Educational Administration:

Educational Administration Robert Palestini, 2005-08-17 Educational Administration Leading with Mind and Heart 2nd edition takes an organization development approach to producing effective leadership Picture yourself standing in the middle of a dense forest Suppose you were asked to describe the characteristics of the forest what types of trees are growing in the forest how many acres of trees are there where are the trees thriving where are they not Faced with this proposition most people would not know where to start and would not be able to see the forest for the trees Newly appointed school administrators often have these same feelings of confusion when faced with the prospect of having to assume a leadership role in a complex organization like a school or school system Where does one start An effective way to start would be to systematically examine the components that make up an organization Such a system of organizational diagnosis and prescription will lead to a comprehensive and integrated analysis of the organization s strengths and weaknesses and point the way toward possible improvement This book suggests such a sequential and systematic approach Utilizing it effectively can produce dramatic and useful results Educational Administration Frederick C. Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson,2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub discipline of political philosophy to the field of educational administration management and leadership It

does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author s decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy Educational Administration in India
