Homelessness Kennett, Patricia,Marsh, Alex,1999-09-15 The issue of homelessness has become extremely important in policy debates during the 1990s Yet analysis that links the phenomenon of homelessness to wider debates about the changing social and economic environment remains relatively underdeveloped This important new book brings together contemporary theoretical debates and original empirical research in order to explore the nature experience and impact of social change in the new landscape of precariousness in which new sets of risks and uncertainties have emerged It adopts a multi disciplinary approach which is essential in developing a more subtle understanding of both the complex processes leading to and the experience of homelessness Central to contemporary theory and practice is the enhancement of our understanding of how homelessness disadvantage and social exclusion impact differently on various social groups Homelessness provides a strong contribution to the academic debate and is essential reading for students and researchers in a range of subject areas including housing studies social policy socio legal studies and public administration Australian national bibliography
