Engaging Inquiry:

Embodied Inquiry Jennifer Leigh, Nicole Brown, 2021-05-20 Embodied inquiry is the process of using embodied approaches in order to study explore or investigate a topic But what does it actually mean to be embodied This book explores why and how we use our bodies in order to research what an embodied approach brings to a research project and the kinds of considerations that need to be taken into account to research in this way We all have bodies feelings emotions and experiences that affect the questions we are interested in the ways in which we choose to approach finding out the answers to those questions and the patterns we see in the data we gather as a result Embodied Inquiry foregrounds these questions of positionality and reflexivity in research It considers how a project or study may be designed to take these into account and why multimodal and creative approaches to research may be used to capture embodied experiences The book offers insights into how to analyse the types of data emerging from embodied inquiries and the ethical considerations that are important to consider Accounting for the interdisciplinary nature of the field this book has been written to be a concise primer into Embodied Inquiry for research students scholars and practitioners alike

Creating Engaging Discussions Jennifer H. Herman, Linda B. Nilson, 2023-07-03 If you have ever been apprehensive about initiating classroom discussion fearing silences the domination of a couple of speakers superficial contributions or off topic remarks this book provides strategies for creating a positive learning experience Jennifer H Herman and Linda B Nilson demonstrate how to create the conditions to facilitate deep and meaningful learning as well as to assess the effectiveness of discussions They identify analyze and solve common problems in both classroom and online discussions and in both small and large classes They take a direct practice oriented approach that in acknowledging common challenges provides principles guidance on design examples of activities and techniques and eight detailed case studies These cases demonstrate successful approaches that faculty across disciplines and from a variety of institutions have adopted in their face to face blended or online courses at the undergraduate or graduate level The case authors begin by describing the original pedagogical challenge they faced and explain how they addressed it and assessed the results of their innovation They also offer practical recommendations to readers who may want to try their strategies Intended for faculty this book will be equally valuable for educational developers who can use this resource in their programs and private consultations At the graduate level this book can serve as a text or workshop resource in college teaching courses and teaching assistant development programs The final chapter provides a set of resources and activities including discussion questions on the case studies writing prompts and jigsaw formats that are equally appropriate for individual study or for use in workshop environments You ll never again have to suffer such a profound silence that as described by a contributor to the book she could hear the crickets chirping outside

Teaching the Mindful Self-Compassion Program Christopher Germer, Christopher K. Germer, Kristin Neff, 2019-08-14
This is the authoritative guide to conducting the Mindful Self-Compassion (MSC) program which provides powerful tools for coping with life challenges and enhancing emotional well-being. MSC codevelopers Christopher Germer and Kristin Neff review relevant theory and research and describe the program's unique pedagogy. Readers are taken step by step through facilitating each of the eight sessions and the accompanying full-day retreat. Detailed vignettes illustrate not only how to teach the course's didactic and experiential content but also how to engage with participants, manage group processes and overcome common obstacles. The final section of the book describes how to integrate self-compassion into psychotherapy. Purchasers get access to a companion website with downloadable audio recordings of the guided meditations. Note: This book is not intended to replace formal training for teaching the MSC program. See also two related resources for MSC participants and general readers: *The Mindful Self-Compassion Workbook* by Kristin Neff and Christopher Germer and *The Mindful Path to Self-Compassion* by Christopher Germer.

(Re)Designing Programs: Jennifer Jacobs, Rebecca West Burns, 2021-04-01
Given the increasing diversity of the United States and students entering schools, the value of teacher learning in clinical contexts and the need to elevate the profession, national organizations have been calling for a re-envisioning of teacher preparation that turns teacher education upside down. This change will require PK-12 schools and universities to partner in robust ways to create strong professional learning experiences for aspiring teachers. University faculty in particular will not only need to work in schools but they will need to work with schools in the preparation of future teachers. This collaboration should promote greater equity and justice for our nation's students. The purpose of this book is to support individuals in designing clinically based teacher preparation programs that place equity at the core. Drawing from the literature as well as our experiences in designing and coordinating award-winning teacher education programs, we offer a vision for equity-centered clinically based preparation that promotes powerful teacher professional learning and develops high-quality equity-centered teachers for schools. The chapter topics include policy guidelines, partnerships, intentional clinical experiences, coherence, curriculum and coursework, university-based teacher educators, school-based teacher educators, teacher candidate supervision and evaluation, the role of research and instructional leadership in teacher preparation. While the concepts we share are research-based and grounded in the empirical literature, our primary intention is for this book to be of practical use. We hope that by the time you finish reading, you will feel inspired and equipped to make change within your own program, your institution and your local context. We begin each chapter with a *Before You Read* section that includes introductory

activities or self assessment questions to prompt reflection about the current state of your teacher preparation program We also weave examples a Spotlight from Practice in the form of vignettes designed to spark your thinking for program improvement Finally we conclude each chapter with a section called Exercises for Action which are questions or activities to help you re imagine and move toward action in the re design of your teacher preparation program We hope that you will use the exercises by yourself but perhaps more importantly with others to stimulate conversations about how you can build upon what you are already doing well to make your program even better

