**Gender, Population and Development** Maithreyi Krishna Raj, Ratna M. Sudarshan, Abusaleh Shariff, 1998 One million women are missing from India's population due to female neglect of various sorts and possibly one million more due to acts of direct elimination before birth Within that context this collection employs several field surveys to explore the connections between population gender and development by way of two distinct sets of conditions The first set involves individual endowments the resources that a household will allocate to its women The second set concerns the ways in which the productive and reproductive roles of men and women are structured in societies With the help of theoretical reviews and empirical studies this book illustrates the powerful intermediary effects of gender relations in modifying or reinforcing gender biases *Gender, Population and Development*, 1996\* *Gender and Chinese Development* Lanyan Chen, 2009-02-11 Gender and the three rural problems Gender and industrial reforms from ownership restructuring to social protection Gender and the family planning policy population security free from sex selection Chinese women in decision making from grassroots governance to national politics *Gender Equality and Economic Development* K.P. Yadav, 2006 Highlights the struggle for gender equality led mostly by women but by a growing number of men Considers issues of human progress in the areas of social economic and political life Appends a short version of the recommendations of the National Perspective Plan for Women and the 1974 report of the Committee on the Status of Women in India *Modules on Gender, Population & Rural Development with a Focus on Land Tenure & Farming Systems* Daphne Topouzis, 1996 **The Demographic Transition and Development in Africa** Charles Teller, Assefa Hailemariam, 2011-03-04 The heated Malthusian Bosrupian debates still rage over consequences of high population growth rapid urbanization dense rural populations and young age structures in the face of drought poverty food insecurity environmental degradation climate change instability and the global economic crisis However while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub Saharan Africa are commonplace they are often misleading and belie the socio cultural change that is occurring among a vanguard of more educated youth Even within Ethiopia the second largest country at the Crossroads of Africa and the Middle East different narratives emerge from analysis of longitudinal micro level analysis as to how demographic change and responses are occurring some more rapidly than others The book compares Ethiopia with other Africa countries and demonstrates the uniqueness of an African type demographic transition a combination of poverty related negative factors unemployment disease food insecurity along with positive education health and higher age of marriage trends that are pushing this ruggedly rural and land locked population to accelerate the demographic transition and stay on track to meet most of the MDGs This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition trying to unravel some of the complexities in this vulnerable Horn of Africa country A slowly declining population growth rates with rapidly declining child mortality

very high chronic under nutrition already low urban fertility but still very high rural fertility and high population resource pressure along with rapidly growing small urban places *Gender Population and Development* L. happened in Cairo and how it was achieved The early chapters look in some detail at the preparations for Cairo in the context of over three decades of attempts to integrate population development and environmental issues Focusing on the key controversial questions including abortion contraception and adolescent sex it examines the ways in which attempts were made to reconcile opposing positions Setting the discussion in a much wider context it argues that Cairo witnessed a quantum leap in the way the population issue is seen and the need to give them control over their own lives central to the discussion about population resources and development The Programme of Action which emerged from the conference particularly the parts dealing with gender issues included here in appendices is the most forward looking ever adopted As a whole the Programme is probably one of the most important social documents of our time This book captures both the drama and the detail of its creation Stanley Johnson edited *The Population Problem* 1974 and is the author of *World Population and the United Nations* 1987 and *World Population Turning the Tide* 1994 as well as numerous other books including eight novels Originally published in 1995

**Growth, Development and Poverty Alleviation in the Asia-Pacific** Kartik Chandra Roy, Srikanta Chatterjee, 2007 This volume presents a variety of papers on issues related to growth development and poverty prepared by specialists in their particular development related fields While the living standards of most people around the world have improved over time in absolute terms many are still in desperate poverty The major bulk of humanity lives in the continent of Asia and it is here that some of the more spectacular contrasts in both economic growth and levels of affluence and destitution can be found Whether India and China can continue to grow as fast as they have done in recent years remains to be seen More importantly perhaps whether growth alone can reduce poverty in these countries and in others is a question that needs to be discussed and understood Outside of India and China the African continent particularly the nations in Sub Saharan Africa is home to large numbers of poor and deprived humanity Many of these countries are natural resource rich but that has not enabled many of them to achieve adequate growth and reduce poverty As countries grow they put extra pressure on both global resources and the natural environment The question as to whether there are finite limits to economic growth in a global sense is one that has long exercised thinkers Technological progress has often enabled countries to economise on resource use without sacrificing growth Whether that can continue indefinitely is also a question that has acquired a new urgency with the recent faster growth experience of the most populous countries
