OECD Environmental Strategy 2004 Review of Progress OECD,2004-04-20 This report assesses the progress that OECD countries have made in implementing objectives set out in an Environmentl Strategy adopted in 2001 as well as in applying the 71 national actions they agreed as part of that Strategy Facing Global Environmental Change Hans Günter Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Ürsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth sessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the

media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world
