Issues And Problems In Inferring A Level Of Acceptable Risk:

Issues and Problems in Inferring a Level of Acceptable Risk Rand Corporation,1976 **Probabilistic Safety Assessment in the Chemical and Nuclear Industries** Ralph Fullwood,2000 In addition to presenting methodology it shows how to identify accident vulnerability in the two industries It reviews the causes of the two major nuclear accidents and many fatal accidents in the chemical industry including Bhopal Many examples of applications of PSA to both industries are presented BOOK JACKET Problems are included at the end of many chapters with answers at the back of the book Jacket

Risk Evaluation and Management V.T. Covello,Joshua Menkes,J.L. Mumpower,2012-12-06 Public attention has focused in recent years on an array of technological risks to health safety and the environment At the same time responsibilities for technological risk as sessment evaluation and management have grown in both the public and private sectors because of a perceived need to anticipate prevent or reduce the risks inherent in modem society In attempting to meet these responsibilities legislative judicial regulatory and private sector institutions have had to deal with the extraordinarily complex problems of assessing and balancing risks costs and benefits The need to help society cope with technological risks has given rise to a new intellectual endeavor the social and behavioral study of issues in risk evaluation and risk management The scope and complexity of these analyses require a high degree of cooperative effort on the part of specialists from many fields Analyzing social and behavioral issues requires the efforts of political scientists sociologists decision analysts management scientists econ omists psychologists philosophers and policy analysts among others **The 5-year Outlook on Science and Technology, 1981** ,1981 **Risk Assessment and Management** Lester B.

Lave,2013-06-29 This is a collection of papers presented at the 1985 annual meeting of the Society for Risk Analysis As always seems to occur at these meetings the discussion was lively the sessions were filled and people complained about not being able to hear all the papers they wanted to because of concurrent sessions If ever someone is in charge of a meeting I wish them the good luck to have it be one for the Society for Risk Analysis While I was responsible for the meeting it could not have taken place without the efforts of the general chairman Alan Moshissi The program committee was chaired by Janice Longstreth and included Lee Abramson and Vincent Covello Together we assembled disparate papers into reasonably coherent sessions prodded authors into getting us manuscrLpts on time and dealt with all the last minute changes that are required for a major meeting The Washington chapter of the Society for Risk Analysis hosted the meeting Dr Longstreth was president of the chapter during this fateful year and deserves a great deal of thanks for her organizational skills and efforts Rick Cothorn Jerry Chandler Kathleen Knox Sue Perlin and Paul Price played major roles in organ1z1ng the meeting and making it run smoothly Special thanks go to Richard J Burk Jr Executive Secretary of the Society and his staff for handling the logistics [Risk/Benefit Analysis in Water Resources Planning and Management](#) Yacov Haimes,2013-06-29 Ronald M North President Universities Council on Water Resources People sense intuitively that the world in which we live is not free

of risk Every decision every action even the refusal to either act or decide involves some element of risk Perhaps because we accept relatively low levels of risk in our daily activities we tend to minimize the existence of risk and thereby fail to include risk assessment in those decisions and actions which could be improved through a risk assessment process However our casual approach to risk assessment seems to stem largely from the difficulties inherent in measuring risk rather than from any lack of cognizance of the existence of risk This conclusion is evidenced by the many statements in official documents relating to planning and evaluation which suggest that risk assessments should be conducted but do not provide the mechanism for such assessments nor do they encourage their consideration in the decision making process This conference on Risk Benefit Analysis in Water Resources Planning and Management is notable because it attempts to identify and evaluate the mechanisms available for risk assessment which might be useful in water resources planning and management efforts These proceedings bring together the thoughts of professional persons who have struggled with the problems of risk assessment and who have contributed to the refinement of both theoretical and pragmatic solutions for the improvement of risk assessment processes

