Prepared by the East Asian Institute NUS which promotes research on East Asian developments particularly the political economic and social development of contemporary China including Hong Kong and Taiwan this series of research reports is intended for policy makers and readers who want to keep abreast of the latest developments in China This volume looks at China's foreign policy from the perspective of learning theory a relatively new approach to foreign policy analysis based on social psychology *Hong Kong In China: Perspectives From The Region* Andrew M Marton, 1999-09-30 This book presents a unique array of insights into Hong Kong's transition to China since the 1 July 1997 handover from several perspectives around the region Scholars from China Taiwan Singapore Indonesia Malaysia Thailand and New Zealand undertake an analysis and synthesis of particular regional viewpoints on the transfer of sovereignty Each contribution is positioned in relation to the three interconnected themes of economic transformation political and legal developments and identity which run through the volume The sometimes contradictory and provocative insights highlighted by the authors emphasize the inherent complexities of Hong Kong's transition and the range of alternative regional perspectives it engenders **The**

**Waning of the Jiang-Zhu Coalition?** John Wong, Yongnian Zheng, 2000 With mounting discontent due to widespread unemployment corruption and misgovernment the Ninth National People's Congress in March 2000 was a letdown Significant though was Premier Zhu Rongji's announcement at the Congress of the leadership's decision to go west While Zhu explained the policy shift as the government's attempt to develop the country's inland regions many are skeptical dismissing it as a camouflage for the premier's failure in the reform programmes introduced when he came to power On the international front with the US ambivalence in regard to China's WTO accession and China's apparent loss of grip on cross straits relations the future of the Jiang leadership appears to be in the balance Against this background of neiyau waihuan internal disturbance and external threats will the Jiang Zhu coalition be able to rise to the occasion and push through its

many reform programmes let alone retain its hold on power China After the 2000 National People's Congress I and II address this and related questions giving an in depth analysis of recent developments and changes in the power relations among China's top leaders especially the Jiang Zhu coalition      **Taiwanisation** George Woei Tsai, Peter Kien-hong Yu, 2001 Recent years have seen the emergence of a unique Taiwanese consciousness What this so called Taiwanisation is and how it came about are addressed in the first article The evolution of this Taiwanese consciousness and how it is perceived and presented by major political parties like the Democratic Progressive Party the Kuomintang the People First Party and the New Party are then discussed The process appears to be an irreversible one which might lead to Taiwan's self determination The second article offers a working definition of Taiwanisation It then spells out the significance of understanding Taiwanisation and the motivations of the proponents of the Taiwanisation policy A number of reasons are given as to why such a policy is necessary The authors examine the strategies and tactics in implementing the Taiwanisation policy weighing its effectiveness Beijing's reaction and the problems and prospects of pursuing this policy      **Bureaucracy and Administration** Ali

Farazmand, 2009-06-23 Bureaucracy is an age old form of government that has survived since ancient times it has provided order and persisted with durability dependability and stability The popularity of the first edition of this book entitled Handbook of Bureaucracy is testimony to the endurance of bureaucratic institutions Reflecting the accelerated globalizatio

**China's Political And Economic Trends In 2001** John Wong, Yongnian Zheng, 2001-06-21 At the beginning of the new century China's leadership is preparing the ground for a smooth transfer of power from the third generation to the fourth generation leaders Politicking among different factions has intensified as top leaders who are slated to step down after the 16th National Party Congress in 2002 jockey to put their imprint on the new power configuration How have President Jiang Zemin and Premier Zhu Rongji dealt with the leadership succession while at the same time keeping an eye on the economy What kind of power sharing will be brokered among the different factions Are the fourth generation leaders ready to take over the reins of power And will China be able to maintain high growth even as it goes through this period of power transition The articles in this publication address those issues      People's Republic of China, Volumes I and II Frank N.

Pieke, 2023-12-31 This title was first published in 2002 This two volume set collects in a conveniently accessible form the most influential articles by leading authorities in the study of China It provides an international reference work combined with an authoritative introduction by the editor      **We are not WEIRD: Chinese Culture and Psychology** Yung-Jong

