Science of Suffering, the Wisdom of the Soul, and the New Behavioral Economics of Happiness: Towards a General Theory of Well-being

Paul T. P Wong,Lok Sang Ho,Richard Gregory Cowden,Claude-Hélène Mayer,Fan Yang,2023-10-24 New developments in positive psychology have evolved into the 2nd and 3rd waves going beyond the individual and positive focus towards complex systems multi cultures and the existential positive psychology of transcending suffering The present project aims at developing a general theory of well being that integrates all the above changes as the new frontier of positive psychology At a time when humanity is threatened by all kinds of existential crises from climate change to nuclear war from ideological polarization to a widening income gap we need to develop a big picture theoretical framework showing that happiness is not just for those living in peace and prosperity but also for those struggling in dire poverty and war ravaged countries like Ukraine not just for the self but also for others not just for the present but also for future generations This broader approach towards wellbeing opens up new vistas for research and interventions *The Palgrave Handbook of Knowledge Management* Jawad Syed,Peter A. Murray,Donald Hislop,Yusra Mouzughhi,2018-05-11 This international Handbook provides a comprehensive overview of key topics debates and issues within the now well established field of Knowledge Management KM With contributions from a range of highly skilled authors diverse and multi disciplinary

approaches towards KM are explored in this fantastic new reference work Topics covered include performance ethics sustainability and cross cultural management making this an equally important read to academics and practitioners working in areas such as technology education and engineering By analysing how the field of KM has developed over the years as well as presenting new methods to be implemented in the workplace this Handbook outlines a research agenda for the future of organisational learning and innovation

Social Theory and Language Glyn Williams, 2020-06-07 This volume offers a comprehensive treatment of the historical developments underpinning our present understandings of the relationship between language and the social by integrating the study of language with key strands of sociological theory The book posits that theory conditions how objects are constructed and in turn the meanings allocated to them and explores the implications for the relationship between language and the social The volume traces this relationship from its foundations in the work of Enlightenment philosophers in which sociology and linguistics emerged as coherent disciplines Taking this work as a point of departure the book examines the unfolding of the interplay between language and the social across developments in sociological theory in subsequent eras encompassing such strands as Marxism functionalism interactionism anti foundationalism poststructuralism critical theory and critical realism A final chapter turns its eye toward contemporary sociolinguistics and its treatment of different sociological perspectives and future directions for its continued development Reflecting on trajectories in sociological theory toward informing our understanding of the relationship between language and the social today this book will be key reading for students and scholars in sociolinguistics philosophy of language and those working in sociology and geography with an interest in language issues

Interculturality and the Munchausen Effect Ashley Simpson, 2024-11-11 This book offers a conceptual intervention for Language and Intercultural Communication studies by advocating for a critical interdiscursive approach to research on interculturality The volume addresses two interrelated theses in research on interculturality namely that the speaking subject in interaction reproduces the egocentrism and phonocentrism of the Munchausen Effect In considering the first the book traces the ways in which interculturality research has historically supposed the speaking subject that is the research participant as the basis of truth and knowledge not giving context to the discursive layers or paratexts involved in analyzing the subject's speech This notion of the speaking subject being taken at face value prompts Simpson's second interrelated argument on representation and historical conceptualizations of community in interculturality research whereby in trying to represent their subjects researchers often impose a sense of community affiliation onto their subjects and end up negating their subjective identities The book serves as a conceptual and practical response to calls for epistemological diversity and plurality within Interculturality in proposing an approach that brings epistemology and ontology together This book will be of interest to scholars in intercultural communication language education identity theory and philosophy of education

Knowledge and the University Ronald Barnett, Søren Bengtson, 2019-07-30 For hundreds of years knowledge has been central in

understanding the university Over recent decades however it is the economic value of knowledge that has come to the fore Now in a post truth world knowledge is also treated with suspicion and has become a vehicle for ideologies Knowledge and the University combats all these ways of thinking Its central claim is that knowledge is of value because of its connection with life Knowledge is of life from life in life and for life With an engaging philosophical discussion and with a consideration of the evolution of higher education institutions this book Examines ways in which research teaching and learning are bound up with life Looks to breathe new life into the university itself Widens the idea of the knowledge ecology to embrace the whole world Suggests new roles for the university towards culture and the public sphere Knowledge and the University is a radical text that looks to engender nothing less than a new spirit of the university It offers a fascinating read for policy makers institutional leaders academics and all interested in the future of universities

