A teaching and training cycle is a repetition process which help the teacher to asses the student needs. **There are various stages in teaching cycle which is described below:**

- **Study** – Gaining the knowledge from various sources is the main job responsibility of the teacher. In business project management the knowledge of the market is very important. The main focus of myself is to implement this cycle and help the students to understand the basic market needs.
- **Select** – This is the most important in which selection of the topic plays an important role. I choose the topic specifically for the students and present that in an effective manner which helps them to understand it effectively.
