Fighter Command, 1936-1968 Chaz Bowyer,1980 *RAF Fighter Command 1936-1968* Norman L. R. Franks,1992 **The RAF and Aircraft Design, 1923-1939** Colin Sinnott,2001 This work describes the vital role of the Air Ministry in the development of the RAF's fighters and bombers before WWII **RAF Fighter Command**

Pilot Mark Barber,2012-09-20 The recent 70th anniversary of the Battle of Britain combined with the threat of significant cuts to the current RAF have highlighted the importance of Fighter Command in the early days of World War II once more The role of the few as described by Churchill during the Battle of Britain has been the subject of much mythologizing both at the time and in the years since This title will put Fighter Command in context describing the lack of funding and attention which it received during the interwar period until it was almost too late The myth of the fighter pilot will be humanized with first hand accounts quoted which put nervous but brave human beings from all walks of life in the cockpit Although the Battle of Britain may not have in itself been the decisive encounter that it has historically been portrayed as the moral victory won by the RAF the victory that proved that Germany could be defeated was just as important as a military strategic victory

The RAF's French Foreign Legion G H Bennett,2011-06-30 An examination of the relationship between the Royal Air Force and the French Fighter pilots who flew for the RAF during WWII *Men of The Battle of Britain* Kenneth G. Wynn,2015-07-07 An updated edition of the essential WWII reference that tells the stories of The Unsung Few who inexplicably fell under the radar of war historians The Sunday Express Since it was first published in 1989 Men of the Battle of Britain has become a standard reference book for academics and researchers interested in the Battle of Britain as well as readers with an interest in the events of 1940 The book records the service details of the airmen who took part in the Battle of Britain in considerable depth Where known postings and their dates are included as well as promotions decorations and successes claimed flying against the enemy There is also much personal detail often including dates and places of birth civilian occupations dates of death and place of burial or for those with no known grave place of commemoration In addition there are many wartime head and shoulders photographs No matter how brief their service or notable their military careers all are equally acknowledged This third edition includes new names and corrected spellings as well as many new photographs and many of the entries have been extended or corrected with freshly acquired information 'SAM' Marshal

of the Royal Air Force the Lord Elworthy Richard Mead,2018-10-30 Sam Elworthys career was remarkable by any standards Born in New Zealand in 1911 and educated in England he was called to the Bar After learning to fly he joined the RAAF During the Second World War he won the DFC DSO and AFC and after commanding 82 Squadron worked closely with Bomber Harris and General Eisenhower He became an air commodore aged 33 His meteoric rise continued post war Switching to Fighter Command he saw service in India Pakistan and the UK before becoming Commandant of the RAF Staff College By 1960 he was tri service C in C Middle East and his actions prevented the invasion of Kuwait by Iraq As Chief of Air Staff and Chief of defense Staff in the 1960s he fought the Services corner at a difficult political and economic time He secured the long term future of the RAF whose very existence was threatened A hugely respected figure he became a life peer Knight of the Garter and Constable of Windsor Castle He died in 1993 in his native New Zealand This long overdue biography attempts successfully to do justice to a man of great stature integrity and achievement *Britain's Victory, Denmark's Freedom* Mikkel Planthin ,2017-08-19 International Encyclopedia of Military History James C. Bradford,2004-12-01 With its impressive breadth of coverage both geographically and chronologically the International Encyclopedia of Military History is the most up to date and inclusive A Z resource on military history From uniforms and military insignia worn by combatants to the brilliant military leaders and tacticians who commanded them the campaigns and wars to the weapons and equipment used in them this international and multi cultural two volume set is an accessible resource combining the latest scholarship in the field with a world perspective on military history **The History of Air Intercept Radar & the British Nightfighter 1935-1959** Ian White,2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII In the years after World War I the United Kingdom was desperate to develop some form of protection from an enemy air strike As early as 1923 the British Army had devised sound mirrors that could detect aircraft up to twelve miles away This technical history traces the development of military radar technology from this early experimental phase to the creation of the first air to air radar systems and their uses in battle Historian Ian White sets this fascinating narrative within the larger political military economic and technological context of the era Through World War II Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment particularly members of the Establishment s Airborne Group working under Dr Edward Bowen Their Airborne Interception radars such as the AI Mk IV were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids This in depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War *The Development of British Tactical Air*

Power, 1940-1943 Matthew Powell, 2016-09-10 This book explores the development of tactical air power in Britain between 1940 and 1943 through a study of the Royal Air Force's Army Co-operation Command. It charts the work done by the Command during its existence and highlights the arguments between the RAF and Army on this contentious issue in Britain. Much is known about the RAF both in the years preceding and during the Second World War, particularly the exploits of Fighter Bomber and Coastal Commands, yet the existence of the RAF's Army Co-operation Command is little known. Through extensive archival research, Matthew Powell maps the creation and work of the RAF's Army Co-operation Command through an analysis of tactical air power developments during the First World War and inter-war periods, highlighting the debates and arguments that took place between the Air Ministry and the War Office.

