**Premodern Islam** Samer Akkach, 2012-02-01 This fascinating interdisciplinary study reveals connections between architecture cosmology and mysticism Samer Akkach demonstrates how space ordering in premodern Islamic architecture reflects the transcendental and the sublime The book features many new translations a number from unpublished sources and several illustrations Referencing a wide range of mystical texts and with a special focus on the works of the great Sufi master Ibn Arabi Akkach introduces a notion of spatial sensibility that is shaped by religious conceptions of time and space Religious beliefs about the cosmos geography the human body and constructed forms are all underpinned by a consistent

spatial sensibility anchored in medieval geocentrism Within this geometrically defined and ordered universe nothing stands in isolation or ambiguity everything is interrelated and carefully positioned in an intricate hierarchy Through detailed mapping of this intricate order the book shows the significance of this mode of seeing the world for those who lived in the premodern Islamic era and how cosmological ideas became manifest in the buildings and spaces of their everyday lives This is a highly original work that provides important insights on Islamic aesthetics and culture on the history of architecture and on the relationship of art and religion creativity and spirituality *Prophetic Culture* Federico Campagna,2021-06-17

Selected as one of The Tablet's Books of the Year 2021 Throughout history different civilisations have given rise to many alternative worlds Each of them was the enactment of a unique story about the structure of reality the rhythm of time and the range of what it is possible to think and to do in the course of a life Cosmological stories however are fragile things As soon as they lose their ring of truth and their significance for living the worlds that they brought into existence disintegrate New and alien worlds emerge from their ruins Federico Campagna explores the twilight of our contemporary notion of reality and the fading of the cosmological story that belonged to the civilisation of Westernised Modernity How are we to face the challenge of leaving a fertile cultural legacy to those who will come after the end of our future How can we help the creation of new worlds out of the ruins of our own **Arab Painting** Anna Contadini,2010-07-15 Arab painting preserved mainly in manuscript illustrations of the 12th to 14th centuries is here treated as an artistic corpus fully deserving of appreciation in its own terms and not as a mere precursor to Persian painting The book assembles papers by a distinguished list of scholars that illuminate the variety of material that survives in scientific as well as literary manuscripts Because of the contexts in which the paintings appear a major theoretical concern is precisely the relationship of painting to text It rejects earlier scholarly habits of analysing paintings in isolation and proposes the integration of text and image as a more satisfactory framework within which to elucidate the characteristics and functions of this impressive body of work *Art and Emergency* Emilia Terracciano,2017-10-30 During states of emergency normal rules and rights are suspended and force can often prevail In these precarious intervals when the human potential for violence can be released and rehearsed images may also emerge This book asks what happens to art during a state of emergency Investigating the uneasy relationship between aesthetics and political history Emilia Terracciano traces a genealogy of modernism in colonial and postcolonial India she explores catastrophic turning points in the history of twentieth century India via the art works which emerged from them Art and Emergency reveals how the suspended diagonal fugitive lines of Nasreen Mohamedi's abstract compositions echo Partition's traumatic legacy how the theatrical choreographies of Sunil Janah's photographs document desperate famine and how Gaganendranath Tagore's lithographs respond to the wake of massacre Making an innovative important intervention into current debates on visual culture in South Asia this book also furthers our understanding of the history of modernism

*The Visual Mind II* Michele Emmer, 2005 This collection of essays by artists and