Shiah, Kwang-Kuo Hwang, 2024-03-19 In recent years interest in research on Chinese culture and psychology has increased rapidly However most research paradigms based on samples from Western Educated Industrialized Rich and Democratic WEIRD societies including theories methods and research procedures may become maladaptive or weird once moved to other societies Thus we aim to focus on this emergent movement of scholars working on the dialogue and interaction between Chinese culture and psychology to explore the most contemporary modes of Chinese philosophical religious and

spiritual thoughts and practices emphasizing their significant application to current psychological research Taking an eclectic approach to study on human values health and well being this Research Topic hopes to publish original research articles that deal with mental and physical health issues by integrating the contribution from Chinese traditions *China's Regional Economic Disparities Since 1978* Xiaowen Tian,1999 Prepared by the East Asian Institute NUS which promotes research on East Asian developments particularly the political economic and social development of contemporary China including Hong Kong and Taiwan this series of research reports is intended for policy makers and readers who want to keep abreast of the latest developments in China This study suggests that China should accelerate economic growth of its backward interior regions by deepening market oriented reforms on the one hand and by strengthening fiscal transfers from richer to poorer regions on the other China in the Twenty-First Century S. Hua,S. Guo,2007-08-20 In this edited volume leading scholars from US and China analyze the challenges and opportunities for China in the 21st century each emphasizing particular dimensions of politics economics political culture and foreign policy Issues examined include social harmony and statecraft media and political culture and legality in foreign trade China's WTO Accession and the Impact on Its Large Manufacturing Enterprises Guy Shaojia Liu,2001 The greatest success of Chinese enterprise reform has been the creation of market competition Competition has forced the state to retreat from non strategic sectors and increased private ownership in the industry This development has created ownership diversification in the Chinese industry which is in line with the leadership's 2 R Retreat and Retain enterprise reform policy The ownership diversification is a distinction of the reformed economy called a socialist economy with Chinese characteristics The backbone of the economy is the large state firms in strategic sectors largely shielded from international competition in which most of them have been coping well with the domestically competitive environment After China's entry to the WTO can these firms still maintain their market dominance once all forms of protection are dismantled Are Chinese firms ready for direct competition with their foreign rivals in the manufacturing sector Will FAW China's No 1 state owned automotive corporation be defeated on its home ground by its foreign rivals in a freely accessed market The core of these questions is about the sustainability of diversified ownership in the economy after it is integrated with the world trading system Who will dominate the Chinese industry after the WTO entry foreign or private ownership The question is addressed by applying the market structure and entry theory of industrial economics since WTO accession will basically result in change in both the market type and the market structure of the industry Based on this the study developed the market share testing theory to assess the competitiveness of dominant incumbents according to the type of market The overall finding is that most large state incumbents will survive but their survival strategy will be changed from single ownership control to mixed ownership control Thus it is expected that more joint ventures between foreign and large state owned firms will emerge in the post WTO entry economy But whether such firms will evolve into foreign controlled state owned firms is an interesting question which remains to be answered

China's Politics and Economy in 1999 Yongnian Zheng, John Wong, 2000 What the Jiang Zemin leadership faced in 1999 can be characterized by a century old Chinese saying neiyou waihuan literally internal disturbance and external threat What with the worst growth record in a decade the Falun Gong sect's siege of Zhongnanhai NATO's bombing of the Chinese embassy in Yugoslavia and Lee Teng hui's new two state theory the Chinese leadership was under tremendous pressure throughout the year Many have wondered if that leadership could still hold its own at the turn of the century This volume provides the reader with an in depth analysis of how the Chinese leadership coped with the crises during the year Though there was fair success in managing those crises serious crises lie ahead which could significantly impact the leadership China's economic slowdown may be bottoming out but increasing Party decay a growing spiritual vacuum and volatile cross strait relations are likely to pose serious threats to the leadership

**Value Changes And Regime Stability In Contemporary China** Wei Shan, 2020-11-04 This book provides a comprehensive examination of value changes of Chinese citizens especially the younger generation and how the Chinese authorities take efforts to adapt to such changes and refine its social control mechanisms The book discusses three related themes through a series of topics The first theme examines the changes in political attitudes and values among Chinese youths comparing them to the older generations in the mainland and their contemporaries in Hong Kong and Taiwan The second theme focuses on the recent development of social unrests new pursuits that emerged in the Chinese society and new means adopted by the Chinese protestors The third theme touches on the responses of the party state under the Xi Jinping administration and how it has sophisticatized the machine of social control With these three themes this book also adds on to the understanding of regime stability of the Communist system in China and how this system handles a variety of challenges brought about by dramatic social changes

