Components and Objects Marcello M. Bonsangue,Susanne Graf,Willem-Paul de Roever,2008-12-01 Formal methods have been applied successfully to the verification of medium sized programs in protocol and hardware design However their application to the development of large systems requires more emphasis on specification modelling and validation techniques supporting the concepts of reusability and modifiability and their implementation in new extensions of existing programming languages like Java The 6th International Symposium on Formal Methods for Components and Objects FMCO 2007 was held in Amsterdam The Netherlands in October 2007 This book presents 12 revised papers submitted after the symposium by the speakers of each of the following European IST projects the IST FP6 project Mobius developing the technology for establishing trust and security for the next generation of global computers the IST FP6 project SelfMan on self management for large scale distributed systems based on structured overlay networks and components the IST FP6 project GridComp and the FP6 CoreGRID Network of Excellence on grid programming with components the Real time component cluster of the Network of Excellence on Embedded System Design ARTIST focussing on design processes and architectures for real time embedded systems and the IST FP6 project CREDO on modeling and analysis of evolutionary structures for distributed services Meaning and Use A. Margalit,2007-11-14 The second Jerusalem Philosophical Encounter was held in Jerusalem

on April 25 28 1976 The symposium was originally planned to celebrate the 60th birthday of Yehoshua Bar Hillel philosopher and friend But his sudden death intervened and turned celebration into commemoration The topic of the symposium was Meaning and Use For Bar Hillel the question meaning or use was of great importance one which he took as a question of priorities Which approach to natural language is prior the formal semantical approach which accords a central position to the

truth functional concept of meaning and to the theory of reference or rather the alternative approach which accords the central position to linguistic communication and prefers dealing with speech acts to dealing with Statements Bar Hillel's answer to this question in his later years can be summed up by our title meaning and use neither approach deserves priority each is equally necessary and they both complement each other Those familiar with Bar Hillel's uncompromising intellectual honesty would know that this answer does not reflect a superficial wish for domestic peace but stems rather from deep and informed convictions The issues of meaning and use dominated Bar Hillel's intellectual life At the same time his day to day existence was guided by the idea that the meaning of life is to be found in being useful particularly in being useful to the community of seekers of knowledge

Juan Luis Vives: Politics, Rhetoric, and Emotions Kaarlo Havu, 2022-04-30 By looking at rhetoric and politics this book offers a novel account of Juan Luis Vives' intellectual oeuvre It argues that Vives adjusted rhetorical theory to a monarchical context in which direct speech was not a possibility demonstrated how Erasmian languages of ethical self government and political peace were actualised rhetorically and critically in a princely environment and finally rethought the cognitive and emotional foundations of humanist rhetoric in his late and famous *De anima et vita* 1538 Ultimately towards the end of his life Vives epitomised a distinctively cognitive view of politics he maintained that political concord was not a direct outcome of institutional or legal reform or of the spiritual transformation of the Christian world an optimistic Erasmian interpretation but that concord could only be upheld once the dynamics of emotions that motivated political action were understood and controlled through responsible rhetoric that respected decorum and civility
