of science to the study of society and politics and the growing interest in materialist modes of thought As the century moved on Hülling shows the most advanced philosophes found themselves drawn to conclusions that paralleled Rousseau's an agreement that went unacknowledged at the time The Enlightenment that emerges here is richer more nuanced and more self-critical than the one reflected in many interpretations By extracting Rousseau from personal entanglements that stymied debate in his time and that mislead critics to this day Hülling reveals the remarkable and remarkably unacknowledged force of Rousseau's accomplishment This edition includes a brilliant new introduction by the author

Theory and Practice in the Interdisciplinary Production and Reproduction of Scientific Knowledge Olga Pombo, Klaus Gärtner, Jorge Jesuino, 2023-01-10 This book addresses the urgent need for a large and systematic analysis of current interdisciplinary ID research and practice It demonstrates how ID is essentially a cognitive phenomenon something different from the frivolous and inconsequential attempt of trying to overcome the disciplinary competencies and exigencies By ID the authors show that it is a manifestation of the transversal rationality that underlies current scientific activity It is the very progress of specialized disciplines that requires interdisciplinary new research practices and new forms of articulation between domains something that has a strong impact on the traditional disciplinary structure of scientific and educational institutions Divided into two parts the book presents a conceptual framework as well as several case studies on ID practices The book aims at covering three main themes It contributes to the stabilization of ID meaning and characterizes the main ID theorizations which have been proposed until now It builds an innovative and broad understanding of the several ID determinations as an essentially cognitive phenomenon and of its institutional implications at the level of disciplinary structures and curricular organization Finally it distinguishes and maps the diversity of ID procedures and practices which are being used and tested by contemporary scientific and educational institutions This book is addressed to philosophers scientists and every one interested in science production and reproduction including science teaching

Blueprint Stephen Werner, 1993 The 2 569 engraved plates of the Encyclopédie are as central to its meaning as the articles or cross references themselves Plates change the discourse of encyclopedisme through a novel collaborative effort of written texts and pictures With vignettes of Paris as their backdrop they endorse an aesthetic of urban merveilleux Ultimately they rewrite the encyclopedia genre The Encyclopédie is far more than a traditional illustrated reference work it is a modern pictorial encyclopedia Its visionary or blueprint qualities are unique and were conceived by Diderot the chief sponsor and architect of the plates This work is richly illustrated with reproductions of the original plates An exhaustive bibliography adds to the functional nature of this study Un petit livre tres excitant Dix huitieme Siecle this study is a fruitful examination of the Encyclopédie as an indisputable coherent fusion of the textual and the pictorial It points the way to further investigation of what still remains a largely unexplored labyrinth of Enlightenment ideologies values and concerns

British Journal of Eighteenth Century Studies **From Kant to Hilbert Volume 2** William Bragg Ewald, William Ewald, 1999 This two volume work brings together a comprehensive selection of mathematical works from the period 1707 1930 During this time the foundations of modern mathematics were laid and From Kant to Hilbert provides an overview of the foundational work in each of the main branches of mathematics with narratives showing how they were linked Now available as a separate volume *Catalogue of Printed Books* British Museum, The Cambridge History of Eighteenth-century Philosophy Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted The Routledge History of the Domestic Sphere in Europe Joachim Eibach, Margareth Lanzinger, 2020-12-29 This book addresses the multifaceted history of the domestic sphere in Europe from the Age of Reformation to the emergence of modern society By focusing on daily practice interaction and social relations it shows continuities and social change in European history from an interior perspective The Routledge History of the Domestic Sphere in Europe contains a variety of approaches from different regions that each pose a challenge to commonplace views such as the emergence of confessional cultures of private life and of separate spheres of men and women By analyzing a plethora of manifold sources including diaries court records paintings and domestic advice literature this volume provides an overview of the domestic sphere as a location of work and consumption conflict and cooperation emotions and intimacy and devotion and education The book sheds light on changing relations between spouses parents and children masters and servants or apprentices and humans and animals or plants thereby exceeding the notion of the modern nuclear family This volume will be of great use to upper level graduates postgraduates and experienced scholars interested in the history of family household social space gender emotions material culture work and private life in early modern and nineteenth century Europe **The Cambridge Companion to the French Enlightenment** Daniel Brewer, 2014-10-30 Containing essays by leading scholars representing a wide range of disciplines this Companion offers new perspectives on the French Enlightenment Clearly organized and easy to use the volume provides a comprehensive overview of a period that marks the beginning of modern intellectual culture and political life Education in Human Creative Existential Planning Anna-Teresa Tymieniecka, 2007-11-14 Education is the transmission of knowledge and skill from one generation to another and is vitally significant for the growth and unfolding of the living individual It manifests the quintessential ability of the logos to differentiate life in self individualization from within and in its spread through inter generative networks Without reaching the evolutive phase of the human creative condition the human being establishes a unique creative platform on which to conduct its co existence On this platform the progress of life is being transformed from a natural ontopoietic accomplishment into an autonomous achievement of the creative planning of the human mind Specifically human education focuses upon creative planning moving like a pendulum between nature and freedom The

