Beyond The Dyad Michael Lewis, 2013-11-22 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last decade or two seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity between those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which will bring together research on infant biology developing infant capacities animal models the impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances will serve these important social and scientific needs *Handbook of Father*

Erzinger, Barbara Reichle, 2017-10-02 The role of the father in a family and for his children has varied greatly throughout history However scientific research into fatherhood began relatively late at the end of the 1960s and early 1970s with a strong focus on the impact of the father on child development This book focuses on the role of the father in the contemporary two parent heterosexual family Of eight longitudinal studies from several Western countries six focus on the socialization outcomes of the children and two concentrate on parental satisfaction Although the father is in focus family dynamics cannot be conclusively described without a look at the mother and parental interaction Therefore all of the studies examine mothers and their role in the family system Thus the book gives a contemporary insight into the father and his role in changing family dynamics This book was originally published as a special issue of the European Journal of Developmental Psychology

Fatherhood, Adolescence and Gender in Chinese Families Qiong Xu, 2017-02-07 Little is known about the roles of fathers in non western cultures Given the changing socio economic and political circumstances of China Xu identifies the importance of investigating Chinese fathers particularly in dual earner families as women's participation in the labour market increases This study of father daughter relationships examines their perspectives on their relationships and identities The book seeks to understand how girls construct their feminine identities as teenage girls and how fathers understand their masculine identities outside the workplace It further explores their family practices and how they negotiate parental authority and adolescent independence Inviting us to think about Chinese people's attitudes family practice emotions and aspirations which constitute a crucial complement to our understanding of the remaking of Chinese society and Chinese lives Fatherhood Adolescence and Gender in Chinese Families focuses on how the widespread social and economic reforms interact with traditional attitudes rooted in Confucianism to provide new contexts for parent child and gender relationships **Families,**

Risk, and Competence Michael Lewis, Candice Feiring, 2014-04-04 The problems of studying families arise from the difficulty in studying systems where there are multiple elements interacting with each other and with the child How should this system be described Still other problems relate to indirect effects namely the influence of a particular dyad's interaction on the child when the child is not a member of the dyad While all agree that the mother father relationship has important

bearing on the child's development exactly how to study this especially using observational techniques remains a problem While progress in studying the family has been slow there is no question that an increase in interest in the family systems as opposed to the mother-child relationship is taking place This has resulted in an increase in research on families and their effects This volume by leading figures in child development on families attests to the growing sophistication of the conceptualization and measurement techniques for getting at family processes The third in a series that aims to address topics relevant to the developmental problems and developmental disabilities of retardation this volume is divided into two parts Section 1 presents basic family processes and approaches for describing family dynamics It deals with these issues from a broad perspective including studying families at dinner families in different cultural contexts and the understanding of family in nonhuman primates Section 2 looks at family processes in the service of studying families at risk The risk factors include poverty malnutrition and developmental delay and retardation The study of family processes in these contexts provides data on family dynamics as well as how these dynamics impact on the children's developing competence This volume will be informative for researchers clinicians and educators from a variety of disciplines and settings The editors aim is to bring a greater clarity to issues concerning the family life of children and highlight new research and possibilities for intervention

DHHS Publication No. (OHDS)., 1981 Selected Readings on Mother-infant Bonding, 1979 Black Fathers Michael E. Connor, Joseph White, 2006-08-15 In the parlance of social psychology social work and urban social scientists African American fathers have often been described as absent missing non-residential non-custodial unavailable non-married irresponsible and immature It is wondered why it is was so difficult to find literature research and comments regarding positive attributes of African American families in general and African American fathers in particular This book fills a void in attempting to offer a broader picture regarding the status of African American males in a father role The purpose is to get beyond the African American father invisibility syndrome and gloom and doom pathology oriented labels and tell another side of the story about the power of fathering in the African American experience The book brings these invisible social and biological fathers to life by telling their stories and letting the reader hear and feel the vibrancy of their voices as they struggle to meet the challenges of being fathers and Black men in America *Black Fathers: An Invisible Presence in America* is divided into four sections Part I offers some research and theory regarding the impact of fathers on the lives of their children In Part II reactions and experiences from those men who had active involved and committed Black men in their lives as they were growing up are shared In Part III stories are shared from African American men who had problematic relationships with their fathers but who put forth the time energy and effort to work through the issues The primary focus of Part IV is on how to strengthen the role of Black fathers father figures and social fathers in family life and child rearing by discovering and internalizing psychological strengths anchored in African American psychological themes African values and spirituality This book will appeal to scholars and researchers in the fields of race ethnic relations family studies and Black

studies **The American Family** Howard Hoffman, 2013-06-29 Several years ago an anonymous donor gave a generous gift to the Department of Psychiatry and Behavioral Sciences at George Washington University School of Medicine The donor suggested that the gift be used to support a conference on the current dilemmas of the American family and to publish its proceedings The current chairman of the department Jerry Wiener formulated the initial plans for the conference with Leon Yochelson who had been chairman at the time the gift was made Dr Yochelson is now Chairman of the Board of the Psychiatric Institute of the District of Columbia These initial discussions led to a significant and sustained collaboration between the Department of Psychiatry and Behavioral Sciences at George Washington and the Psychiatric Institute in planning the conference and the present volume A committee was established to plan the conference It consisted of Peter Steinglass Associate Professor of Psychiatry and George Cohn Professor of Child Health and Development both of George Washington and Margaret Garrett a member of the psychiatric staff at the Psychiatric Institute The committee was jointly chaired by the editors of this volume The committee received indispensable assistance from members of the administrative staff of the Psychiatric Institute Al Bruce Carol Klein and Miriam Mathura Margaret Schnellinger of the Center for Family Research George Washington University was also very helpful in all phases of planning the conference **Fatherhood and Family Policy** Micheal. E. Lamb, Abraham Sagi, 2014-02-25 First published in 1984 In the last two decades countries throughout the Western world have witnessed dramatic changes in social attitudes concerning sex roles The aim of this book is to review the evidence concerning a the factors that limit or constrain male involvement in child care b the ways in which some of these factors are being or might be changed and c the effects of traditional and increased paternal involvement on men women and children *Fatherhood (Routledge Revivals)* Brian Jackson, 2012-11-12 First published in 1984 this groundbreaking title explores the concept of fatherhood by following a hundred men who become fathers for the first time The book is addressed to men who are discovering fatherhood and to women who wish to hear what a man feels and thinks about having a child Many men experience the strange problems of the male *couvade* They have everything from mysterious back ache to inexplicable stomach pains Later they frequently find that the white coated professionals shut the door on their doubts and needs and their shy search for information Brian Jackson's book cautiously explores changing attitudes to fatherhood emerging at the time of the book's initial publication In recent years we have gone through a unique revolution in man's experience of woman and child There is surprise at the costs and demands of parenthood so much so that both parents may move from a honeymoon phase of parenthood into the birth of the blues Previously this has been thought of as a female hormonal readjustment but since men speak of identical symptoms this study suggests that at the roots lies the strain of unprepared parenthood The traditional father is still there showing off his medals his tattoos his rugby triumphs and his unconcern for the gentler aspects of life So is the man who simply hunts in the economic jungle and expects his home to service him But most of these men now waver and hedge their bets They look at their child as they return from their working

day or as they slump into unemployment and wonder if they could be more positive more creative more licensed to care