Praise for Re Designing Programs A Vision for Equity Centered Clinically Based Teacher Preparation Jennifer Jacobs and Rebecca West Burns book *Re Designing Programs A Vision for Equity Centered Clinically Based Teacher Preparation* is a must read for all teacher educators especially those involved in the creation and or direction of clinically based teacher education programs Their text provides a roadmap for higher education and school based teacher educators to collaboratively design a program that prepares teachers to meet the needs of future students They not only redefine the terms and language we use within clinical practice programs but also encourage us to reflect upon how teachers should be prepared in an equity centered clinically based teacher education program Their text deserves to be on the book shelves of all teacher educators D John McIntyre

candidate in the future Certifiable Teaching Learning and National Board Certification is a must read book Dr Lustick NBCT 1998 2008 explores all aspects of the certification process in an accessible and meaningful style Lustick uses his own considerable experiences as a science teacher National Board candidate National Board assessor and educational researcher to provide evidence of NBPTS as an opportunity for professional growth What are teachers learning from National Board certification Dr Lustick interviewed more than 140 teachers from 42 states to find an answer In a report to congress the National Research Council described Dr Lustick s work as one of only two studies that objectively evaluated the impact of certification on teachers practices Whether a candidate was ultimately identified as accomplished or not David Lustick s research indicates that certification offers all candidates a chance to improve their practice This book provides educational stakeholders an important resource for understanding NBPTS as a means to improve teacher quality in an environment of high stakes testing

Transforming Schools Allison Zmuda, Robert Kuklis, 2004-04-15 How can a school become a place where all members of the staff are learning growing and working to increase student achievement The answer lies in systems thinking and a focus on continuous improvement two concepts that can transform staff development from something that people merely tolerate to something that they actively pursue to create lasting improvements in teaching and learning Each chapter of Transforming Schools Creating a Culture of Continuous Improvement is grounded in a set of operating principles that provide practical guidance to school leaders The story of a fictional school brings the ideas to life as the characters a school principal teachers and district level administrators experience the shifts in thinking that are necessary to transform a school into a competent system Through their story the reader gains a clear understanding of the six steps of continuous improvement Identify core beliefs Create a shared vision Use data to determine gaps between the current reality and the shared vision Identify the innovations that will most likely close the gaps Develop and implement an action plan Endorse collective accountability Thoughtful analysis of the fictional dialogue throughout the book gives readers an understanding of the dynamic nature of change systems thinking and continuous improvement And questions at the end of each chapter help readers apply key concepts to their own schools Whether your school improvement goals are clearly defined or still in development Transforming Schools will help you tackle the many challenges of the change process

Reflections on People, Policy, and Practices in Curriculum History Deborah L. Morowski, Lynn M. Burlbaw, 2024-03-01 America s schools are constantly in the news today for safety concerns contested curricula teacher quality test scores and a variety of other topics Although most people spend at least 12 years in school systems they know little of the history or evolution of American schooling The collection of papers assembled in this book are divided into three categories which greatly impacted American schooling people policy and practices This work seeks to shed light on what has occurred in curriculum history in the past so as to help readers develop a deeper understanding of how our system of schooling arrived at its current state The first section of the book examines the stories of people who had an influence on schooling and education The second section

focuses on the curricula and programs that were utilized in schools and districts throughout the country The final chapter of the book looks at decisions that had long ranging impact on educational policies The chapters of this book offer a glimpse into the history of American schooling and those people policies and practices that influenced its development It is the editors hope that the work will spark interest in scholars and students of educational history to examine other past as well as present stories of educators to expand our understanding of the saga that is the American schooling experience

Science Education as a Pathway to Teaching Language Literacy ,2010-01-01 In this era of mandated high stakes and standardized testing teachers and schools officials find themselves struggling to meet the demands for improved student achievement At the same time they are also expected to teach all subjects as required by national and state curriculum standards Because of these competing demands science is not even taught or taught less often in order to make more room for mathematics and language arts drill and practice and teaching to the test Anyone concerned with providing students with a well rounded education should ask whether these drastic measures even if they were to show improvement in achievement justify denying children access to the unique opportunities for intellectual growth and social awareness that the effective instruction of science provides Will these students have enough exposure to the science curriculum to prepare them to do well later in middle and high school How is this current situation going to help ameliorate the pervasive achievement gap in science and how is it going to motivate students to pursue science related careers The authors of this book believe that instead of sacrificing the science curriculum to make more time for drill and practice in mathematics and language arts what should be done is to connect current research on literacy and science instruction with effective pedagogy Therefore this volume provides fresh theoretical insights and practical applications for better understanding how science can be used as a pathway to teaching literacy and hence as a pathway to improving teachers practice and students learning
