**Regulating Competition in Stock Markets** Lawrence R. Klein,Viktoria Dalko,Michael H. Wang,2012-04-25 A guide to curbing monopoly power in stock markets Engaging and informative *Regulating Competition in Stock Markets* skillfully analyzes the

impact of the recent global financial crisis on health and happiness and uses this opportunity to put regulatory systems in perspective. Happiness is lost because of emotional and physical health deterioration resulting from the crisis. Therefore the authors conclude that financial crisis prevention should be the focus of public policy. This book is the most comprehensive study so far on potential risks to the stock market especially various forms of market manipulation that lead to mania and eventual crisis. Based on litigation cases from international stock markets and borrowing multidisciplinary findings in the fields of finance, economics, accounting, media studies, criminology, legal studies, psychology and medicine, this book is the first to provide thorough micro level regulatory proposals rooted in financial reality. By focusing on securities trading, they apply antitrust measures to limiting monopolistic power that is used for the manipulation of investors' perception and monopolistic profit. These proposals are quantifiable, adjustable, inexpensive and can be easily implemented by any securities regulating agency for real time oversight and daily operations. The recommendations found here are intended to improve the fairness and transparency of the financial markets, thereby perfecting the market competition, protecting investors, stabilizing the market and preventing crises. Explores how avoiding crises can contribute to a more scientific, health aware and civilized economic and social development. Written by a team of authors who have extensive experience in this dynamic field including Nobel Laureate Lawrence R Klein. Since the founding of the first organized stock exchange in Amsterdam 400 years ago, no systematic economic research results on stock markets have been implemented in stock market regulation around the world. *Regulating Competition in Stock Markets* aims to fill this void.
