Issues In Child Care:

The Tragedy of Child Care in America Edward Zigler, Katherine W. Marsland, Heather Lord, 2009-01-01 Why the United States has failed to establish a comprehensive high quality child care program is the question at the center of this book Edward Zigler has been intimately involved in this issue since the 1970s and here he presents a firsthand history of the policy making and politics surrounding this important debate Good quality child care supports cognitive social and emotional development school readiness and academic achievement This book examines the history of child care policy since 1969 including the inside story of America's one great attempt to create a comprehensive system of child care its failure and the lack of subsequent progress Identifying specific issues that persist today Zigler and his coauthors conclude with an agenda designed to lead us successfully toward quality care for America's children Early Childhood Education and Child Care Anne Bridgman, 1989 **The Early Childhood Care and Education Workforce** National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Early Childhood Care and Education Workforce: A Workshop, 2012-03-10 Early childhood care and education ECCE settings offer an opportunity to provide children with a solid beginning in all areas of their development The quality and efficacy of these settings depend largely on the individuals within the ECCE workforce Policy makers need a complete picture of ECCE teachers and caregivers in order to tackle the persistent challenges facing this workforce The IOM and the National Research Council hosted a workshop to describe the ECCE workforce and outline its parameters Speakers explored issues in defining and describing the workforce the marketplace of ECCE the effects of the workforce on children the contextual factors that shape the workforce and opportunities for strengthening ECCE as a profession Issues in Child Care Charmaine Achin, 2020-04-07 A majority of states used funding from the Child Care and Development Fund CCDF in fiscal year 2017 to entirely or mostly support 7 of 10 major state child care activities Chapters 1 and 2 examine the extent to which states use CCDF funds to support their child care system the kinds of CCDF related activities states engage in that affect children who are not receiving CCDF subsidies and how states plan to use the increase in CCDF funding from the Consolidated Appropriations Act 2018 Each year millions of children age 5 and under receive publicly funded early care and education ECE services Chapter 3 examines the number and characteristics of state ECE programs and the extent to which they share characteristics or overlap with federal or other state programs and how states fund their ECE programs including any related benefits and challenges reported by states Chapter 4 discusses examines the federal investment in early learning and child care programs fragmentation overlap and duplication among early learning and child care programs and agencies efforts to address these conditions and the extent to which agencies assess performance for programs with an explicit early learning or child care purpose The cost of safe good quality child care prevents many low and middle income parents from working or forces them to work fewer hours or accept lower wages The federal government provides direct support to improve child care quality and subsidize child care costs for low and middle

income families through the Child Care and Development Block Grant CCDBG Chapter 5 discusses recent legislation on child care quality and access Trauma is a widespread harmful and costly public health problem and its effects are especially detrimental to children Any frightening dangerous or violent event that threatens a child or their loved ones can potentially be traumatic Chapter 6 reviews selected states efforts to support children affected by trauma Some international human rights standards allow broad state interventions in families based on the state s conception of the best interest of the child These states believe it is better to remove a child from its biological parents rather than let the child stay at home The United States has grappled with where the threshold should be for removal of children from their parents One major consideration in this balancing of interests should be the potentially lifelong suffering and even abuse faced by children who were removed from their own families and who remain without permanent families in the foster care system as reported in chapter 7

Issues in Child Care Bernard Spodek,Olivia N. Saracho,1992 Professional child care services have become an increasingly important component of early childhood education Both centre based care and family day care have come a long way from the day nurseries of the 19th century with acceptance of and demand for organised child care increasing rapidly

America's Child Care Problem Barbara R. Bergmann,Suzanne Wiggins Helburn,Suzanne Wiggans Helburn,2003-05-30 The revolution in women s lives has created an unprecedented demand for non parental child care and sparked a growing child care industry run by both public and private providers In this book two esteemed economists examine the causes and potential cures of the child care problems that face this country today Writing for policymakers parents and providers alike Suzanne W Helburn and Barbara R Bergmann provide the first in depth look at the child care industry identifying crucial problems such as quality of care and the high cost of even mediocre care Moreover the authors identify sources for change including stronger regulatory procedures on providers and suppliers of care and more government subsidies *America s Child Care Problem* examines the views of key players in all facets of the child care industry CEOs politicians policy advocates foundation directors child care providers and parents and offers specific advice and guidelines for parents to use when selecting care The book helps parents understand the hidden costs of child care the pros and cons of child care centers versus care by nannies relatives and family run centers and danger signals that indicate a low quality of child care

School-age Child Care Clifford Baden,Andrea Genser,1980 **Multicultural Issues in Child Care** Janet Gonzalez-Mena,1993 This supplemental text presents cultural differences relevant to all caregiving settings day care nursery and preschool programs Daily caregiving routines and objectives are stressed throughout with emphasis given to the practical and immediate concerns of the caregiver The book promotes sensitivity communication and problem solving as keys to providing what children need according to their individual development their parents beliefs and the beliefs of the caregiver Learning to communicate across cultures even when a common language is not shared is emphasized Child Care in the 1990s Alan Booth,2014-05-22 Bringing together professionals from sociology economics psychology and family

studies this volume presents papers from a symposium on child care that sought answers to each of the four questions listed in the table of contents A lead speaker provided an answer and discussants had a chance to critique the main presentation and set forth their own views Each session also included a policy person to deal with issues from an applied perspective The lead papers review papers and rejoinders constitute the contents of this volume Interdisciplinary in scope it deals with the central issue in a systematic way and attempts to present divergent points of view on each question As such it provides the reader with current information and a review of issues intended to provoke new ways of thinking about child care

