The Oxford Handbook of the Sources of International Law Jean d'Aspremont, Samantha Besson, Séverine Knuchel, 2017-10-19 The question of the sources of international law inevitably raises some well known scholarly controversies where do the rules of international law come from And more precisely through which processes are they made how are they ascertained and where does the international legal order begin and end This is the static question of the pedigree of international legal rules and the boundaries of the international legal order Second what are the processes through which these rules are made This is the dynamic question of the making of these rules and of the exercise of public authority in international law The Oxford Handbook of the Sources of International Law is the very first comprehensive work of its kind devoted to the question of the sources of international law It provides an accessible and systematic overview of the key issues and debates around the sources of international law It also offers an authoritative theoretical guide for anyone studying or working within but also outside international law wishing to understand one of its most foundational questions This Handbook features original essays by leading international law scholars and theorists from a range of traditions nationalities and perspectives reflecting the richness and diversity of scholarship in this area

The Sources of International Law Hugh Thirlway, 2019-04-04 This new edition of Hugh Thirlway's authoritative text provides an introduction to one of the fundamental questions of the discipline what is and what is not a source of international law Traditionally treaties between states and state practice were seen as the primary means with which to create international law However more recent developments have recognized customary international law alongside international treaties and instruments as a key foundation upon which international law is built This book provides an insightful inquiry into all the recognized or asserted sources of international law It investigates the impact of ethical principles on the creation of international law whether soft law norms come into being through the same sources as binding international law and whether jus cogens norms and those involving rights and obligations erga omnes have a unique place in the creation of international legal norms It studies the notion of general principles of international law within international law's sub disciplines and the evolving relationship between treaty based law and customary international law Re examining the traditional model it investigates the increasing role of international jurisprudence and looks at the nature of international organisations and non state actors as potential new sources of international law This revised and updated book provides a perfect introduction to the law of sources as well as innovative perspectives on new developments making it essential reading for anyone studying or working in international law

The Human Rights Accountability Mechanisms of International Organizations Stian Øby Johansen, 2020-07-16 International organizations are becoming increasingly powerful Today they affect the lives of individuals across the globe through their decisions and conduct Consequently international organizations are more capable of violating the human rights of individuals But how can they be held to account

for such violations This book studies the procedural mechanisms that may hold international organizations to account for their human rights violations It establishes a general framework for identifying analyzing and assessing the accountability mechanisms of international organizations This general framework is then applied to three distinct cases the EU s Common Security and Defence Policy missions refugee camp administration by the UNHCR and detention by the International Criminal Court The overall conclusion is that none of the existing accountability mechanisms across the three cases fulfill the normative requirements set out in the general framework However there are significant variations between cases and between different types of accountability mechanisms

International Criminal Tribunals and Human Rights Law Krit Zeegers, 2016-04-13 This book addresses the interpretation and application of human rights norms by International Criminal Tribunals ICTs Such Tribunals are widely heralded as human rights defenders At the same time however they employ activities that necessary entail the risk of human rights violations they conduct criminal investigations arrest and detain individuals and put them on trial This book investigates this flip side of the ICTs relationship with international human rights law and focuses on the ICTs own interpretation and application of human rights norms First the book addresses whether and how ICTs are bound by human rights law since unlike states they do not sign or ratify human rights conventions Second the book provides an in depth analysis of the way in which ICTs interpret and apply human rights norms compared to the way in which these norms are interpreted in a traditional state context Relying on the unique circumstances in which they operate ICTs have often deviated from generally accepted interpretations of human rights The author critically examines this so called contextual approach and seeks to recommend ways in which ICTs can improve their interpretative practice by giving due regard to the context in which they operate while still providing adequate human rights protection Addressing the ICTs possible leeway in terms of contextualization this book contributes to the broader debates about adherence to human rights norms in international law Krit Zeegers is an Associate at Allen Overy LLP Amsterdam and previously worked as a researcher junior lecturer at the University of Amsterdam