mathematicians continues the discussion of the connections between art and mathematics begun in the widely read first volume of *The Visual Mind* in 1993 **BOOK JACKET** *Symbol of Divine Light* Nicholas Stone, 2018-01-01 *Symbol of Divine Light* surveys the history of the mosque lamp describing the numerous variants made in different historical periods and containing more than 200 stunning color and b w illustrations The deep significance of light and the lamp in Islamic culture and other traditions Jewish Christian Zoroastrian Hindu and Buddhist is also explored with reference made to the writings of authors belonging to the Traditionalist school notably Frithjof Schuon Ren Gu non Titus Burckhardt and Martin Lings The book presents a detailed exploration of the famous Koranic Verse of Light and the symbolism of its constituent elements light the niche the lamp glass oil and the tree Parallels are also drawn with other traditions indicating a universal symbolism *Symbol of Divine Light* concludes that the most important function of the mosque lamp was as a symbolic reminder of the Verse of Light as demonstrated by examples that were virtually non functional as lighting devices and also the extensive use of the mosque lamp as a decorative motif in Islamic architecture The book aims to give the reader an opportunity to contemplate the meaning of the mosque lamp as a symbol of Divine Light *Divine Generosity and Human Creativity* David Brown, 2017-02-22 Partly in a desire to defend divine freedom and partly because it is seen as the only way of preserving a distinctive voice for theology much contemporary theology has artificially restricted revelation and religious experience effectively cutting off those who find God beyond the walls of the Church Against this tendency David Brown argues for divine generosity and a broader vision of reality that sees God deploying symbols literary visual and sacramental as a means of mediating between the divine world and our own material existence A sustained argument for divine interaction and more specifically the ways in which God speaks in the wider imaginative world this volume calls for a careful listening exercise since symbols are richer and more open in their possibilities than their users often suppose Not only is this true of the imagery of Scripture even inanimate objects like buildings or hostile but creative artists can have important things to say to the believing Christian An ideal introduction that also moves the conversation forward this volume addresses foundations the multivalent power of symbols artists as theologians and meaning in religious architecture *Symmetries of Culture* Dorothy K. Washburn, Donald W. Crowe, 2021-02-17 This groundbreaking collaboration between an anthropologist and a mathematician constitutes both a collection of symmetrical pattern designs from many cultures and a monograph on pattern design and the classification of symmetrical patterns Intended for art historians anthropologists classical archaeologists and others interested in the study of material culture it can also serve as a reference and inspiration for the use of symmetrical patterns in art and design This richly illustrated study brings to light dozens of intriguing examples of symmetrical designs for instance in a Zulu loincloth a Japanese chopstick case a New England quilt a Tibetan Plaque of a Thousand Lamas a Hawaiian water gourd The same pattern found in a fantastical drawing of lizards by M C Escher is echoed in a Fijian basket lid and an Egyptian wall mosaic Publishers Weekly This extremely useful guide to classifying plane pattern designs is

extensively illustrated with carvings textiles baskets tiles and poetry which are used as examples of various symmetry patterns American Anthropologist An impressive book both in terms of its physical appearance and its content will undoubtedly become the major reference on the analysis of patterns in terms of symmetry properties Antiquity **Granada** Steven Nightingale, 2015-02-12 Yearning for a change Steven Nightingale took his family to live in the ancient Andaluc an city of Granada But as he journeyed through its hidden courtyards scented gardens and sun warmed plazas Steven discovered that Granada s present cannot be separated from its past and began an eight year quest to discover more Where once Christians Muslims and Jews lived peacefully together and the arts and sciences flourished Granada also witnessed brutality places of worship razed to the ground books burned massacre and anarchy In the 1600s the once populous city was reduced to 6 000 who lived among rubble In the next three centuries the deterioration worsened and the city became a refuge for anarchists then during the Spanish Civil War fascism took hold Literary and sensual Steven Nightingale produces a portrait of a now thriving city and the joy he discovered there revealing the resilience and kindness of its people the resonance of its gardens and architecture the wonders of the Alhambra and the cyclical nature of darkness and light in the history of Andaluc a At once personal and far reaching Granada is an epic journey through the soul of this most iconic of cities Sacred Spaces Samina Quraeshi, 2010-03-31 Quraeshi provides a vision of Islam in South Asia enriched by art and by a female perspective on the diversity of Islamic expressions of faith An account of a journey through the author s childhood homeland the book reveals the deeply spiritual nature of major centers of Sufism in the central and northwestern heartlands of South Asia **The Mediterranean Medina** AA. VV., 2016-01-03T00:00:00+01:00 This volume collects the proceedings of the International Seminar The Mediterranean Medina that took place in the School of Architecture at Pescara from 17th to 19th of June 2004 Technic and Magic Federico Campagna, 2018-05-31 We take for granted that only certain kind of things exist electrons but not angels passports but not nymphs This is what we understand as reality But in fact reality varies with each era of the world in turn shaping the field of what is possible to do think and imagine Our contemporary age has embraced a troubling and painful form of reality Technic Under Technic the foundations of reality begin to crumble shrinking the field of the possible and freezing our lives in an anguished state of paralysis Technic and Magic shows that the way out of the present deadlock lies much deeper than debates on politics or economics By drawing from an array of Northern and Southern sources spanning from Heidegger Junger and Stirner s philosophies through Pessoa s poetry to Advaita Vedanta Bhartrhari Ibn Arabi Suhrawardi and Mulla Sadra s theosophies Magic is presented as an alternative system of reality to Technic While Technic attempts to capture the world through an absolute language Magic centres its reconstruction of the world around the notion of the ineffable that lies at the heart of existence Technic and Magic is an original philosophical work and a timely cultural intervention It disturbs our understanding of the structure of reality while restoring it in a new form This is possibly the most radical act if we wish to change our world first we have to change

the idea of reality that defines it