**Mystery Of China's Falun Gong, The: Its Rise And Its Sociological Implications** John Wong, William T Liu, 1999-12-15 The Party and state leadership in Beijing was rudely awakened to the fact that the state bureaucracies in charge of public security had no idea of Falun Gong's leadership and its functions on April 25 1999 when reportedly ten thousand followers in front of Zhongnanhai staged a peaceful and quiet sit in Since then the world media has reported events and probable causes for the government to outlaw what was determined to be a religious cult that could disturb peace and stability in China In this paper analyses are made of the background and political implications of the sect that had one time dominated the front page of all major newspapers in the world The authors address themselves to questions such as What is the nature of Falun Gong Is it a religious sect a cult or a quasi religious social movement with a hidden political agenda Is it traditional qigong of a sort that packages well established belief systems of Buddhism and Taoism Is it a money making scheme that satisfies the yearning for spiritual fulfillment for the elderly the unemployed and the retired Or is it all of those Will the Falun Gong phenomenon repeat itself in the future Was the government crackdown an over reaction or was it expected These issues are discussed by the authors in separate sections of this paper

Kazakhstan and the Soviet Legacy Jean-François Caron, 2019-03-26 This

book examines Kazakhstan's struggle to distance itself from its Soviet past over 25 years after its independence. To a very large extent the affirmation of its sovereignty and a unique Kazakhstani way remain largely a matter of rhetoric. This book looks to explain the various aspects that show the continuity of Kazakhstan's political system and governance with its colonial legacy namely through its foreign policy the country's environmental policies the judicial system the management of religious diversity the way youth organizations are structured and administered or how those who were born after the collapse of Soviet Union are still showing a typical Soviet behavioral attitude towards the political sphere. What are the reasons for this reluctance or incapacity to break away from these ties of the past? Will the unavoidable political transition that will bring new individuals to the head of the state contribute to a real change? Will this lead to a break with the country's past and a radical shift in the country's policies or will things remain as they have been since 1991? This book provides some valuable insights on what may happen in the near future to the biggest country of Central Asia.

**China's Generation Gap** Jiaming Sun, Dongmei Cheng, 2018-01-12 Based on data collected for the Generation Gap Survey in Shanghai and updated to take into account contemporary trends this book uses an empirical approach to study the generation gap in China. It covers various aspects of life from professional and family life to political participation and belief systems analysing and comparing the values held by four different generations. Encompassing more than 2000 case studies and drawing on a wealth of fieldwork interviews in particular it examines the experiences thoughts and perceptions of adolescents young adults the middle aged and the elderly. As the largest sociological survey ever conducted regarding attitudes and value changes by different age groups in Shanghai it highlights how social change and globalization have impacted on new generations and the results indicate the dramatic difference and supersession of social ideologies between the generations. A unique piece of research shedding light on a changing Chinese society China's Generation Gap will be of huge value to students and scholars of Chinese culture and society Chinese social policy globalisation and cultural studies.

*Rural Democracy In China* Tianjian Shi, 2000-02-21 Why does the Chinese government allow village elections? What implications do these grass roots level popular elections have for the democratization of China? By tracing the history of village level governance reform one of the premier authorities on electoral reforms in China tackles these fundamental questions in this volume. According to the author there are two roots to the emergence of village elections in China structural changes in the village economy and bureaucratic politics. The author also identifies old guard Peng Zhen himself victimized by lawlessness during the Cultural Revolution and officials in the Ministry of Civil Affairs an otherwise powerless bureaucracy that has jurisdiction over rural governance issues as the driving force behind the reform in the government. The author believes that village elections have enormous political implications for China they represent yet another aspect of creeping democratization of the country. Resistance from the status quo interests will be stiff but democracy has a chance in the alliance between the disgruntled population and reform minded elites in the leadership. Does economic prosperity increase the likelihood of political democracy? Using 1993 national

survey data the author examines the relationships between the level of economic development and the rate of semi competitive village elections Data analysis suggests that economic prosperity is positively associated with the occurrence of semi competitive elections only to a certain point above which the association turns negative In other words both the least and the most developed villages are less likely to hold semi competitive elections for the chair of the village committee which is officially defined as an organization of self governance of villagers The author also argues that rapid economic development may delay the process of political development because incumbent leaders can use newly acquired economic resources to consolidate their power

**Understandings of Democracy** Jie Lu, Yun-han Chu, 2021-12-14 Understandings of Democracy examines why democracy is in trouble in today s world even when most people profess to love democracy Jie Lu and Yun han Chu argue that people hold distinct understandings of democracy and popular understandings of democracy have critically shaped how citizens respond to authoritarian or populist practices in contemporary politics Using large scale comparative surveys and survey experiments from seventy two societies and a national survey in the United States this book captures how people respond when presented with the tradeoffs between the intrinsic and instrumental values of democracy as well as the attitudinal and behavioral implications of such responses