International Law for Humankind Antônio Augusto Cançado Trindade, 2020-03-17 Fully updated and covering the new challenges and dangers which have emerged since publication of the previous edition the new 3rd Edition of International Law for Humankind builds on the revised and adapted text of a General Course on Public International Law delivered by the Author at The Hague Academy of International Law Professor Can ado Trindade develops his Leitmotiv of identification of a corpus juris increasingly oriented to the fulfillment of the needs and aspirations of human beings of peoples and of humankind as a whole With the overcoming of the purely inter State dimension of the discipline of the past international legal personality has expanded so as to encompass nowadays besides States and international organizations also peoples individuals and humankind as subjects of International Law The growing consciousness of the need to pursue universally shared values has brought about a fundamental change in the outlook of International Law in the last decades drawing closer attention to its foundations and parallel to its formal sources to its

material source the universal juridical conscience He examines the conceptual constructions of this new International Law and identifies basic considerations of humanity permeating its whole corpus juris disclosing the current processes of its humanization and universalization Finally he addresses the construction of the international rule of law acknowledging the need and quest for international compulsory jurisdiction in the move towards a new jus gentium the International Law for humankind Elgar Concise Encyclopedia of Space Law Mahulena Hofmann,P. J. Blount,2025-01-09 Providing a comprehensive and timely overview of the evolving landscape of space law this Encyclopedia emphasises the importance of international collaboration in maintaining outer space as a peaceful domain It illustrates how the demise of the bipolar world order changed the paradigm of international legal developments in outer space activities whilst the need to guarantee the security safety and sustainability of space remained unchanged *Chinese Yearbook of Human Rights, Volume 5 (2023)* Huawen Liu,Wei Zhang,2023-10-20 The Chinese Yearbook of Human Rights is a forum for academic exchange between China and the international community in the field of human rights It publishes peer reviewed articles by scholars and practitioners from both within and outside China on human rights issues from the perspectives of law philosophy political science history international relations and other relevant academic disciplines The Yearbook was originally founded in cooperation with the UN Office of the High Commissioner for Human Rights the Raoul Wallenberg Institute of Human Rights and Humanitarian Law and the Chinese Academy of Social Sciences but fell silent from 2008 onwards It now has a new editorial team consisting of internationally based human rights scholars and a team of editors at the Institute for Human Rights of the China University of Political Science and Law and the Center for Human Rights Studies of the Chinese Academy of Social Sciences Volume 5 2023 is the result of that cooperation and focuses on the topical issue of international standards and international monitoring procedures including historical evolution current interpretation and application the monitoring work by both treaty and Charter based bodies and directions for future developments **The Law of Investment Treaties** Jeswald W. Salacuse,2021 In this new edition of an authoritative work in the field Jeswald W Salacuse thoroughly examines the law of international investment treaties particularly with respect to its origins structure content and effects He takes into account all major developments in the law to provide an up to date guide for students scholars and practitioners **State Interest and the Sources of International Law** Markus P. Beham,2018-05-11 This book addresses the disparity between positive non treaty law and its scholarly assessment in the area of moral concepts understood as altruistic as opposed to reciprocal legal obligations It shows how scholars are generously willing to assert the existence of a rule of international law thereby moving further away from actual state practice not taking into account the factors of legal rhetoric and the core survival interests of the state in the formation of custom and general principles of law The main argument is that such moral concepts can simply not manifest themselves as non treaty sources of international law from a dogmatic perspective The reason is the inherent connection between the formation of the non treaty sources of international law and state interest that makes it

difficult if not impossible to assess state practice or opinio juris in the case of altruistic obligations The book further demonstrates this finding by looking at two cases in point Human rights and humanitarian exceptions to the prohibition of force As opposed to the majority of existing works on the subject State Interest and the Sources of International Law takes a bigger picture approach to a number of distinct problems in international law scholarship by looking at the building blocks of international relations on the one hand and merging this with sources doctrine on the other It will be of interest to researchers academics and students in the fields of international law human rights international relations political science legal philosophy and legal theory **ABA Journal** ,1966-09 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association Aviation Law: Cases, Laws, and Related Sources Paul B. Ratner,Jason S.

