Instructional Technology Barbara B. Seels, Rita C. Richey, 2012-10-01 The Association officially endorses this definition of Instructional Technology which has been developed over three years by the Committee on Definition and Terminology The Association recognizes that other theoretical frameworks exist and that these are valid but believes that these are part of the more inclusive theoretical framework of Instructional Technology used in this definition In making this definition and the document explaining it available we hope to help other organizations clarify their relationship to the broad field of Instructional Technology Although the Association offers this definition as its current position it is committed to a continuous reevaluation of the definition and to revising and publishing it so that it reflects changing concepts and terminology A document of this magnitude can only be produced as the result of the dedication and effort of the persons who formed the committee and of its chairperson Barbara Seels and her collaborator Rita C Richey Without their energies skill perseverance and willingness to risk stating their perceptions in this format we could not have offered this document Whether or not we agree with the statements presented here they will provide a benchmark and a point of dialogue for further development of a profession which seeks to provide conditions for effective learning **Instructional Media and the New Technologies of Instruction**

The Educator's Guide to Producing New Media and Open Educational Resources Tim D. Green, Abbie H. Brown, 2017-07-06 Digital video audio and text have never been more popular and educators need to know how to make new media work in all types of learning environments The Educator's Guide to Producing New Media and Open Educational Resources provides practical advice on how to produce and use open access resources to support student learning This realistic how to guide is written for education professionals in any discipline seeking to transform their instruction with technology

The Evolution of American Educational Technology Paul Saettler, 2004-03-01 The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media Although media have played an important role in educational technology the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and function of educational technology Moreover the assumption is made that all current theory methodology and practice rests upon the heritage of the past Indeed a common problem in the field has been the failure in many instances to take adequate account of past history in planning for the present or the future A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools Such research reviews are not intended to be comprehensive but were included because of their historical importance and their relevance in understanding the process of educational technology

Media and Methods Derick Unwin, 1969
