about behavior in the social environment that serves as the theoretical underpinning for direct practice in social work. The chapters explore the ways in which specific theories have contributed to understanding the person in the environment, construct and examine the idea that all clinical social work intervention is anchored in reshaping the context of the person in the environment configuration. The book explores the challenges and limitations of the various theories in use and addresses many relevant questions: What does the theory offer for understanding development across the lifecycle? What does each theory suggest about the interaction among biological, psychological, and sociocultural factors of human development and functioning? What does the theory suggest about healthy, functional and unhealthy, dysfunctional behaviors or wellness? Is theory universal in its application and may it lend itself to cross-cultural social work practice? What role does theory propose for the social worker as an agent of change?