Abrams, James L. Bischoff, 2009-01-29 This book explores the promises and limitations of holding individuals accountable for violations of international human rights and humanitarian law It analyses the principal crimes under international law such as genocide crimes against humanity and war crimes and appraises both prosecutorial and other key mechanisms developed to bring individuals to justice After applying their conclusions in a detailed case study the authors offer a series of compelling conclusions on the prospects for accountability This fully updated new edition contains expanded coverage of national trials under universal jurisdiction international criminal tribunals including the International Criminal Court new hybrid tribunals in Cambodia and elsewhere truth commissions and lustration It also explores individual accountability for terrorist acts and for abuses committed in the name of counter terrorism policy

Disobeying the Security Council Antonios

Tzanakopoulos, 2013-02-14 This book examines how the United Nations Security Council in exercising its power to impose binding non forcible measures sanctions under Article 41 of the UN Charter may violate international law The Council may overstep limits on its power imposed by the UN Charter itself and by general international law including human rights guarantees Such acts may engage the international responsibility of the United Nations the organization of which the Security Council is an organ Disobeying the Security Council discusses how and by whom the responsibility of the UN for unlawful Security Council sanctions can be determined in other words how the UN can be held to account for Security Council excesses The central thesis of this work is that states can respond to unlawful sanctions imposed by the Security Council in a decentralized manner by disobeying the Security Council s command In international law this disobedience can be justified as constituting a countermeasure to the Security Council s unlawful act Recent practice of states both in the form of executive acts and court decisions demonstrates an increasing tendency to disobey sanctions that are perceived as unlawful After discussing other possible qualifications of disobedience under international law the book concludes that this practice can and should be qualified as a countermeasure

History of International Law · Foundations and Principles of International Law · Sources of International Law · Law of Treaties Sam Stuart, 2014-05-12 History of International Law Foundations and Principles of International Law Sources of International Law Law of Treaties

Introduction to International Environmental Law Timo Koivurova, 2013-12-04 Introduction to International Environmental Law provides a concise overview of international environmental law and the relations and agreements among nations to facilitate environmental protection Beginning by exploring the history nature and sources of international environmental law Professor Koivurova moves on to consider the key principles as well as examining the implementation and effectiveness of international environmental law in practice It considers how international environmental law has developed away from other branches of international law which are heavily based on state sovereignty in order to more effectively facilitate environmental protection and concludes by posing questions about the future of the field Taking a concise accessible approach throughout and employing case studies drawn from a global range of examples this book is the ideal first point of entry to the context

principles and issues of this important subject *Statistical Sources for Social Research on Western Europe 1945-1995*
Franz Rothenbacher, 2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and economic statistics in Western Europe. Although there are many guides, bibliographies and reference books on special topics of this broad theme, a general overview has been missing. With this book, I hope to fill this gap. The frame of reference is a scientific one, enabling and facilitating comparative social research on Western Europe. In some respect, this book enlarges and updates the bibliography written by Peter Flora, *Quantitative Historical Sociology*, published in *Current Sociology* in 1975. In principle, this guide is an annotated bibliography of the most important printed material in the field of official statistics. The legitimacy of such an approach lies in the fact that even today, printed statistics are the most important form of dissemination of statistical results, although microcomputers, CD-ROMs and the Internet have changed this situation. In any case, a special section on statistical databases is included for every country, describing the main databases of the statistical offices. Furthermore, the Internet address of each international or national statistical institute is provided in the introductory paragraph. This enables the reader to get fast access to online databases and supplementary online information on statistics via the Internet. **The Nature of International Law** Miodrag A. Jovanović, 2019-04-25 The Nature of International Law provides a comprehensive analytical account of international law within the prototype theory of concepts. **Sources of International Law** Vladimir Đuro Degan, 1997-05-21 A PARTIES TO A TREATY
