Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15 Special education is now an established part of public education in the United States by law and by custom. However, it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization, grouping, assessment, placement, funding, instruction, and a variety of legal issues. The purpose of this 13-part, 57-chapter handbook is to help profile and bring greater clarity to this sprawling and growing field. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. Key features include Comprehensive Coverage: Fifty-seven chapters cover all aspects of special education in the United States, including cultural and international comparisons. Issues/Trends: In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research, chapter authors discuss issues related to practice and reflect on trends in thinking. Categorical Chapters: In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV, chapter authors were asked to follow a consistent outline: Definition, Causal Factors, Identification, Behavioral Characteristics, Assessment, Educational Programming, and Trends and Issues. Expertise: Edited by two of the most accomplished scholars in special education, chapter authors include a carefully chosen mixture of established and rising young stars in the field. This book is an appropriate reference volume for anyone—researchers, scholars, graduate students, practitioners, policy makers, and parents—interested in the state of special education today, its research base, current issues and practices, and future trends. It is also appropriate as a textbook for graduate-level courses in special education.

Developing a Schoolwide Framework to Prevent and Manage Learning and Behavior Problems Kathleen Lynne Lane, Holly Mariah Menzies, Wendy Peia Oakes, Jemma Robertson Kalberg, 2019-11-13 Now revised and expanded, this volume explains how to design, implement, and evaluate a comprehensive, integrated, three-tiered Ci3T model of prevention. Rather than presenting a packaged program, the book provides resources and strategies for designing and tailoring Ci3T to the needs and priorities of a particular school or district community. Ci3T is unique in integrating behavioral, academic, and social-emotional components into a single, research-based framework. User-friendly features include tools for collecting and using student and schoolwide data, guidance for selecting effective interventions at each tier, detailed case examples, and tips for enhancing collaboration between general and special educators, other school personnel, and parents. In a convenient, large-size format, the volume includes several reproducible forms that can be downloaded and printed for repeated use. Prior edition title: *Developing Schoolwide Programs to Prevent and Manage Problem Behaviors*. New to This Edition: Updated step-by-step approach reflecting the ongoing development of Ci3T. Chapter

Ball, 2020-03-24 Educational inequalities

have strongly impacted disadvantaged and underserved populations such as indigenous Roma migrant children students with disabilities and those affected by poverty. A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns, dropout rates, disengagement in the school experiences of children and youth traditionally excluded. Research also suggests the negative consequences for child development including cognitive language and social emotional functioning of poverty and lack of quality education in the early years. Consequently the current unequal access to optimal learning environments for every single child to succeed in education and to have a better life perpetuates the exclusion and neglects the right to education for those minorities. This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected. Scholars worldwide are looking for successful actions with children, youth and communities of learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories, empirical evidence and multidisciplinary interventions oriented towards achieving social impact which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of Schools as Learning Communities is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions (SEAs) that is those interventions that improve students' achievement and social cohesion and inclusion in many diverse contexts regardless the socioeconomic, national and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to other contexts, this Research Topic aims at deepening on this approach. In short, our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need.
