stroke order has been learned **Wang Kuo-wei's Jen-chien Tz'u-hua** A.A. Rickett, 1977-09-01 In the first decade of the twentieth century while other intellectuals were concerned with translating works of political and scientific import into Chinese Wang Kuo wei 1877 1927 looked to Western philosophy to find answers to the fundamental questions of human life He was the first Chinese to translate Schopenhauer and Nietzsche into Chinese and to apply their views of aesthetics to Chinese literature The influence of their concepts of genius and the sublime can easily be seen in his Jen chien tz u hua Wang was also indebted to Chinese critics for the development of his theories regarding the sphere of individuality that each poem represents ching chieh a theory that places him among the ranks of China's greatest literary critics Innovative as he was in his concepts of poetry however Wang chose to convey those concepts in the traditional form of poetic criticism the tz u hua or talks on poetry Thus this translation of the complete edition of his Jen chien tz u hua not only adds to the Westerner's knowledge of Chinese literary criticism but also provides insight into the way in which Chinese communicated with each other about their literature Women and Gender in Contemporary Chinese Societies Shanshan Du, Ya-chen

Chen, 2013-03-04 Recent attention to historical geographic and class differences in the studies of women and gender in China has expanded our understanding of the diversity and complexity of gendered China Nevertheless the ethnic dimension of this subject matter remains largely overlooked particularly concerning women's conditions and gender status Consequently the patriarchy and its oppression of women among the Han the ethnic majority in China are often inaccurately or erroneously associated with the whole gendered heritage of China epitomized by the infamous traditions of footbinding and female infanticide Such academic and popular predisposition belies the fact that gender systems in China span a wide spectrum ranging from extreme Han patriarchy to Lahu gender egalitarianism The authors contributing to this book have collectively initiated a systematic effort to bridge the gap between understanding the majority Han and ethnic minorities in regard to women and gender in contemporary Chinese societies By achieving a quantitative balance between articles on the Han majority and those on ethnic minorities this book transcends the ghettoization of ethnic minorities in the studies of Chinese women and gender The eleven chapters of this volume are divided into three sections which jointly challenge the traditions and norms of Han patriarchy from various perspectives The first section focuses on gender traditions among ethnic minorities which compete with the norms of Han patriarchy The second section emphasizes the impact of radical social transformation on gender systems and practices among both Han and ethnic minorities The third section underscores socio-cultural diversity and complexity in resistance to Han patriarchal norms from a broad perspective This book complements previous scholarship on Chinese women and gender by expanding our investigative lens beyond Han patriarchy and providing images of the multiethnic landscape of China By identifying the Han as an ethnically marked category and by bringing to the forefront the diverse gender systems of ethnic minorities this book encourages an increasing awareness of and sensitivity to the cross-cultural diversity of gendered China both in academia and beyond *Interior Architecture &*
