Climate Change Impacts and Adaptation Strategies for Coastal Communities Walter Leal Filho,2017-11-23 This book presents a comprehensive overview of research and projects regarding climate change adaptation in coastal areas providing government and nongovernment bodies with a sound basis to promote climate change adaptation efforts According to the 5th Assessment Report by the Intergovernmental Panel on Climate Change IPCC coastal zones are highly vulnerable to climate change and climate driven impacts may be further exacerbated by other human induced pressures Apart from sea level rise which poses a threat to both human well being and property extreme events such as cyclones and storm surges lead not only to significant

damage to property and infrastructure but also to salt water intrusion groundwater salinisation and intensified soil erosion among many other problems There are also numerous negative impacts on the natural environment and biodiversity including damage to important wetlands and habitats that safeguard the overall ecological balance and consequently the provision of ecosystem services and goods on which the livelihoods of millions of people depend As such there is a need for a better understanding of how climate change affects coastal areas and communities and for the identification of processes methods and tools that can help the countries and communities in coastal areas to adapt and become more resilient It is against this background that this book has been produced It includes papers written by scholars social movements practitioners and members of governmental agencies pursuing research and or executing climate change projects in coastal areas and working with coastal communities Focusing on managing climate change in coastal regions it showcases valuable lessons learned from research and field projects and presents best practices to foster climate change adaptation in coastal areas and communities which can be implemented elsewhere

the importance of understanding how communities can respond to climate change's many threats. This unusually accessible volume provides that understanding for South Asia while being relevant to the rest of the world. Its emphasis on research by scholars from the region makes it a wonderful tribute to Prof Karl G. Ran M. ler who contributed so much to the growth of environmental economics research capacity in South Asia. Jeffrey R. Vincent, Ph.D., Clarence F. Korstian, Professor of Forest Economics Management, Nicholas School of the Environment, Duke University, USA. *Routledge Handbook of Climate Change Impacts on Indigenous Peoples and Local Communities*, Victoria Reyes-García, 2023-12-26. This Handbook examines the diverse ways in which climate change impacts Indigenous Peoples and local communities and considers their response to these changes. While there is well-established evidence that the climate of the Earth is changing, the scarcity of instrumental data oftentimes challenges scientists' ability to detect such impacts in remote and marginalized areas of the world or in areas with scarce data. Bridging this gap, this Handbook draws on field research among Indigenous Peoples and local communities distributed across different climatic zones and relying on different livelihood activities to analyse their reports of and responses to climate change impacts. It includes contributions from a range of authors from different nationalities, disciplinary backgrounds, and positionalities, thus reflecting the diversity of approaches in the field. The Handbook is organised in two parts. Part I examines the diverse ways in which climate change alone or in interaction with other drivers of environmental change affects Indigenous Peoples and local communities. Part II examines how Indigenous Peoples and local communities are locally adapting their responses to these impacts. Overall, this book highlights Indigenous and local knowledge systems as an untapped resource which will be vital in deepening our understanding of the effects of climate change. The Routledge Handbook of Climate Change Impacts on Indigenous Peoples and Local Communities will be an essential reference text for students and scholars of climate change, anthropology, environmental studies, ethnobiology, and Indigenous studies.

Climate Change and Food Security Elizabeth Thomas Hope, 2016-12-08. Global climatic change has resulted in new and unpredictable patterns of precipitation and temperature, the increased frequency of extreme weather events, and rising sea levels. These changes impact all four aspects of food security: availability, accessibility, stability of supply, and appropriate nourishment, as well as the entire food system: food production, marketing, processing, distribution, and prices. *Climate Change and Food Security* focuses on the challenge to food security posed by a changing climate. The book brings together many of the critical global concerns of climate change and food security through local cases based on empirical studies undertaken in Sub-Saharan Africa and the Caribbean. Focusing on risk reduction and the complex nature of vulnerability to climate change, the book includes chapters on the responsiveness of farmers based on traditional knowledge, as well as the critical phenomenon of food insecurity in the urban setting. Other chapters are devoted to efforts made to strengthen resilience through long-term development with interventions at the regional and national levels of scale. It also examines cross-cutting themes that underlie the strategies employed to achieve food security, including equity, gender, livelihoods, and governance.

This edited volume will be of great interest to students and scholars of climate change food security environmental management and sustainable development

Justice and food security in a changing climate Hanna Schübel,Ivo Wallimann-Helmer,2023-08-14 The UN's Sustainable Development Goals saw the global community agree to end hunger and malnutrition in all its forms by 2030 However the number of chronically undernourished people is increasing continuously Ongoing climate change and the action needed to adapt to it are very likely to aggravate this situation by limiting agricultural land and water resources and changing environmental conditions for food production Climate change and the actions it requires raise questions of justice especially regarding food security These key concerns of ethics and justice for food security due to climate change challenges are the focus of this book which brings together work by scholars from a wide range of disciplines and a multitude of perspectives These experts discuss the challenges to food security posed by mitigation geoengineering and adaptation measures that tackle the impacts of climate change Others address the consequences of a changing climate for agriculture and food production and how the Covid 19 pandemic has affected food security and animal welfare

