Generalized Phrase Structure Grammar:

Generalized Phrase Structure Grammar Gerald Gazdar, 1985 **Generalized phrase structure grammar : a theoretical synopsis** Gerald Gazdar, 1984 **A Course In Generalized Phrase Structure Grammar GPSG** Paul Bennett, 1995-06-29 The Generalized Phrase Structure Grammar GPSG is a major syntactic theory which has been adopted by the computational linguistics world This text assumes an introductory knowledge of syntactic theory and covers all the main constructs of the grammar Developments in Generalized Phrase Structure Grammar Michael Barlow, Daniel P. Flickinger, Ivan A. Sag, 1982 *Generalized Phrase Structure Grammars, Head Grammars, and Natural Language* Carl Jesse Pollard, 1984 **Generalized Phrase Structure Grammar** Thomas E. Hukari, Robert Levine, 1986 *An Introduction to Generalized Phrase Structure Grammar* Anthony R. Warner, 1992 *Some Aspects of Generalized Phrase Structure Grammar*, 1985 **On the Learnability of a Version of Generalized Phrase Structure Grammar** Thomas L. Maxfield, 1990 **Defining Natural Language in GPSG (Generalized Phrase Structure Grammar's).** Eric S. Ristad, MASSACHUSETTS INST OF TECH CAMBRIDGE ARTIFICIAL INTELLIGENCE LAB., 1986 This paper is a formal analysis of whether generalized phrase structure grammar s GPSG weak context free generative power will allow it to achieve three of its central goals 1 to characterize all and only the natural language grammars 2 to algorithmically determine membership and generative power consequences of GPSGs and 3 to embody the universalism of natural language entirely in the formal system I prove that Sigma is undecidable for GPSGs and on the basis of this result and the unnaturalness of sigma I argue that GPSG s three goals and its weak context free generative power conflict with each other there is no algorithmic way of knowing whether any given GPSG generates a natural language or an unnatural one The paper concludes with a diagnosis of the result and suggests that the problem might be met by abandoning the weak context free framework and assuming substantive constraints **Developments in Generalized Phrase Structure Grammar** Michael Barlow, 1982 **Studies in Generalized Phrase Structure Grammar** Michael L. Geis, 1985 *Generalized Phrase Structure Grammar as a Basis for Parsing and Generation* James Kilbury, 1983 *A New Algorithm for Parsing Generalized Phrase Structure Grammar* Philip Harrison, 1988 *Development in generalized phrase structure grammar* Michael Barlow, 1982 **Some Aspects of Generalized Phrase Structure Grammar** Shin Sedai Konpyūta Gijutsu Kaihatsu Kikō (Japan), S. Amano, T. Gunji, K. Hashida, H. Hirakawa, K. Mukai, H. Shirai, M. Udo, 1985 **Computational Structure of GPSG (Generalized Phrase Structure Grammar) Models: Revised Generalized Phrase Structure Grammar**, 1989 A central goal of mathematical linguistics is to precisely determine the power of a linguistic theory Traditionally formal language theory the Chomsky hierarchy and its generative power analyses have translated this question into the narrower question of how unrestricted the rule format of a theory is Modern computational complexity theory offers another more useful translation how much of what computational resources does a theory consume Complexity theory also offers a new perspective on

descriptive adequacy In a descriptively adequate linguistic theory the structural descriptions and computational power of the theory match those of an ideal speaker hearer The primary goal of this paper is to demonstrate how considerations from computational complexity theory can inform grammatical theorizing To this end the paper revises generalized phrase structure grammar GPSG linguistic theory so that its computational power more closely matches the limited computational ability of an ideal speaker hearer A second goal is to provide a theoretical framework within which to better understand the wide range of GPSG models that have appeared in the theoretical and computational linguistics literature embodied in formal definitions as well as in implemented computer programs **Stanford Working Papers in Grammatical Theory**, 1982

Processing English with a Generalized Phrase Structure Grammar Hewlett-Packard Company. Computer Science Laboratory, J. M. Gawron, J. J. King, J. Lamping, J. J. Loebner, E. A. Paulson, G. K. Pullum, I. A. Sag, T. A. Wasow, 1982 **GPSG (Generalized Phrase Structure Grammar) Recognition Is NP Hard** Eric Sven Ristad, MASSACHUSETTS INST OF TECH CAMBRIDGE ARTIFICIAL INTELLIGENCE LAB., 1985 Proponents of Generalized Phrase Structure Grammar GPSG often cite its weak context free generative power as proof of the computational tractability of GPSG Recognition It is well known that context free languages can be parsed in $O(n^3)$ time by a wide range of algorithms Hence it might be thought that GPSG's weak context free generative power should guarantee that it too is efficiently parsable This widely assumed GPSG efficient parsability result is false A reduction from 3 Satisfiability proves that GPSG Recognition is a function of an input string and a grammar and the GPSG metarule grammar can result in an arbitrarily large finite set of derived context free rules It is further demonstrated that a central object in GPSG theory the metarule inherently results in an intractable recognition problem even when severely constrained The implications for linguistics and natural parsing are discussed Author