Technical Abstract Bulletin ,1981 **The Social Contours of Risk: Risk analysis, corporations and the globalization of risk** Jeanne X. Kasperson,Roger E. Kasperson,2005 The Social Contours of RiskVolume I Publics Risk Communication and the Social Amplification of RiskWe live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social existence In The Social Contours of Risk Volumes I and II two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume I collects their fundamental work on how risks are communicated among different publics and stakeholders including local communities corporations and the larger society It analyses the problems of lack of transparency and trust and explores how even minor effects can be amplified and distorted through media and social responses preventing effective management The final section investigates the difficult ethical issues raised by the unequal distribution of risk depending on factors such as wealth location and genetic inheritance with examples from worker and public protection facility siting conflicts transporting hazardous waste and widespread impacts such as climate change

Energy Research Abstracts ,1981 *Environmental Health Perspectives* ,1994 **Uncertain Power** Dorothy S. Zinberg,2013-10-22

Uncertain Power The Struggle for a National Energy Policy discusses several issues pertaining to the energy situation in the U S such as the public the government and the risks The opening chapter discusses a delicate balance among the public experts and government Chapter 2 tackles the failure of consensus on energy and Chapter 3 deals with energy policy and democratic theory The fourth chapter reviews the neglect of social risk assessment the fifth chapter discusses valuing of human life Chapter 6 tackles the media coverage of complex technological issues and Chapter 7 covers the governance of nuclear power The eighth chapter covers the national energy policy from state and local perspectives while the ninth chapter

reviews selling saved energy considered as a new role for the utilities Chapter 10 discusses energy and security and Chapter 11 tackles history as a guide to the future The last chapter covers the political geology of the energy problems Readers who concern themselves regarding several factors that affect energy source supply and distribution along with its socio economic implication will find this book a great source of insight regarding the issue *Regulatory Policy and the Social Sciences* Roger G. Noll,2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 **Nuclear Safety** ,1980 **Social Contours of Risk** Roger E Kasperson,2014-07-30 We live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social existence In The Social Contours of Risk Volumes I and II two of the world s leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume II centres on the analysis and management of risk in society in international business and multinationals and globally The acceptability of risk to an individual depends on the context whether the larger society or in for example a corporate framework Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions The authors demonstrate that corporate culture is crucial in determining risk management They analyse the transfer of corporate risk management systems from industrial to developing countries and how globalization is spreading and creating new kinds of risk the combination of traditional and modern hazards presented by climate change technology transfer and economic growth They describe the new priorities and capacities needed to deal with these enhanced vulnerabilities around the globe Deepsea Mining and the Law of the Sea A.M. Post,2021-09-27 **Selected Rand Abstracts** Rand Corporation,1981 Includes publications previously listed in the supplements to the Index of selected publications of the Rand Corporation Oct 1962 Feb 1963 **Global New Drug Development** Jan A. Rosier,Mark A. Martens,Josse R. Thomas,2014-07-03 The development of new drugs is very complex costly and risky Its success is highly dependent on an intense collaboration and interaction between many departments within the drug development organization external investigators and service providers in constant dialogue with regulatory authorities payers academic experts clinicians and patient organizations Within the different phases of the drug life cycle drug development is by far the most crucial part for the initial and continued success of a drug on the market This book offers an introduction to the field of drug development with a clear overview of the different processes that lead to a successful new medicine and of the regulatory pathways that are used to launch a new drug that are both safe and efficacious This is the most comprehensive and detailed book on drug development I have ever read and I feel that it is likely to become a staple of drug development courses such as

those taught at Masters Level in my own University I think in the light of increasing integration of company and academic approaches to drug development both sides can read this book and therefore this book could not be more timely Professor Mike Coleman University of Aston UK from his review of the final manuscript RAOP ,1993 An Environmental Policy Reader ,1994 **Facts, Values, and Norms** Peter Railton,2003-03-17 In our everyday lives we struggle with the notions of why we do what we do and the need to assign values to our actions Somehow it seems possible through experience and life to gain knowledge and understanding of such matters Yet once we start delving deeper into the concepts that underwrite these domains of thought and actions we face a philosophical disappointment In contrast to the world of facts values and morality seem insecure uncomfortably situated easily influenced by illusion or ideology How can we apply this same objectivity and accuracy to the spheres of value and morality In the essays included in this collection Peter Railton shows how a fairly sober naturalistically informed view of the world might nonetheless incorporate objective values and moral knowledge This book will be of interest to professionals and students working in philosophy and ethics