Rearming the RAF for the Second World War Adrian Phillips, 2022-07-28 When the RAF rearmed to meet the growing threat from Nazi Germany's remorseless expansion in the late 1930s, it faced immense challenges. It had to manage a huge increase in size as well as mastering rapid advances in aviation technology. To protect Britain from attack, the RAF's commanders had to choose the right strategy and the right balance in its forces. The choices had to be made in peacetime with no guidance from combat experience. These visions then had to be translated into practical reality. A shifting cast of government ministers, civil servants and industrialists with their own financial, political and military agendas brought further dynamics into play. The RAF's readiness for war was crucial to Britain's ability to respond to Nazi aggression before war broke out, and when it did, the RAF's rearmament was put to the acid test of battle. Adrian Phillips uses the penetrating grasp of how top-level decisions are made that he honed in his inside accounts of the abdication crisis and appeasement to dissect the process which shaped the RAF of 1940. He looks beyond the familiar legends of the Battle of Britain and explores in depth the successes and failures of a vital element in British preparations for war.

The RAF and Aircraft Design Colin S. Sinnott, 2014-05-22 This work examines the evolution of the RAF's operational requirements for its home defence air force, for bombers to mount a deterrent counter-offensive and for fighters to provide direct defence of Britain. It discusses the management processes, policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time. By tracing the development of operational requirements, the author exposes the thinking behind the RAF's quest for effective fighter and bomber aircraft. He describes the ideas and concepts of air warfare that were adopted in the 1920s and shows how these evolved into the Air Staff's requirements for the aircraft which the RAF entered and fought in World War II.

Churchill's Eagles Richard Mead, 2024-06-30 An in-depth overview of the role of the Royal Air Force's leaders during World War II. The RAF did not come of age until the Second World War. The role of its forerunners in the Great War, the Royal Flying Corps and the Royal Naval Air Service, although important, was peripheral to that of the ground forces. The founding father of the RAF, Lord Trenchard, was determined that it should become a fully fledged third service, equal in status to the Royal Navy and British Army, and this he succeeded in doing between the wars, firstly by setting up the RAF College at Cranwell and Staff College at Andover.

and secondly by providing a cost effective policeman of the more rebellious parts of the British Empire By 1939 the RAF had grown substantially but of the three best aircraft of the coming War only the Supermarine Spitfire was in service as neither the Avro Lancaster nor the De Havilland Mosquito would be available until early 1942 Aircraft however were not enough It was the leaders of the RAF the subjects of this book who would take the battle to the enemy and who after six long years would prevail

Land Based Air Power or Aircraft Carriers? Gjert Lage Dyndal,2016-04-22 During the 1960s in the midst of its retreat from empire the British government had to grapple with complex political and military problems in order to find a strategic defence policy that was both credible and affordable Addressing what was perhaps the most contentious issue within those debates this book charts the arguments that raged between supporters of a land based air power strategy and those who favoured aircraft carriers Drawing upon a wealth of previously classified documents the book reveals how the Admiralty and Air Ministry became interlocked in a bitter political struggle over which of their military strategies could best meet Britain s future foreign policy challenges Whilst the broad story of this inter service rivalry is well known the Air Force s proposal for a series of island based airfields and the Navy championing of a small number of expensive but mobile aircraft carriers the complexity and previous lack of archival sources means that it has until now only ever been partially researched and understood Former studies have largely focused on the cancellation of the CVA 01 carrier programme and offered little depth as regards the Royal Air Force perspectives Given that this was a two Service rivalry which greatly influenced many aspects of British foreign and defence policy decisions of the period this book presents an important and balanced overview of the complex issues involved Through this historical study of the British debate about maritime air power and strategic alternatives in the 1960s the detailed arguments used for and against both alternatives demonstrate clear relevance to both historical and contemporary conceptual debates on carrier forces and land based air power Both from military strategy and inter service relationship perspectives contemporary Britain and many other nations with maritime forces may learn much from this historical case

High Stakes Vic Flintham,2008-10-15 After the dust of World War II had settled the military position of the UK was far from straightforward It was of course allied to the USA and part of NATO but it was at odds with the former in maintaining an Empire and the two nations also had competing oil interests in the Middle East The UK s engagement in war after 1945 was thus a strange mixture ranging from homeland security through insular actions within the colonies or protectorates to preserve empire to playing a major role in confronting the USSR The types of active involvement of the RAF Fleet Air Arm and Army Air Corps between 1945 and 1995 include the following with examples Maintaining Local Stability Greece Netherlands East Indies Maintaining Empire Malaya Kenya Defending Empire Borneo Defending Interests Suez Kuwait Homeland Security Northern Ireland air defence Confrontation Berlin Airlift Korea Covert Action Albania strategic reconnaissance Humanitarian and Peacekeeping Jordan Cyprus Development of Deterrent Bombs bombers and missiles

Air Pictorial ,1992 **Allied Air Operations 1939-1940** Jerry Murland,2022-07-20 While much has been

written about the Battle of Britain the air war over France and the Low Countries from September 1939 to June 1940 has been largely neglected until now As expert aviation author Jerry Murland reveals in this fascinating book there may have been little ground action until May 1940 but the war in the air was far from phoney In contrast to their adversaries the Allied air forces on the mainland of Europe were poorly equipped regardless of increased development from 1934 onwards But in spite of this when the German invasion began the Low Countries of Holland and Belgium fought back tenaciously While development of the Spitfire Blenheim and Wellington was continuing at a pace the RAF with only four squadrons of Hurricanes among a force of outdated bi planes was a little more prepared than the French but still woefully outgunned by the Luftwaffe While the Allied air forces of Britain France and the Low Countries may have been inferior the gallantry and tenacity of their pilots makes for inspiring reading This is a work that will enthral and inform all those interested in the history of the Second World War particularly aviation enthusiasts