Multimodal Approaches to Media Discourses Tim Griebel, Stefan Evert, Philipp Heinrich, 2020-08-18 Multimodal Approaches to Media Discourses brings together contributions from an interdisciplinary group of scholars on corpus assisted analyses of multimodal data on austerity discourses in the United Kingdom which extend and expand on the understanding of austerity but also of the methodologies used to analyse multimodal corpora The volume demonstrates how the austerity measures introduced in response to global economic and financial crises in recent years can be viewed as being more complexly layered than they appear not simply reduced to their connections to spending cuts and fiscal debt The book employs an innovative methodological approach in which established and emerging scholars from linguistics and computational and social sciences critically reflect on the exact same set of data multimodal texts and articles from The Guardian and The Daily Telegraph from 2010 to 2016 This framework allows for the exploration of the role of the media in mediating the public s assessment of austerity and the ideas actors emotions geographies and broader material context which contribute to such perceptions In so doing the volume also offers unique insights into systematic analyses to multimodal data which may be applied to other topics and connected with other disciplines Enhancing our awareness and assessment of austerity in public discourse and of the methodologies to study it this book is key reading for students and researchers in discourse analysis corpus linguistics multimodality and those working at the intersection of these fields

Working with Critical Realism Alpesh Maisuria, Grant Banfield, 2022-12-30 This international and interdisciplinary collection gathers stories from researchers and research students about their methodological encounters with critical realism Whether the contributors are experienced or novice researchers they are predominantly new to critical realism For various reasons as the contributors detail they have all been drawn to critical realism It is well known that critical realism can be bewildering and even overwhelming to newcomers especially to those unfamiliar with language of and without a grounding in philosophy While there are now numerous and important introductory and applied critical realist texts that make critical realism more accessible to a broader audience stories from newcomers have been absent especially as part of a single collection The significance and uniqueness of this

collection lies in its documentation of first hand reflective insights on the practical use and implementation of critical realism The contributors feature critical realist inspired research journeys in Australia England Scotland Belgium Sweden and Spain The hope of this book is that the stories and accounts presented in it will inspire or at least sufficiently arouse the curiosity of others to explore critical realist possibilities which we believe offer enormous value to serious researchers across and within all disciplines and subjects who are interested in rigorous intellectual work with a socially progressive purpose

Pacifism's Appeal Jorg Kustermans, Tom Sauer, Dominiek Lootens, Barbara Seghaert, 2019-03-13 This volume examines the possibility or need of a revitalization of pacifism as a world political practice It takes as its point of departure the observation that although just war thinking has long been dominant in Western debates about war and peace recent events have served to temper enthusiasm about the doctrine Pacifism has been much less prominent a stance in recent decades but there is the impression that it may be staging a return Just war thinking has to a large extent failed Outright bellicism remains as undesirable as ever Pacifism presents itself again as a possible alternative Once upon a time the peace movement was popular and pacifism with it Pacifism appealed to people It stirred hearts and minds It inspired political action and institutional designs This volume examines whether pacifism can claim its ground again and how it should be redefined in light of today's world political circumstances

Political Economy and Sociolinguistics David Block, 2018-02-08 Shortlisted for the BAAL Book Prize 2019 This book explores how political economy intersects with sociolinguistics specifically how neoliberalism inequality and social class mediate language in society issues After the preface in which the author sets the scene for the content of the book Chapter 1 is an extensive though selective review of sociolinguistics research which has been framed as political economic in orientation The chapter concludes that such research generally contains little in the way of thorough and in depth coverage of the key ideas and conceptual frameworks said to undergird it With this consideration in mind Chapters 2 3 and 4 are organised around in depth discussions of respectively political economy as a general disciplinary frame neoliberalism as the variegated variety of capitalism dominant in the world today and stratification inequality and social class as phenomena intrinsic to capitalism which in the neoliberal era have come to the fore as key issues Drawing directly on the background provide in Chapters 2 4 Chapters 5 and 6 explore two distinct political economy informed lines of research on the one hand the neoliberal citizen and on the other hand discursive class warfare The book ends with an epilogue addressing issues arising around political economy in sociolinguistics

Evidence-Based Policy Ray Pawson, 2006-04-07 In this important new book Ray Pawson examines the recent spread of evidence based policy making across the Western world Few major public initiatives are mounted these days in the absence of a sustained attempt to evaluate them Programmes are tried tried and tried again and researched researched and researched again And yet it is often difficult to know which interventions and which inquiries will withstand the test of time The evident solution going by the name of evidence based policy is to take the longer view Rather than relying on one off

studies it is wiser to look to the weight of evidence Accordingly it is now widely agreed the most useful data to support policy decisions will be culled from systematic reviews of all the existing research in particular policy domains This is the consensual starting point for Ray Pawson's latest foray into the world of evaluative research But this is social science after all and harmony prevails only in the first chapter Thereafter Pawson presents a devastating critique of the dominant approach to systematic review namely the meta-analytic approach as sponsored by the Cochrane and Campbell collaborations In its place is commended an approach that he terms realist synthesis On this vision the real purpose of systematic review is better to understand programme theory so that policies can be properly targeted and developed to counter an ever changing landscape of social problems The book will be essential reading for all those who loved or loathed the arguments developed in *Realistic Evaluation* Sage 1997 It offers a complete blueprint for research synthesis supported by detailed illustrations and worked examples from across the policy waterfront It will be of especial interest to policy makers practitioners researchers and students working in health education employment social care criminal justice regeneration and welfare