Understanding Human Security and Climate Change Ross M. Pink,Luthfi Dhofier,2024-09-06 In this timely work Ross Michael Pink and Luthfi Dhofier detail specific case studies across eight countries to provide a crucial overview of the impacts of climate change They highlight the importance of the human security paradigm prioritising the rights of citizens rather than those of nations to accurately assess this existential issue

[African Handbook of Climate Change Adaptation](#) Nicholas Oguge,Desalegn Ayal,Lydia Adeleke,Izael da Silva,2021-05-20 This open access book discusses current thinking and presents the main issues and challenges associated with climate change in Africa It introduces evidences from studies and projects which show how climate change adaptation is being and may continue to be successfully implemented in African countries Thanks to its scope and wide range of themes surrounding climate change the ambition is that this book will be a lead publication on the topic which may be regularly updated and hence capture further works Climate change is a major global challenge However some geographical regions are more severely affected than others One of these regions is the African continent Due to a combination of unfavourable socio economic and meteorological conditions African countries are particularly vulnerable to climate change and its impacts The recently released IPCC special report Global Warming of 1.5°C outlines the fact that keeping global warming by the level of 1.5°C is possible but also suggested that an increase by 2.0°C could lead to crises with crops agriculture fed by rain could drop by 50% in some African countries by 2020 and livestock production could damage water supplies and pose an additional threat to coastal areas The 5th Assessment Report produced by IPCC predicts that wheat may disappear from Africa by 2080 and that maize a staple will fall significantly in southern Africa Also arid and semi arid lands are likely to increase by up to 8% with severe ramifications for livelihoods poverty eradication and meeting the SDGs Pursuing appropriate adaptation strategies is thus vital in order to address the current and future challenges posed by a changing climate It is against this background that the African Handbook of Climate

Change Adaptation is being published It contains papers prepared by scholars representatives from social movements practitioners and members of governmental agencies undertaking research and or executing climate change projects in Africa and working with communities across the African continent Encompassing over 100 contributions from across Africa it is the most comprehensive publication on climate change adaptation in Africa ever produced *Gender-Transformative Approaches for Climate Change Adaptation* Anindita Sarkar,Nairwita Bandyopadhyay,2025-07-14 This book offers an array of narratives and recommendations for gender transformative climate change adaptation strategies based on research and evidence from the Global South We look at gender transformative adaptation GTA as a process that aims to address gender and power imbalance and strive for a change at the institutional level to enable empowering consequences through the meaningful and equal participation of women and men in leadership policy and decision making processes It makes four main contributions First it collates scholarship on the politics of adaptation and how policies affect men and women differently in communities and different geographical locations Second it captures pathways for parallel goals of climate action SDG 13 and achieving gender equality and empowerment SDG 5 through transformative ideas Third it curates new methodologies and adds knowledge to the gender transformative research GTR and assesses its potential for challenging and addressing gender power equations Fourth it voices the parallel ideas and evidence placing women as both victims of climate change and as the new change makers in the path of climate adaptation **Climate Change 2014 - Impacts, Adaptation and Vulnerability: Regional Aspects** Christopher B. Field,Vicente R. Barros,2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy Climate Change and Mental Health Equity Rhonda J. Moore,2024-07-18 Climate change is a driver of poverty poor mental health inequity and increased intersectional vulnerability with significant differential global impacts on individual and community health and well being For example people living in low resource settings in high income countries HICs and in low and middle income countries LMICs are at greater risk often experiencing fragile socioeconomic political and health infrastructures and conflict affected settings FCAS that place them at greater risk and vulnerabilities to climate change related mental health impacts The broad goal of this book is to place a social justice and inclusive lens on climate change and mental health equity focusing on these three key elements people place and community The book includes perspectives from the global North the global South and Indigenous perspectives to help provide greater insight into how we can better understand climate change and mental health equity across peoples place and community This book s three pronged approach will focus on certain trends in this emerging and growing field also bridging some of the more extensive gaps and is a tool for better understanding how mental health disparities might be addressed at this time The Impact of Climate Change Mitigation on Indigenous and Forest

Communities Maureen F. Tehan, Lee C. Godden, Margaret A. Young, Kirsty A. Gover, 2017-10-26 Legal frameworks to reduce emissions from deforestation and forest degradation REDD are analysed to focus on protections and benefits for indigenous peoples and forest communities **Climate Change 2007 - Impacts, Adaptation and Vulnerability** Intergovernmental Panel on Climate Change. Working Group II., 2007 The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provide the most comprehensive and balanced assessment of climate change available This IPCC Working Group II volume provides a completely up to date scientific assessment of the impacts of climate change the vulnerability of natural and human environments and the potential for response through adaptation Written by the world's leading experts the IPCC volumes will again prove to be invaluable for researchers students and policymakers and will form the standard reference works for policy decisions for government and industry worldwide

Climate Change and Food Security Sukanta Mondal, Pankaj Singh, Ram Lakhan Singh, 2024-11-21 The effects of climate change on food production and security are many and varied and represent one of the biggest challenges facing humanity today As the human population increases there is increasing pressure on land availability and water resources In many staple crops warming temperatures have caused decreases in overall yields but at the same time the demand for cheaper and more sustainable food has increased This edited volume examines the effects of climate change on all aspects of food production and how this is affecting food security in many parts of the world The book presents a series of chapters which describe new technologies aimed at mitigating these effects via for example genetic modification microbial science and the introduction of new crops
