**New Approaches to Governance and Rule in Urban Europe Since 1500** Simon Gunn, Tom Hulme, 2020-03-31 Urban power and politics are topics of abiding interest for students of the city

This exciting collection of essays explores how Europe's cities have been governed across the last 500 years. Taken as a whole, it provides a unique historical overview of urban politics in early modern and modern Europe. At the same time, it guides the reader through the variety of ways in which power and governance are currently understood by historians and new directions in the subject. The essays are wide-ranging, covering Europe from Scandinavia to the Mediterranean, Russia to Ireland, between 1500 and the twentieth century. Each chapter employs a specific case study to illuminate a way of examining how power worked in regard to topics such as women, popular culture, or urban elites. A variety of approaches are deployed, including the study of ritual and performance, morality and conduct, governmentality, and the state infrastructure and the individual. Reflecting the state of the art in European urban history, the book is essential reading for anyone interested in the study of urban politics and government. It represents a fresh take on a rich subject and will stimulate a new generation of historical studies of power and the city.

*Urban Governance* Robert J. Morris, Richard H. Trainor, 2017-07-05

This is a coherent and integrated set of essays around the theme of governance, addressing a wide range of questions on the organisation and legitimation of authority. At the heart of the book is a set of topics which have long attracted the attention of urbanists and urban historians all over the world: the growth and reform of urban local government, local centre relationships, public health and pollution, local government finance, the nature of local social life, and of participation in local government. Approaching these topics through the concept of governance not only raises a series of new questions but also extends the scope of enquiry for the historian seeking to understand towns and cities all over the world in a period of rapid change. Questions of governance must be central to a variety of enquiries into the nature of the urban place. There are questions about the setting of agendas, about when a localised or neighbourhood issue becomes a big city or even national political issue, about what makes a problem. Public health and related matters form a central part of the issues, especially for the British in North America. Fire and the development of urban real estate have dominated in India; the security of the colonial government had a prominent place. The historical dynamic of these essays follows the change from the chartered governments of the seventeenth and eighteenth centuries towards the representative regimes of the nineteenth and twentieth. However, such historical change is not regarded as inevitable, and the effects of bureaucratic growth, regulatory regimes, the legitimating role of rational and scientific knowledge, as well as the innovative use of ritual and space, are all dealt with at length.
