Generational Policy Cairoli Lectures:

Generational Policy Laurence J. Kotlikoff, 2003-11-07 How generational policy affects the sustainability of a government's fiscal policy In these eight 2002 Cairoli Lectures presented at the Universidad Torcuato di Tella in Buenos Aires Argentina Laurence Kotlikoff shows how generational policy works how it is measured and how much it matters Kotlikoff discusses the incidence and measurement of generational policy the relationship of generational policy to monetary policy and the vacuity of deficits taxes and transfer payments as economic measures of fiscal policy Kotlikoff also illustrates generational policy's general equilibrium effects with a dynamic life cycle simulation model and reviews the empirical evidence testing intergenerational altruism and risk sharing The lectures were delivered as Argentina faced a devastating depression triggered in large part by unsustainable generational policy Throughout the book Kotlikoff connects his messages about generational policy to the Argentine situation and the Argentine government's policy mistakes **Lectures on Antitrust**

Economics Michael D. Whinston, 2008-01-25 Antitrust law regulates economic activity but differs in its operation from what is traditionally considered regulation Where regulation is often industry specific and involves the direct setting of prices product characteristics or entry antitrust law focuses more broadly on maintaining certain basic rules of competition In these lectures Michael Whinston offers an accessible and lucid account of the economics behind antitrust law looking at some of the most recent developments in antitrust economics and highlighting areas that require further research He focuses on three areas price fixing in which competitors agree to restrict output or raise price horizontal mergers in which competitors agree to merge their operations and exclusionary vertical contracts in which a competitor seeks to exclude a rival Antitrust commentators widely regard the prohibition on price fixing as the most settled and economically sound area of antitrust Whinston's discussion seeks to unsettle this view suggesting that some fundamental issues in this area are in fact not well understood In his discussion of horizontal mergers Whinston describes the substantial advances in recent theoretical and empirical work and suggests fruitful directions for further research The complex area of exclusionary vertical contracts is perhaps the most controversial in antitrust The influential Chicago School cast doubt on arguments that vertical contracts could be profitably used to exclude rivals Recent theoretical work to which Whinston has made important contributions instead shows that such contracts can be profitable tools for exclusion Whinston's discussion sheds light on the controversy in this area and the nature of those recent theoretical contributions Sponsored by the Universidad Torcuato Di Tella

Mainstreaming Ageing Asghar Zaidi, 2017-09-29 The Madrid International Plan of Action on Ageing MIPAA adopted at the Second World Assembly on Ageing is the first international agreement that specifically recognises the potential of older people to contribute to the development of their societies In monitoring its implementation two key approaches are evident a qualitative bottom up participatory approach and an approach that uses quantitative indicators to monitor sustainable progress and policies With the European Centre for Social Welfare Policy and Research playing a pivotal role in the

monitoring of the implementation process one of its key tasks has been to develop a list of indicators of achievement This book contains extended and revised versions of policy briefs and background papers that support the implementation monitoring process The analyses included in these chapters make concrete suggestions towards quantitative indicators with the aim of assisting national governments in mainstreaming ageing in their policies The contributors provide an overview of the current situation with respect to population ageing and its consequences and also provide projections for the future The book also includes the final list of quantitative indicators that arose out of consultations with international experts related to the four main topics addressed demography income and wealth labour market participation and social protection and financial sustainability

Welfare in an Idle Society? Bernd Marin, 2017-10-24 The modern welfare state is indeed one of the greatest achievements of the post war 20th century With its key aims of eradicating the five giant social ills of Want Ignorance Disease Squalor and Idleness it aimed to providing a minimum standard of living with all people of working age paying a weekly contribution in return benefits would be paid to anyone who was sick unemployed retired or widowed The modern welfare state therefore is about maintaining a delicate equilibrium between dependent social groups on the one hand and the active working classes on the other In the case of old age security this balance is being achieved or not by the so called Generation Contract This social pact is more of an implicit unwritten and unspecified social contract This ground breaking book demonstrates how countries are addressing population ageing challenges in depth using the case study of Austria to gain the required complexity and differentiation in a comparative European framework of empirical evidence This is a broad social science study in political economy and sociology not an economic analysis Though focusing on pensions it centres on the im balance between work and non work issues of health work ability employability and benefit receipt from old age security to disability allowance It will be required reading for all sociologists and social policy experts and academics working within this area

Global Imbalances and the Lessons of Bretton Woods Barry Eichengreen, 2010-01-22 Why the current Bretton Woods like international financial system featuring large current account deficits in the center country the United States and massive reserve accumulation by the periphery is not sustainable In Global Imbalances and the Lessons of Bretton Woods Barry Eichengreen takes issue with the argument that today s international financial system is largely analogous to the Bretton Woods System of the period 1958 to 1973 Then as now it has been argued the United States ran balance of payment deficits provided international reserves to other countries and acted as export market of last resort for the rest of the world Then as now the story continues other countries were reluctant to revalue their currencies for fear of seeing their export led growth slow and suffering capital losses on their foreign reserves Eichengreen argues in response that the power of historical analogy lies not just in finding parallels but in highlighting differences and he finds important differences in the structure of the world economy today Such differences he concludes mean that the current constellation of exchange rates and payments imbalances is unlikely to last as long as the original Bretton Woods System Two of the most

salient differences are the twin deficits and low savings rate of the United States which do not augur well for the sustainability of the country's international position. Such differences he concludes mean that the current constellation of exchange rates and payments imbalances is unlikely to last as long as the original Bretton Woods System. After identifying these differences Eichengreen looks in detail at the Gold Pool, the mechanism through which European central banks sought to support the dollar in the 1960s. He shows that the Pool was fragile and short lived which does not bode well for collective efforts on the part of Asian central banks to restrain reserve diversification and support the dollar today. He studies Japan's exit from its dollar peg in 1971, drawing lessons for China's transition to greater exchange rate flexibility. And he considers the history of reserve currency competition, asking if it has lessons for whether the dollar is destined to lose its standing as preeminent international currency to the euro or even the Chinese renminbi. *Journal of Economic Literature*, 2004

The Graphic, 1889. **American Psychology** Cairolì Gigliotti, 1936. **The Problem of Generations** Martin Kohli, 1996. **Fractured Generations** Allan C. Carlson, 2018-02-05. Fifty years ago the phrase family policy was rarely heard in America. Individual states maintained laws governing marriage, divorce, education, inheritance, and child protection which regulated the formation, childrearing practices, and dissolution of families. However, these scattered policy issues were not seen as closely related. Until the 1960s the nuclear family was an institution that was part of the natural life course expected of most adults. Family meant marriage, children, the establishment of a home, care of the elderly, but perhaps most of all, bonding of the generations. As early as the 1840s certain elements of state policies hinted at a weakening family structure, but not until the 1960s was the family openly attacked. Feminists objected to a male-oriented home economy; demographers encouraged negative population growth; the sexual revolution was on the rise, and religiously grounded morality in public life was challenged in the federal courts. Married couples with children had to shoulder a larger tax burden, further discouraging people from building and maintaining families. Perhaps because family was so central to the founders' lives, they found no need to mention it in the Constitution. But today, generational bonds have fractured while family policy is a paramount public

concern As Allan Carlson makes clear no nation can progress or even survive without a durable family system Contemporary family policy represents an attempt to counter the negative forces of the last four decades so as to restore the natural family to its necessary place in American life Fractured Generations chapters follow the life course of the human family marriage the birth of children infant and toddler care schooling building a home crafting a durable family economy and elder care This is a passionate and well reasoned appeal for a return to the institution that is the last best hope for America s future the family
