Fighting Corruption In Asia: Causes, Effects And Remedies Frank-jurgen Richter, John Kidd, 2003-04-03

Fundamental changes within economies are needed to create arms length relations between governments corporations and banks We are taking risks when investing in the future and risk taking demands openness and truthfulness from the agents we employ If investors and accountants can concur on the degree of disclosure that is morally right we may come to some global agreement on what constitutes corruption but to do this we have to bring together those who advocate profit making with those who see this as usury and we have to care for the future in novel ways unknown in the past so as to allow firms to be locally inefficient apparently while preserving the environment This book looks widely at the prevailing situation in Asia and considers how little some governments are doing to guide their institutions towards probity and transparency While fundamental changes are needed around the globe it is in the developing nations that there is scope for radical change in the near future as their institutions are re created to meet the modern world Once developed and functioning their managers will have the opportunity to facilitate and re direct the institutions in the developed world which happen to be more conservative than their own

methods in political science as well as in economics can be observed the special issue underlines the importance of having a pluralistic approach for grasping the complex and multi layered effects of the phenomenon Of similar importance is the adoption of a comparative perspective that includes different world regions in order to understand the different roles of corruption in developing transforming and developed countries alike Dr Tobias Debiel is Director of the Centre for Global Cooperation Research and of the Institute for Development and Peace INEF Since 2006 he is also Professor in International Relations and Development Policy Institute of Political Science University of Duisburg Essen Dr Andrea Gawrich is Professor for International Integration at the University of Gie en

Economic Analysis of Law in China Thomas Eger,Michael G. Faure,Naigen Zhang,2007-01-01 This book is an exemplary multi disciplinary and multi institutional study of contemporary Chinese law A collective effort by a group of European and Chinese scholars it skillfully tests the relationships between law and economics in the Chinese context The China Journal This is an extremely valuable collection of essays on modern Chinese law viewed through the lens of the law and economics movement China is developing very rapidly and law is now understood to provide the essential framework for economic development provided the law itself is economically rational The essays in this volume are excellent examples of how economics can be used to clarify and guide the law applicable to the essential dimensions of the economy I recommend it wholeheartedly and without reservations Richard A Posner United States Court of Appeals for the Seventh Circuit and University of Chicago Law School US This book brings together important applications of law and economics to China and covers a wide range of issues including such basic concerns as property rights intellectual property and taxation as well as competition law and corporate and securities law Because of its breadth of coverage its focus on the particulars of Chinese law and the expertise of its scholars both Western and Chinese it should serve as a valuable reference work for years to come Steven Shavell Harvard Law School US This book is an important step toward a Chinese scholarship in law and economics written by leading law and economics researchers from China and Europe Hans Bernd Schaefer Universit t Hamburg Germany In China everything is different you cannot apply ordinary economics and the legal framework is

idiosyncratic In the course of time such statements turned out to be prejudices and the Eger Faure Zhang volume makes perfectly clear that for instance a law and economics approach can shed new light into the intricacies and complexities of Chinese institutional arrangements Indeed China creates new puzzles for economic and legal analysis On the other hand however the Chinese need not invent the wheel anew and they do not try it The book shows instances where a sophisticated law and economics approach can help to develop the legal framework which is appropriate for the transition from a planned into a market economy The Chinese economic system is not yet a normal capitalist market economy neither is the legal system adapted to a normal private property economy Nevertheless the chapters of the book apply fruitfully law and economics theories and thus prove their general applicability One of the outstanding achievements of the volume can be seen in the fact that it recruited more than half of its contributors with a Chinese background They learn eagerly western approaches and they learn fast And of course they have no problems with understanding Chinese culture and society So the book combines most profitably the look from the outside and the look from within with a common theoretical framework Hans J rgen Wagener Europa Universit t Viadrina Germany This book comprises contributions on recent developments in China from a law and economics perspective For the first time Chinese and European scholars jointly discuss some important attributes of China s legal and economic system and some recent problems from this particular viewpoint The authors apply an economic analysis of law not only to general characteristics of China s social order such as the specific type of federal competition the efficiency of taxation and regulation and the importance of informal institutions Guanxi but also to distinct areas of Chinese law such as competition policy professional regulation corporate governance and capital markets oil pollution intellectual property rights and internet games The contributors discuss to what extent the law and economic models that have so far been employed within the context of deve

Higher Education in Southeast Asia Anthony Welch, 2011-03-31 This is the first book to systematically chart and comparatively assess the trend towards private higher education in South East Asia Caught between conflicting imperatives of spiralling demand and limited resources the balance between public and private higher education systems in South East South and East Asia has shifted markedly The author's detailed case studies of Indonesia Malaysia Thailand the Philippines and Viet Nam discuss and analyse significant policy issues and touch on key debates surrounding globalisation including economic globalisation and structural adjustment and the pressures of cultural globalisation particularly the role of the English language Debates surrounding the role of higher education in the knowledge economy GATS and cross border trade in educational services are also treated including the rise of offshore campuses in countries such as Malaysia and Viet Nam What is argued is that we are witnessing not merely a changing balance between public and private sectors but a blurring of borders between them with public HEIs now often behaving more like private for profit institutions The book charts and illustrates these trends posing questions about their meaning including issues of transparency equity and what the reforms might mean for traditional conceptions of public good in higher education
