### **Supply Chain Engineering**

Alexandre Dolgui, Jean-Marie Proth, 2010-06-02 Supply Chain Engineering considers how modern production and operations management techniques can respond to the pressures of the competitive global marketplace. It presents a comprehensive analysis of concepts and models related to outsourcing, dynamic pricing, inventory management, RFID, and flexible and reconfigurable manufacturing systems, as well as real time assignment and scheduling processes. A significant part is also devoted to lean manufacturing, line balancing, facility layout, and warehousing techniques. Explanations are based on examples and detailed algorithms while discarding complex and unnecessary theoretical minutiae. All examples have been carefully selected from an industrial application angle. This book is written for students and professors in industrial and systems engineering, management science, operations management, and business. It is also an informative reference for managers looking to improve the efficiency and effectiveness of their production systems.

### **Local Dynamics of Industrial**

**Upgrading** Yi Liu, 2020-04-27 This book examines industrial upgrading in China's Pearl River Delta (PRD) with a specific focus on how strategic coupling impacts industrial upgrading from the perspective of relational economic geography. It shows that firms in the PRD have been struggling after serving as low-tier suppliers and subcontractors for transnational corporations for two decades since the 1980s opening reform in China. Indigenous innovation and direct state support have fostered the success of a few firms but not the majority. In response, many local firms are now taking advantage of the opportunities to be found in global production networks which link the PRD with the global economy. This book elaborates on how these opportunities are embedded and identified in global production networks with regard to different types of strategic coupling. It not only renews the theory of strategic coupling in economic geography but also demonstrates potential strategies that latecomer firms can pursue and which can have major implications for many developing countries and regions.
