This collection explores the historical origins of our modern concepts of intellectual or learning disability. The essays from some of the leading historians of ideas of intellectual disability focus on British and European material from the Middle Ages to the late nineteenth century and extend across legal, educational, literary, religious, philosophical and psychiatric histories. They investigate how precursor concepts and discourses were shaped by and interacted with their particular social, cultural and intellectual environments, eventually giving rise to contemporary ideas. The collection is essential reading for scholars interested in the history of intelligence, intellectual disability and related concepts, as well as in disability history generally.

New Testament Semiotics Timo Eskola, 2021-08-30 Focusing on linguistic signs, *New Testament Semiotics* navigates through different realist and nominalist traditions. From this perspective, Saussure's and Peirce's traditions exhibit similarities. Questioning Derrida's and Eco's semiotics based on their misuse of Peirce's innovations, Dr Privatdozent Timo Eskola rehabilitates Benveniste and Ricoeur. A sign is about conditions and functions. Sign as a role is a manifestation of participation. Serving as a sign entails participation in a web of relations, participation in a network of meanings and adoption of a set of rules. We should focus on sentences and networks, not primitive reference or binary oppositions. Enunciations are postulations producing evanescent meanings. Finally, the study suggests a linguistic approach to metatheology that is based on hermeneutics of discursive resistance.

Going Amiss in Experimental Research Giora Hon, Jutta Schickore, Friedrich Steinle, 2008-12-04 Like any goal-oriented procedure, experiment is subject to many kinds of failures. These failures have a variety of features depending on the particulars of their sources. For the experimenter, these pitfalls should be avoided and their effects minimized. For the historian, philosopher of science and the science educator, on the other hand, they are instructive starting points for reflecting on science in general and scientific method and practice in particular. Often more is learned from failure than from confirmation and successful application. The identification of error, its source, its context and its treatment shed light on both practices and epistemic claims. This book shows that it is fruitful to bring to light forgotten and lost failures, subject them to analysis and learn from their moral. The study of failures, errors, pitfalls and mistakes helps us understand the way knowledge is pursued and indeed generated. The book presents both historical accounts and philosophical analyses of failures in experimental practice. It covers topics such as error as an object of study, learning from error, concepts and dead ends, instrumental artifacts and surprise and puzzlement. This book will be of interest to historians, philosophers and sociologists of science as well as to practicing scientists and science educators.

Boccaccio the Philosopher Filippo Andrei, 2017-10-07 This book explores the tangled relationship between literary production and epistemological foundation, as exemplified in one of the masterpieces of Italian literature. Filippo Andrei argues that Giovanni Boccaccio's *Decameron* has a significant though concealed engagement with philosophy and that the philosophical implications of its narratives can be understood through an epistemological approach to the text. He analyzes the influence of Dante, Petrarch, Thomas Aquinas, Aristotle and other classical and medieval thinkers on Boccaccio's attitudes towards ethics.

and knowledge seeking Beyond providing an epistemological reading of the Decameron this book also evaluates how a theoretical reflection on the nature of rhetoric and poetic imagination can ultimately elicit a theory of knowledge **Die Rezeption Der Mittelalterlichen Sprachphilosophie in Der Theologie Des Thomas Von Aquin** Seung-Chan Park,1999 The first detailed monography on how Thomas Aquinas used the contemporary philosophy of language in his works Precise interpretations many tables and schematical drawings give the reader a useful orientation in the field of the new research on Aquinas *Giraldus Odonis O.F.M.: Opera Philosophica* Rijk,2005-07-01 This volume contains the first critical edition of Girald Odonis d 1349 De intentionibus in which the author deals with the multifarious problems around conceptualization with which philosophers and theologians from around 1300 were faced when attempting to bridge the gap between thought and reality Girald appears to have been an unyielding defender of the realistic position holding that our variously articulated concepts intentiones are representative of as many distinctions in Reality The main target of his severe criticism upon contemporaneous views of the matter is Herv de N dellec who was the first to write a monograph De intentionibus which betrays his adherence to a moderate realism The editor s extensive study of the intentionality debate of those years focusses on the development of the cognition theory in the period between Thomas Aquinas and Peter Auriol d 1322 **Modal Syllogistics in the Middle Ages** Henrik Lagerlund,2021-09-20 This book presents the first study of the development of the theory of modal syllogistic in the Middle Ages It traces the theory from the first medieval commentators on Aristotle s Prior Analytics to the end of the Middle Ages In the book several previously unstudied texts are analysed and the works of philosophers like Robert Kilwardby Albert the Great Richard of Campsall William of Ockham John Buridan Pseudo Scotus Albert of Saxony Marsilius of Inghen and Jodocus Trutfetter are studied These authors views on modal syllogistics are shown to comprise important insights clarifying central issues with implications for medieval philosophy in general The book will be of particular interest to historians of medieval philosophy and logic but also to anyone interested in the history of logic and Aristotelian philosophy *Ancient and Medieval Theories of Intentionality* Dominik Perler,2021-08-16 This volume analyses ancient and medieval theories of intentionality in various contexts perception imagination and intellectual thinking It sheds new light on classical theories e g by Aristotle and Thomas Aquinas and examines neglected sources both Greek and Latin It includes contributions by J Biard M Burnyeat V Caston D Frede R Gaskin E Karger C Michon D O Meara C Panaccio R Pasnau D Perler Ch Rapp P Simons R Sorabji and H Weidemann **Medieval Greek Commentaries on the Nicomachean Ethics** Charles Barber,David Jenkins,2009-02-23 Given the enduring importance of Aristotle s Nicomachean Ethics it is remarkable to find that there is no extensive surviving commentary on this text from the period between the second century and the twelfth century This volume is focused on the first of the medieval commentaries that produced in the early twelfth century by Eustratios of Nicaea Michael of Ephesus and an anonymous author in Constantinople This endeavor was to have a significant impact on the reception of the Nicomachean Ethics in Latin and Catholic Europe For in the mid thirteenth century
