

A pair of hands holds a small, square wooden-framed chalkboard against a solid blue background. The chalkboard has a black surface with the words "You're hired!" written in white, hand-drawn chalk. The text is arranged in two lines: "You're" on the top line and "hired!" on the bottom line. The hands are positioned at the bottom corners of the frame, with fingers visible holding the wood.

## Getting That Job:

*Getting a Job* Mark Granovetter, 2018-06-29 This classic study of how 282 men in the United States found their jobs not only proves it's not what you know but who you know but also demonstrates how social activity influences labor markets. Examining the link between job contacts and social structure, Granovetter recognizes networking as the crucial link between economists' studies of labor mobility and more focused studies of an individual's motivation to find work. This second edition is updated with a new Afterword and includes Granovetter's influential article *Economic Action and Social Structure: The Problems of Embeddedness*. Who would imagine that a book with such a prosaic title as *getting a job* could pose such provocative questions about social structure and even social policy. In a remarkably ingenious and deceptively simple analysis of data gathered from a carefully designed sample of professional, technical, and managerial employees, Granovetter manages to raise a number of critical issues for the economic theory of labor markets as well as for theories of social structure by exploiting the emerging social network perspective. Edward O. Laumann, *American Journal of Sociology*. This short volume has much to offer readers of many disciplines. Granovetter demonstrates ingenuity in his design and collection of data. Jacob Siegel, *Monthly Labor Review*. A fascinating exploration for Granovetter's principal interest lies in utilizing sociological theory and method to ascertain the nature of the linkages through which labor market information is transmitted by friends and relatives. Herbert Parnes, *Industrial and Labor Relations Review*.

The working class in New York City was remade in the mid nineteenth century. In the 1820s a substantial majority of city artisans were native born by the 1850s three quarters of the city's laboring men and women were immigrants. How did the influx of this large group of young adults affect the city's working class? What determined the texture of working class life during the antebellum period? Richard Stott addresses these questions as he explores the social and economic dimensions of working class culture. Working class culture Stott maintains is grounded in

the material environment and when work population consumption and the uses of urban space change as rapidly as they did in the mid nineteenth century culture will be transformed Using workers first person accounts letters diaries and reminiscences as evidence and focusing on such diverse topics as neighborhoods diet saloons and dialect he traces the rise of a new youth oriented working class culture By illuminating the everyday experiences of city workers he shows that the culture emerging in the 1850s was a culture clearly different from that of native born artisans of an earlier period and from that of the middle class as well
