Spare the Rod Campbell F. Scribner,Bryan R. Warnick,2021-05-11 Spare the Rod traces the history of discipline in schools and its ever increasing integration with prison and policing ultimately arguing for an approach to discipline that aligns with the moral community that schools could and should be In Spare the Rod historian Campbell F Scribner and philosopher Bryan R Warnick investigate the history and philosophy of America s punishment and discipline practices in schools To delve into this controversial subject they first ask questions of meaning How have concepts of discipline and punishment in schools changed over time What purposes are they supposed to serve And what can they tell us about our assumptions about education They then explore the justifications Are public school educators ever justified in punishing or disciplining students Are discipline and punishment necessary for students moral education or do they fundamentally have no place in education at all If some form of punishment is justified in schools what ethical guidelines should be followed The authors argue that as schools have grown increasingly bureaucratic over the last century formalizing disciplinary systems and shifting from physical punishments to forms of spatial or structural punishment such as in school suspension school discipline has not only come to resemble the operation of prisons or policing but has grown increasingly integrated with those institutions These changes and structures are responsible for the school to prison pipeline They show that these shifts disregard the unique status of schools as spaces of moral growth and community oversight and are incompatible with the developmental environment of education What we need they argue is an approach to discipline and punishment that fits with the sort of moral community that schools could and should be Judging School Discipline Richard Arum,2005-09-30
