Your Office Amy Kinser, Patti Hammerle, 2012 For introductory computer courses on Microsoft Office 2010 or courses in computer concepts with a lab component for Microsoft Office 2010 applications Your Office is the Office Applications textbook written for instructors who want more than a skill drill book that enables students to learn discreet tasks but fails to illustrate the big picture of how these skills work together Your Office bridges the gap between skill and application and empowers students to master Office 2010 as a tool to solve problems and make decisions The cases progress students from learning the skills in each Office Application to using the applications as tools to make business decisions The unique modular structure provides a strong foundation for students through practice in each workshop and then synthesizes the objectives covered over two workshops challenging students to really retain what they learned as opposed to learning and then forgetting soon after The series scenario introduces a large global business the resort and spa made up of smaller businesses golf pro shop spa restaurants event planning etc featured in the cases that run throughout all four applications

This approach gives students a solid understanding of how an organization works by exposing them to how individuals in all facets of a business interact with tools like Microsoft Office and use information to make decisions For a behind the scenes look at Your Office visit <http://www.youtube.com/user/YourOffice2010> This is a one chapter supplement

**Computing for Ordinary Mortals** Robert St. Amant, 2013 In Computing for Ordinary Mortals cognitive scientist and AI expert Robert St Amant explains what he calls the really interesting part of computing which are the ideas behind the technology They re powerful ideas and the foundations for everything that computers do but they are little discussed This book will not tell you how to use your computer but it will give you a conceptual tour of how it works Some of the ideas like modularity which are so embedded in what we do as humans can also give us insight into our own daily activities how we interact with other people and in some cases even what s going on in our heads Computing is all around us and to quote Richard Hamming the influential mathematician and computer scientist The purpose of computing is insight not numbers and it is this insight that informs the entire book

**Go! with Basic Computer Concepts** Shelley Gaskin, Diane Coyle, 2008 For Introductory Computer courses in Microsoft Office 2007 or courses in Computer Concepts with a lab component for Microsoft Office 2007 applications Teach the course YOU want in LESS TIME The primary goal of the GO Series aside from teaching computer applications is ease of implementation with an approach that is based on clearly defined projects for students and a one of a kind supplements package
