**Clean Technology and the Environment** R. Kirkwood, A. Longley, 2012-12-06 Many environmental problems resulting from atmospheric land and water pollution are now widely understood The combination of both improved technology and legislative pressure has led to a reduction in pollution from industrial practices in the West in recent years However sustainable development is dependent upon a new approach to environmental protection clean technology This book is in two parts The first explores the ecological principles governing the function of ecosystems sustain ability and biodiversity Chapter 1 and the problems resulting from atmospheric pollution Chapter 2 water pollution Chapter 3 and land pollution Chapter 4 For example there is increasing international concern that the combustion of fossil fuels is leading to an increase in the levels of carbon sulphur and nitrogen gases which pollute the atmosphere of our planet The enhanced levels of carbon gases such as carbon dioxide may cause change in our global climate and in turn lead to flooding and loss of low lying coastal regions In addition the deposition of sulphur and nitrogen oxides is believed to be the cause of acid rain which has led to loss of fish stocks from upland lochs and damage to forestry plantations

**Natural Toxic Compounds of Foods** Jiri Davidek, 2018-01-18 This book summarizes the knowledge of naturally occurring toxic and antinutritive food compounds It includes those plants and animals of value or potential value for human nutrition either by direct consumption or indirect as feed for domestic animals Also included are toxic and antinutritive compounds formed from food components during processing and storage as well as the toxic and antinutritive compounds present as natural constituents in raw materials and foodstuffs **FEATURES** Discusses food intolerance inducing compounds toxins and toxic compounds Focuses on the most frequently occurring intolerances Describes the reaction conditions for the formation of these compounds as well as for their degradation Considers nitroso compounds and ethyl carbamate formation

*Food Contaminants* C. Creaser, R. Purchase, 1991-10-01 This book contains contributions based on the proceedings of two symposia on food contamination held in London in April 1989 and May 1990 both of which were organised jointly by the Environment, Food, Chemistry and Toxicology Groups of the Royal Society of Chemistry. The aim of these meetings was to assess the extraneous chemical contamination of food from two sources firstly food chain contaminants the presence of plant toxicants of fungal metabolites in food or the contamination of food from environmental sources airborne aquatic and terrestrial and secondly food production contaminants contaminants of man made origin brought about by a desire to facilitate food production and distribution. The contributors concentrate on the contamination of food by chemicals arising from environmental and food production sources. Chapter 1 is concerned with food chain contaminants present in food as natural components of the diet. This is followed by discussion of the chlorinated dioxins and furans and polycyclic aromatic hydrocarbons. Following an introduction to the control and surveillance of food production contaminants four areas of activity are described migration from food contact materials with particular reference to plastics.
