Failed Evidence David A Harris, 2012-09-03

With the popularity of crime dramas like CSI focusing on forensic science and increasing numbers of police and prosecutors making wide spread use of DNA high tech science seems to have become the handmaiden of law enforcement But this is a myth asserts law professor and nationally known expert on police profiling David A Harris In fact most of law enforcement does not embrace science it rejects it instead resisting it vigorously The question at the heart of this book is why Eyewitness identifications procedures using simultaneous lineups showing the witness six persons together as police have traditionally done produces a significant number of incorrect identifications Interrogations that include threats of harsh penalties and untruths about the existence of evidence proving the suspect s guilt significantly increase the prospect of an innocent person confessing falsely Fingerprint matching does not use probability calculations based on collected and standardized data to generate conclusions but rather human interpretation and judgment Examiners generally claim a zero rate of error an untenable claim in the face of publicly known errors by the best examiners in the U S Failed Evidence explores the real reasons that police and prosecutors resist scientific change and it lays out a concrete plan to bring law enforcement into the scientific present Written in a crisp and engaging style free of legal and scientific jargon Failed Evidence will explain to police and prosecutors political leaders and policy makers as well as other experts and anyone else who cares about how law enforcement does its job where we should go from here Because only if we understand why law enforcement resists science will we be able to break through this resistance and convince police and prosecutors to rely on the best that science has to offer Justice demands no less Visit the author s blog here

Forensic Science John C. Brenner, 2003-12-29 This volume introduces the laboratory terms that are crucial to the interpretation and understanding of laboratory report findings The definitions and accompanying illustrations come from various disciplines including toxicology drug chemistry criminalistics bioscience DNA firearms ballistics forensic pathology and law The illustrations communicate the use of laboratory instruments and investigative and laboratory methods of analysis These detailed definitions and illustrations are valuable references to nonscientific professionals including police investigators interpreting lab reports court reporters and prosecutors and defense attorneys preparing for trial

Forensic Gait Analysis Haydn D. Kelly, 2020-05-11 Forensic Gait Analysis examines the inter section of podiatric medicine with forensic investigation that

which links or dissociates a suspect to a crime through analysis of their gait that is their movement how an individual walks runs and bends This book provides a concise explanation of how an individual s gait and biomechanics are forensically analysed and compared using video imagery in the process of human identification and investigations Along with the presentation and delivery of material with case law references illustrating the use of expert evidence Gait analysis is a long standing component of the diagnostic and therapeutic tool set of medical disciplines although the knowledge goes back much further The area has also captured the interest of technology engineers and others as the development and use of forensic gait analysis as an investigative and evidential device continues to widen Features Presents succinct knowledge on forensic gait analysis 100 illustrations with photographs and diagrams over 850 references Considers the technical and scientific basis of the field including the history of gait musculoskeletal neurology emotions and gait forensic statistics photogrammetry and recognises the trajectory of development into IT and software solutions Coverage on CCTV imagery and other video footage for use in the process of identification and investigations Details are provided on report writing and giving expert evidence in the legal systems Contributors across all subject areas This definitive fully referenced text on Forensic Gait Analysis is a welcome publication for healthcare professionals lawyers counsel investigators forensic practitioners and students wishing to know more on the subject and this growing domain Crime Scene Management Raul Sutton, Keith Trueman, Christopher Moran, 2016-09-23 Second edition of an established text on common procedures for the identification and processing of evidence at scenes of crime Includes chapters on quality assurance and credibility of practices and processes issues surrounding major and complex crime Forensic handling of mass fatalities Crime scene reconstruction and impact on evidence recovery processes **Fire Investigator** International Association of Fire Chiefs, International Association of Arson Investigators, National Fire Protection Association, 2011-02-14 At head of title International Association of Fire Chiefs International Association of Arson Investigators National Fire Protection Association The Publishers' Trade List Annual , 1969 **Rosen's Emergency Medicine - Concepts and Clinical Practice, 2-Volume Set, Expert Consult Premium Edition - Enhanced Online Features and Print**, 7 James Adams, 2010-01-01 This reference places the latest information at users fingertips and a more streamlined format makes it easy to find the exact information quickly and conveniently Includes access to a companion Web site for additional resources *The Independent* , 1882 Review of Footwear Impression Evidence, Second Edition S. McKasson, 2000 The first edition of this text published by Elsevier in 1990 is probably in every footwear examiner s library so it is easy to say that the second edition belongs there too Small improvements were made throughout although the first edition will no doubt remain a classic reference a benchmark in its time Alas Tempus Fugit and the new edition is necessary to provide many needed updates to the original text particularly in the chapter on enhancement of impressions The new edition s format is a little larger than the first edition allowing some of the photographs to be enlarged although the contrast is higher in the original so the improvement is

debatable Three new chapters added at the end of the book represent the major change to the work The chapter devoted to the evidence in the O J Simpson case is a highlight of course If you have the first edition and like it by all means get the second edition *Footwear Impression Evidence* William J. Bodziak,1995 The Recovery of Latent Shoe Impressions Using the Pathfinder Dustmark Lifting Device and Latent Mark Enhancement Powders Charles Agius,2008 The presence of latent footwear impressions at crime scenes is underestimated by New South Wales Police Forensic Investigators They currently have access to Labino Track Pack Pro Lights Pathfinder Electrostatic Dustmark Lifting Devices and fingerprint powder enhancement kits which can all be used to locate latent footwear impression evidence This evidence can be located on a wide variety of surfaces due to the numerous different flooring surfaces used in modern construction The Labino0 Track Pack Pro Lights Pathfinder Electrostatic Dustmark Lifting Devices and Fingerprint Powder Enhancement Kits were used to enhance latent footwear impressions that had been deposited on a variety of substrates including sealed polished timber floor boards textured laminate flooring smooth unsealed timber smooth stainless steel and short pile carpet The use of the devices was sequenced in order of least destructive to most destructive The resulting impressions were compared to a known impression which had pre defined class and individual characteristics **Analysis of Footwear Impression Evidence** Sargur N. Srihari,National Institute of Justice (U.S.),2010 Impressions of footwear are commonly found in crime scenes The quality and wide variability of these impressions and the large number of footwear outsole designs makes their manual analysis time consuming and difficult The goal of this research was to develop new computational methods that will eventually assist the forensic footwear examiner in the U S Two scenarios encountered by the forensic examiner were addressed i in the investigative phase to determine the source of an impression given a known set of outsole prints which is useful in homicides and assaults where there are no known prints to match and ii in the prosecutorial phase to determine whether a particular impression evidence is from a known suspect s shoe with a quantification of similarity and uncertainty The research commenced with developing and acquiring representative footwear print images so that the algorithms developed would relate to the real problem encountered Algorithms for several sub problems were studied including image processing to improve the quality of the image for further automatic processing extraction of features useful for discrimination a measure of similarity between impressions and a content based image retrieval system to reduce possible matches with knowns The principal method pursued was one where the print is characterized as being composed of a pattern of geometric shapes principally ellipses with ellipses being able to represent straight line segments and circles as well A distance measure based on comparing attribute relational graphs was developed The retrieval system compares evidence features with pre computed features of database entries and since comparison is time consuming the database entries are clustered Retrieval performance is better than that of other methods described in the literature very few of which deal with real crime scene prints Future research tasks are indicated including integration of the developed methods into a usable tool

and a probabilistic measure of uncertainty in the verification task
