Few-Body Problems in Physics '99 S. Oryu, M. Kamimura, S. Ishikawa, 2000-10-24 The first Asia Pacific Conference on Few Body Problems in Physics took place from August 23 to August 28 1999 at the Noda campus of the Science University of Tokyo in Noda city and Sawayaka Chiba Kenmin Plaza in Kashiwa city a suburb of Tokyo close to the Narita Tokyo International Air port with the Frontier Research Center for Computation Sciences FRCCS of the Science University of Tokyo as the host institute The High Energy Accelerator Research Organization KEK the Institute of Physical and Chemical Research RIKEN the Research Center for Nuclear Physics RCNP Osaka University the Physical Society of Japan and the Association of Asia Pacific Physical Societies AAPPS supported this conference The conference was initiated in the Asia Pacific area as a counterpart to the successful European Conference on Few Body Problems in Physics APFB99 in addition to the International Few Body Conference Series and the Few Body Gordon Conference series in North America The Physics of Few Body Problems covers as is well known systems with finite numbers of particles in contrast to many body systems with very large numbers of particles Therefore it covers such wide fields as mesoscopic atom molecular exotic atom nucleon hyperon and quark gluon physics plus their applications Few-Body Problems in Physics '98 Bertrand

Desplanques, Konstantin Protasov, Bernard Silvestre-Brac, Jaume Carbonell, 2012-12-06 The sixteenth European Conference on Few Body Problems in Physics has taken place from June 1 to June 6 1998 in Autrans a little village in the mountains close to Grenoble The Conference follows those organized in Peniscola 1995 Amsterdam 1993 Elba 1991 Uzhgorod 1990 The present one has been organized by a group of physicists working in different fields at the University Joseph Fourier of Grenoble who find in this occasion a good opportunity to join their efforts The core of the organizing committee was nevertheless located at the Institut des Sciences Nucleaires whose physicists especially in the group of theoretical physics have a long tradition in the domain The Few Body Conference has a natural tendency to be a theoretical one the exchange about the methods used in different fields is the common point to most participants It also has a tendency to be a hadronic physics one the corresponding physics community perhaps due to the existence of experimental facilities devoted to the study of few body systems is better organized In preparing the scientific program we largely relied on the advices of the International Advisory Committee while avoiding to follow these trends too closely **The Few Body Problem** M.J. Coinciding with the 300 anniversary of the publication of Newton's Principia The International Astronomical Union organized the colloquium No 96 The Few Body Problem in Turku Finland June 14 19 1987 It provided an opportunity to review the progress in the very field which caused Newton a headache as Victor Szebehely reminded the audience in his introductory remarks It is a measure of the difficulty and complication of the few body problem that even after 300 years so many aspects of the problem are still unsolved To quote Szebehely again Sir Isaac established the rules Poincare presented the challenges Many of these challenges are reviewed in the present proceedings The gravitational few body problem cuts across the

borders of established disciplines The participants of the colloquium came from departments as different as Aerospace Engineering Astronomy Theoretical Physics Physics Mathematics Applied Mathematics Computer Science Planetology Geodesy Celestial Mechanics and Space Science The few body problem is a problem of practical significance in many fields and the main aim of the colloquium was to bring together people with research interests in this area many of whom normally attend different conferences
