Generosity Of Americans Its Source Its:

American Generosity Patricia Snell Herzog, Heather E. Price, 2016-02-01 American charitable giving veers from the hyperbolically generous to the hyperbolically stingy On some days no one has a quarter to spare in times of disaster Americans will put their lives on hold to build houses for those displaced by hurricanes The crucial question of who gives and why they do it lies at the heart of American Generosity Patricia Snell Herzog and Heather E Price sociologists who focus on philanthropy draw on findings from the groundbreaking Science of Generosity initiative which combines a nationally representative survey of adult Americans with in depth interviews and case studies For most Americans they find the important forms of giving are donating money volunteering time and taking political action Focusing on these three types of activity the authors go on to examine and analyze multiple dimensions of resources social status regional cultural norms different approaches to giving social psychological orientation and the relational contexts of generosity Herzog and Price conclude that giving is supported by circles of generosity which ripple outward in their reach to targets of giving The book offers not just analysis but practical tips for readers who want to increase their own giving for parents modeling giving to their children spouses desiring alignment in their giving and friends and community members seeking to support giving by others The authors also provide explicit fundraising ideas for nonprofits foundations and religious leaders Thought provoking and accessibly written American Generosity lays out a broad yet nuanced explanation of giving that sheds important new light on a topic that touches all of us in one way or another Telethons Paul K. Longmore, 2016 Marshaling two decades worth of painstaking research Paul Longmore's book provides the first cultural history of the telethon charting its rise and profiling the key figures philanthropists politicians celebrities corporate sponsors and recipients involved The Paradox of Generosity Christian Smith, Hilary Davidson, 2014-08-01 Determining why when and to whom people feel compelled to be generous affords invaluable insight into positive and problematic ways of life Organ donation volunteering and the funding of charities can all be illuminated by sociological and psychological perspectives on how American adults conceive of and demonstrate generosity Focusing not only on financial giving but on the many diverse forms generosity can take Christian Smith and Hilary Davidson show the deep impact usually good sometimes destructive that giving has on individuals The Paradox of Generosity is the first study to make use of the cutting edge empirical data collected in Smith's groundbreaking multidisciplinary five year Science of Generosity Initiative It draws on an extensive survey of 2 000 Americans more than sixty in depth interviews with individuals across twelve states and analysis of over 1 000 photographs and other visual materials This wealth of evidence reveals a consistent link between demonstrating generosity and leading a better life more generous people are happier suffer fewer illnesses and injuries live with a greater sense of purpose and experience less depression Smith and Davidson also show however that to achieve a better life a person must practice generosity regularly random acts of kindness are not enough Offering a wide range of vividly illustrative case studies this volume will be a crucial

resource for anyone seeking to understand the true impact and meaning of generosity

The Tyranny of Generosity

Theodore M. Lechterman, 2022 *The Tyranny of Generosity* investigates what democracy demands from philanthropic giving and the policies that structure it. Drawing on political philosophy but addressed to a wide audience, it sheds new light on how philanthropy can both frustrate and facilitate democratic ideals. The author evaluates the respective roles of philanthropy and government public subsidies for private giving, the use of donations for political speech, instruments of perpetual giving, the rise in giving by commercial corporations, and effective altruism as a guide for individual giving. Written accessibly, it is a book for anyone who's ever had mixed feelings about clicking the donate button or thanking a benefactor.

The Difficult Art of Giving Francesca Sawaya, 2014-07-15 *The Difficult Art of Giving* rethinks standard economic histories of the literary marketplace. Traditionally, American literary histories maintain that the post-Civil War period marked the transition from a system of elite patronage and genteel amateurism to what is described as the free literary market and an era of self-supporting professionalism. These histories assert that the market helped to democratize literary production and consumption, enabling writers to sustain themselves without the need for private sponsorship. By contrast, Francesca Sawaya demonstrates the continuing importance of patronage and the new significance of corporate-based philanthropy for cultural production in the United States in the postbellum and modern periods. Focusing on Henry James, William Dean Howells, Mark Twain, Charles Chesnutt, and Theodore Dreiser, Sawaya explores the notions of a free market in cultural goods and the autonomy of the author. Building on debates in the history of the emotions, the history and sociology of philanthropy, feminist theory, and the new economic criticism, Sawaya examines these major writers' careers as well as their rich and complex representations of the economic world. Their work, she argues, demonstrates that patronage and corporate-based philanthropy helped construct the putatively free market in literature. The book thereby highlights the social and economic interventions that shape markets, challenging old and contemporary forms of free market fundamentalism.

Disaster Diplomacy Ilan Kelman, 2011-08-26 When an earthquake hits a war zone or cyclone aid is flown in by an enemy many ask Can catastrophe bring peace Disaster prevention and mitigation provide similar questions Could setting up a flood warning system bring enemy countries together Could a regional earthquake building code set the groundwork for wider regional cooperation This book examines how and why disaster related activities do and do not create peace and reduce conflict Disaster related activities refer to actions before a disaster such as prevention and mitigation along with actions after a disaster such as emergency response humanitarian relief and reconstruction This volume investigates disaster diplomacy case studies from around the world in a variety of political and disaster circumstances from earthquakes in Greece and Turkey affecting these neighbours bilateral relations to volcanoes and typhoons influencing intra state conflict in the Philippines Dictatorships are amongst the case studies such as Cuba and Burma along with democracies such as the USA and India No evidence is found to suggest that disaster diplomacy is a prominent factor in conflict resolution Instead disaster related activities often influence peace processes in the short term

over weeks and months provided that a non disaster related basis already existed for the reconciliation That could be secret negotiations between the warring parties or strong trade or cultural links Over the long term disaster related influences disappear succumbing to factors such as a leadership change the usual patterns of political enmity or belief that an historical grievance should take precedence over disaster related bonds This is the first book on disaster diplomacy Disaster politics interactions have been studied for decades but usually from a specific political framing covering a specific geographical area or from a specific disaster framing As well plenty of quantitative work has been completed yet the data limitations are rarely admitted openly or thoroughly analysed Few publications bring together the topics of disasters and politics in terms of a disaster diplomacy framework yielding a grounded qualitative scientific point of view on the topic **The Red Cross**
