The Face-to-Face Principle Harry Collins, Robert Evans, Martin Innes, Eric B. Kennedy, Will Mason-Wilkes, John McLevey, 2022-05-12 The internet is changing the way that knowledge is made and shared Knowledge making in face to face settings is being replaced by information gathering from remote sources whose origins may be concealed but which can create an illusion of intimacy Though remote communication is beneficial in many ways modern societies would fail without it and though the tight boundaries of the face to face can be used for evil purposes such as criminal conspiracy if the overall trend to remote communication continues unchecked it could be disastrous for the future of democracy and the very idea of truth itself Too much reliance on remote communication threatens the core institutions of democratic societies We explain the change in technical detail from a systematic analysis of the workings of the face to face to a high level setting out of its dangerous political implications The analysis includes field studies reflexive examination drawing on the wide experience of the authors of the stickiness of the face to face in our own work and other institutions and network analysis which explains the illusion of intimacy that can be generated inadvertently or maliciously We look at the apparent effectiveness of techniques such as blockchain and the limits of their domain New information is provided about the malicious use of disinformation by foreign powers We dramatise the dangers to Western pluralist democracy through a personal accounting of the 2020 American election By drawing out the special features of face to face interaction and its constitutive role in creating societies with science as the icon the book sets out an agenda for civic education that can protect democratic institutions from the erosion of pluralism and the facile abandonment of trustworthy expertise The authors conclude by returning to the themes set out at the start of the book namely the crucial role played by trust in modern societies and the importance of face to face interactions in reproducing that trust and the democratic institutions in which it should be invested

Neurons and Headlines Lily Clarke, 2024-09-25 Neurons and Headlines A smart sizzling romance where science meets storytelling Jenna has landed her dream job as a science journalist ready to turn groundbreaking discoveries into captivating stories But when she s assigned to cover the research of the infuriatingly brilliant and aloof Dr Henry things take a sharp turn He s handsome but impossible cold arrogant and entirely too secretive Henry is a

neurobiology genius but when his lab experiments start producing baffling results he's at a loss. With his career on the line, the last person he wants help from is a relentless journalist. Yet Jenna might be the only one who can keep his secrets until he uncovers the mystery behind why his experimental mice are healing at an impossible rate. Thrown together by circumstance, Jenna and Henry clash at every turn, but the undeniable chemistry between them is impossible to ignore. As their worlds collide, sparks fly, and not just in the lab. Perfect for fans of enemies-to-lovers, science-based intrigue, and slow burn romance, *Neurons and Headlines* will have you hooked from the first page where intellect meets passion and opposites find common ground.

Minority Tech Anjuan Simmons, 2013-07-28 The technology field has become a key driver of the world economy. Companies like Apple, Google, Microsoft, and Facebook are not only iconic organizations, but their founders are often legends in their own right. However, the ethnic and gender makeup of these companies are overwhelmingly reflections of their founders: white males. Anjuan Simmons has worked in the technology industry for 20 years as a software developer, infrastructure architect, and software project manager. His experiences as a minority in the technology industry inspired him to describe them on his blog. *Minority Tech* is a curated, edited, and augmented selection of those blog entries. The titles covered include *The New Negro Problem*, *America and the Loss of the Black Genius*, *A Code of Conduct for Black Men*, *Why I Believe in Affirmative Action*, *What the World Needs from Trayvon Martin*, *3 Reasons Why the Technology Industry Needs More Diversity*, *What Facebook Taught Me about Rape Prevention*, and more. *Team* David Allen, Edward

Lamont, 2024-05-21 A groundbreaking book about how to harness the power of collaboration and work most effectively in groups, coauthored by *Getting Things Done's* David Allen. When *Getting Things Done* was published in 2001, it was a game changer. By revealing the principles of healthy high performance at an individual level, it transformed the experience of work and leisure for millions. Twenty years later, it has become clear that the best way to build on that success is at the team level, and one of the most frequently asked questions by dedicated GTD users is how to get an entire team onboard. By building on the effectiveness of what GTD does for individuals, *Team* will offer a better way of working in an organization while simultaneously nourishing a culture that allows individuals' skills to flourish. Using case studies from some of the world's largest and most successful companies, *Team* shows how leaders have employed the principles of team productivity to improve communication, enable effective execution, and reduce stress on team members. These principles are increasingly important in the post-pandemic workplace where the very nature of how people work together has changed so dramatically. *Team* is the most significant addition to the GTD canon since the original and, in offering a roadmap for building a culture of healthy high performance, will be welcomed by readers working in any sized group or organization. *Making Things*