present collection of papers focuses on the underpinnings of the creative workings of the human strategies of reason

L'Écriture est la peinture de la voix Gillian Pink, Thomas Wynn, 2024-11-15 *L'écriture est la peinture de la voix* honours and celebrates the inestimable contributions that Professor Nicholas Cronk has made to our understanding of the Enlightenment As director of the University of Oxford's Voltaire Foundation he has played a decisive role in eighteenth century studies In particular he has shaped our knowledge of Voltaire as a writer celebrity and era defining figure whose influence has continued to be felt through the centuries Comprising essays by a host of internationally eminent scholars this volume is a fitting tribute to the esteem and affection in which Nicholas Cronk is held as a colleague teacher and mentor These sixteen essays reflect his varied research interests exploring questions central to the eighteenth century such as the writing process justice revolution as well as the legacy of the Enlightenment and focussing on the central figure in Nicholas Cronk's research Voltaire In sections devoted to Voltaire's writing practices to his involvement in political literary and religious polemics and finally to his legacy the essays build on Nicholas Cronk's scholarship and editorial achievements opening up a new chapter in research on Voltaire This volume is complemented by an online collection of essays which speak to other topics central to Nicholas Cronk's interests such as authorial identities correspondence and aesthetics Visit the MLO site for the other half of this festschrift project <https://modernlanguagesopen.org/collections/lecriture-nicholas-cronk>

Catalogue de la Bibliothèque de Neuchâtel Bibliothèque de Neuchâtel (NEUCHÂTEL), 1861 **The New Cambridge Bibliography of English Literature: Volume 2, 1660-1800** George Watson, Ian R. Willison, 1971-07-02 More than fifty specialists have contributed to this new edition of volume 2 of *The Cambridge Bibliography of English Literature* The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries The Color of Equality Devin J. Vartija, 2021-08-06 The Enlightenment is often either praised as the wellspring of modern egalitarianism or condemned as the cradle of scientific racism How should we make sense of this paradox *The Color of Equality* is the first book to investigate both the inclusive language of common humanity and the hierarchical language of race in Enlightenment thought seeking to understand how eighteenth century thinkers themselves made sense of these tensions Using three major Enlightenment encyclopedias from England France and Switzerland the book provides a rich contextualization of the conflicting ideas of equality and race in eighteenth century thought Enlightenment thinkers used physical features to categorize humanity into novel racial groups in a discourse that was imbued with Eurocentric aesthetic and moral judgments Simultaneously however these very same thinkers politicized equality by putting it to new uses such as a vitriolic denunciation of slavery and inhumane treatment that was grounded in

the nascent philosophy of human rights Vartija contends that the tension between Enlightenment ideas of race and equality can best be explained by these thinkers attempt to provide a naturalistic account of humanity including both our physical and moral attributes Enlightenment racial classification fits into the novel inclusion of humanity in histories of nature while the search for the origins of morality in social experience alone lent equality a normative authority it had not previously possessed Eschewing straightforward approbation or blame of the Enlightenment The Color of Equality demonstrates that our present day thinking about human physical and cultural diversity continues to be deeply informed by an eighteenth century European intellectual revolution with global ramifications