Child Care Problem David M. Blau, 2001-11-09 The child care system in the United States is widely criticized yet the underlying structural problems are difficult to pin down In *The Child Care Problem* David M Blau sets aside the often emotional terms of the debate and applies a rigorous economic analysis to the state of the child care system in this country arriving at a surprising diagnosis of the root of the problem Blau approaches child care as a service that is bought and sold in markets addressing such questions as What kinds of child care are available Is good care really hard to find How do costs affect the services families choose Why are child care workers underpaid relative to other professions He finds that the child care market functions much better than is commonly believed The supply of providers has kept pace with the number of mothers entering the workforce and costs remain relatively modest Yet most families place a relatively low value on high quality child care and are unwilling to pay more for better care Blau sees this lack of demand rather than the market's inadequate supply as the cause of the nation's child care dilemma The *Child Care Problem* also faults government welfare policies which treat child care subsidies mainly as a means to increase employment of mothers but set no standards regarding the quality of child care their subsidies can purchase Blau trains an economic lens on research by child psychologists evaluating the evidence that the day care environment has a genuine impact on early development The failure of families and government to place a priority on improving such critical conditions for their children provides a compelling reason to advocate change The *Child Care Problem* concludes with a balanced proposal for reform Blau outlines a systematic effort to provide families of all incomes with the information they need to make more prudent decisions And he suggests specific revisions to welfare policy including both an allowance to defray the expenses of families with children and a child care voucher that is worth more when used for higher quality care The *Child Care Problem* provides a straightforward evaluation of the many contradictory claims about the problems with child care and lays out a reasoned blueprint for reform which will help guide both social scientists and non academics alike toward improving the quality of child care in this country

In Our Hands Elizabeth Palley, Corey S. Shdaimah, 2017-03 Working mothers are common in the United States In over half of all two parent families both parents work and women's paychecks on average make up 35 percent of their families incomes Most of these families yearn for available and affordable child care but

although most developed countries offer state funded child care it remains scarce in the United States And even in prosperous times child care is rarely a priority for U S policy makers In *In Our Hands The Struggle for U S Child Care Policy* Elizabeth Palley and Corey S Shdaimah explore the reasons behind the relative paucity of U S child care and child care support Why they ask are policy makers unable to convert widespread need into a feasible political agenda They examine the history of child care advocacy and legislation in the United States from the Child Care Development Act of the 1970s that was vetoed by Nixon through the Obama administration s Child Care Development Block Grant The book includes data from interviews with 23 prominent child care and early education advocates and researchers who have spent their careers seeking expansion of child care policy and funding and an examination of the legislative debates around key child care bills of the last half century Palley and Shdaimah analyze the special interest and niche groups that have formed around existing policy arguing that such groups limit the possibility for debate around U S child care policy Ultimately they conclude we do not need to make minor changes to our existing policies We need a revolution

Schools Of The 21st Century Matia Finn-stevenson,2018-02-12 An engaging discussion about the new roles schools are taking and how they are expanding their traditional mission n this timely book Matia Finn Stevenson and Edward Zigler argue that the federal government alone cannot address the need for child care and family support services that like education should be addressed locally The authors use their Schools of the 21st Century 21C program as an example of how schools can provide child care outreach services home visitations and health and nutrition servicesin addition to reading writing and arithmetic Whereas Part Two of the book discusses the authors Schools of the 21st Century program in considerable detail Parts One and Three address a broader range of issues concerning the effects that early education has on later school success and the various policy and conceptual approaches that have been tried both nationally and internationally in an effort to reform schools The authors also critically review the research on the effects of child care on childrens development and the importance of family support services Included is a wealth of information on the research and

practical applications of school reform initiatives in general and the implementation of child and family support services in particular. In this timely book, Matia Finn Stevenson and Edward Zigler argue that the federal government alone cannot address the need for child care and family support services that like education should be addressed locally. The authors use their Schools of the 21st Century 21C program as an example of how schools can provide child care outreach services, home visitations, and health and nutrition services in addition to reading, writing, and arithmetic. Conceptualized in 1987 in response to the child care crisis in this country, 21C has been implemented in over 600 schools in seventeen states. However, schools' involvement with increasingly younger children is not without controversy. The authors also address questions regarding evaluation and effective implementation and scale-up strategies and consider what changes in teacher training programs should occur to prepare teachers for working in schools of the twenty-first century, what provisions should be made to accommodate the need to staff schools with personnel trained in early child development, and what changes need to be made in the financial structures of schools to accommodate child care and support services. Whereas Part Two of the book discusses the authors' Schools of the 21st Century program in considerable detail, Parts One and Three address a broader range of issues concerning the effects that early education has on later school success and the various policy and conceptual approaches that have been tried both nationally and internationally. Finn Stevenson and Zigler also critically review the research on the effects of child care on children and other school reform initiatives that have been implemented in schools. Schools of the 21st Century is an engaging discussion about the new roles schools are taking and how they are expanding their traditional mission.
