Educating Moral People:

Educating Moral People Nel Noddings, 2002 In this collection of essential essays Nel Noddings examines alternatives to prevailing models of character education a sympathetic approach based on an ethic of care Covering both stories in the classroom and controversial issues in education Noddings describes the similarities and differences between character education and care ethics examines how moral education might be infused throughout the curriculum and calls for greater cooperation across fields and more attention to the practical problems of everyday teaching *Educating Moral Sensibilities in Urban Schools*, 2019-02-11 Nowadays schools face the challenge of creating pedagogical environments that are sensitive to numerous individual backgrounds in order to support students social and academic success Urban schools are communities with rich possibilities to learn how to think feel and act morally In this task principals teachers parents and students of the schools each have their own voice All these voices have to be heard in order to build communities with moral sensibilities This book brings together recent work by international researchers from nine countries in the fields of moral development and citizenship education The book consists of twelve chapters and it is divided into three parts While the first part deals with the voices of urban school educators the second part contains chapters with the focus on students The third part is about curriculum programs and practices in schools that contribute to the education of moral sensibilities in the school communities This book can be used as a textbook in moral and citizenship education or as an updated research report on international research on moral sensibilities *Handbook of Moral and Character Education* Larry Nucci, Darcia Narvaez, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more **The Moral Education Policy System in China** Jian Li, 2024-12-18 This book examines the moral education policy system in China discussing the challenges of promoting moral education policy in the country and proposes relative strategies It explores the moral education policy in China from various perspectives including in preschool education primary education higher education vocational type based higher education secondary vocational education English education music education classroom teaching citizenship education and Chinese language education This book serves as a guide for scholars and researchers who are interested and work in research on moral education policy in China administrators stakeholders in China's education system and graduate students who major or minor in the field of moral education policy in China **Professionals' Ethos**

Moral Education Colin Wrings, 2006-02-14 Casual reference to moral education or the manner in which young people should be brought up to behave may provoke a range of responses depending on the context and the personalities and ideological perspectives of those present In the past these responses sometimes included a Rousseauesque assertion of the inherent goodness of all human beings which only needed to be left to emerge uncorrupted and undistorted with the help of infinite loving kindness on the part of teachers all with the patience of saints More extreme versions of this view may have comprised vehement protest at the very idea of the state through its educational institutions concerning itself at all with such matters which were felt to be properly the province of the family or religious organisations if not a matter of individual choice for young people themselves when they were grown up Explicit proposals for moral education were invariably at risk of being perceived as indoctrination or an abuse of children's rights of freedom and autonomous development More frequently these days the response may be a succinct list of the speaker's own choice moral prescriptions an assertion that these need to be inculcated in a clear and unequivocal way to all young people of whatever age inclination or social experience and often enough a statement of the sanctions to be applied to those who do not or will not conform