Christianity and Critical Realism Andrew Wright, 2013-05-07 One of the key achievements of critical realism has been to expose the modernist myth of universal reason which holds that authentic knowledge claims must be objectively pure uncontaminated by the subjectivity of local place specific time and particular culture Wright aims to address the lack of any substantial and sustained engagement between critical realism and theological critical realism with particular regard to a the distinctive ontological claims of Christianity b their epistemic warrant and intellectual legitimacy and c scrutiny of the primary source of the ontological claims of Christianity namely the historical figure of Jesus of Nazareth As such it functions as a prolegomena to a much needed wider debate guided by the underlabouring services of critical realism between Christianity and various other religious and secular worldviews This important new text will help stimulate a debate that has yet to get out of first gear This book will appeal to academics graduate and postgraduate students especially but also Christian clergy ministers and informed laity and members of the general public concerned with the nature of religion and its place in contemporary society

Reframing the Social Poe Yu-ze Wan, 2011 Poe Yu-ze Wan argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency

Posthumanist Applied Linguistics Alastair Pennycook, 2017-09-13 Drawing on a range of contexts and data sources from urban multilingualism to studies of animal communication *Posthumanist Applied Linguistics* offers us alternative ways of thinking about the human predicament with major implications for research education and politics Exploring the advent of the Anthropocene new forms of materialism distributed language assemblages and the boundaries between humans other animals and objects eight

incisive chapters by one of the world's foremost applied linguistics open up profound questions to do with language and the world. This critical posthumanist applied linguistic perspective is essential reading for all researchers and students in the fields of Applied Linguistics and Sociolinguistics. *Explaining Global Poverty* Branwen Gruffydd Jones, 2007-01-24. The twenty-first century is characterized by extremes of poverty and wealth of scarcity and abundance. The vast inequalities of wealth distribution between the developed west and the impoverished developing world is a complex problem. This book recognises that Africa in particular has manifested this global disgrace and symbolizes the nature of poverty to the western world. In order to truly emancipate the poverty-stricken around the world we must necessarily understand the reasons for its existence. In a departure from traditional critical realist theory Gruffydd Jones argues the benefits of reassessing the relevance of objective inquiry and emphasizes its primacy over normative theory in the battle to truly understand the reasons for the African crisis. This approach brings us a book of real relevance for inequality in the modern world and gives us an important platform from which to move forwards in the fight against poverty. *Culture and the University* Ronald Barnett, Søren S.E. Bengtson, Rikke Toft Nørgård, 2022-07-14. Not long ago it was understood that universities and culture were intimately related. However, to a large extent that understanding has faded. Culture and the University confronts this situation. Written by three leading scholars of higher education and the philosophy of higher education, the book opens the debate about the cultural purpose of universities and higher education. The authors argue that the university should be and can be an institution of culture of great cultural significance in the digital age and exercise cultural leadership in society. This wide-ranging and polemic text addresses a range of subjects including environmentalism, citizenship, post-truth, the ethical implications of technology and feminist philosophy. The authors build on the work of key philosophers of the university from Aristotle, Nietzsche and Heidegger to Donna Haraway, Terry Eagleton and Martha C. Nussbaum to conceive of an entirely modern vision of the university. This is a must-read for anyone with an interest in the future of higher education and the university. *Holocaust Education* Stuart Foster, Andy Pearce, Alice Pettigrew, 2020-07-06. Teaching and learning about the Holocaust is central to school curriculums in many parts of the world. As a field for discourse and a body of practice, it is rich, multidimensional and innovative. But the history of the Holocaust is complex and challenging and can render teaching it a complex and daunting area of work. Drawing on landmark research into teaching practices and students' knowledge in English secondary schools, *Holocaust Education: Contemporary challenges and controversies* provides important knowledge about and insights into classroom teaching and learning. It sheds light on key challenges in Holocaust education, including the impact of misconceptions and misinformation, the dilemmas of using atrocity images in the classroom and teaching in ethnically diverse environments. Overviews of the most significant debates in Holocaust education provide wider context for the classroom evidence and contribute to a book that will act as a guide through some of the most vexed areas of Holocaust pedagogy for teachers, teacher educators, researchers and policymakers. On the Theory and History of Ideological Production Malcolm K. Read, 2023-08-28 On the Theory and History of Ideological Production promotes the existence of an ideological unconscious understood primarily as a product of social relations not of the Ideological State Apparatus Attention focuses upon the transition from feudalism to capitalism as theorised by the Spanish Marxist and former student of Althusser Juan Carlos Rodríguez Theorization of the ideological unconscious presupposes a change of terrain from the individual society opposition to a problematic based on the social formation The present text assesses Rodríguez's work alongside that of his contemporaries Fredric Jameson Noam Chomsky Terry Eagleton Roy Bhaskar Slavoj Žižek and others
