Edisons Conquest Of Mars:

Edison's Conquest of Mars Garrett Putnam Serviss, 2016-09-28 Edison's Conquest of Mars is an 1898 science fiction novel by American astronomer and writer Garrett P. Serviss. It was written as a sequel to *Fighters from Mars*, an unauthorized and heavily altered version of H. G. Wells's *The War of the Worlds*. It has a place in the history of science fiction for its early employment of themes and motifs that later became staples of the genre. The book features Thomas Edison as the primary character, though neither Edison nor H. G. Wells were involved in its creation. Set after the devastating Martian attack in the previous story, the novel depicts Edison leading a group of scientists to develop ships and weapons, including a disintegration ray for the defence of Earth. Edison and company fight the aliens in space and on Mars, eventually causing a flood that defeats the enemy and forces an end to hostilities. Serviss wrote himself into the story as a professor whom Edison consults; also appearing are scientists such as Edward Emerson, Barnard Lord, Kelvin, Wilhelm Röntgen, and Silvanus P. Thompson, and heads of state such as Queen Victoria, U.S. President William McKinley, Kaiser Wilhelm II, and Emperor Mutsuhito.

Edison's Conquest of Mars (Esprions Classics) Garrett P. Serviss, 2006 **Edison's Conquest of Mars** Garrett Serviss, 2012-08-03 The ancient astronaut theory has a long and winding history based in large measure on the fertile interaction of speculative fiction and speculative history. Its roots can be traced to Victorian era pseudoscience, including Theosophy, speculation about the existence of Atlantis, and mystical investigations of the Great Pyramid of Egypt. Science fiction played its role too. Sometimes too well. Edison's *Conquest of Mars* (1898) drew on all of these themes to deliver one of the earliest science fiction stories to present extraterrestrial beings as ancient astronauts. In the novel, Martians came down to the earth in prehistory, built the pyramids and the Sphinx, and abducted humans to use as slave labor. All claims suggested in the work of twentieth-century ancient astronaut theorists. Serviss' novel may not have inspired the ancient astronaut genre, but it is a fascinating example of how the ideas available in popular culture repeatedly combined to produce the same idea time and again.

Serviss first attempted to publish the book serially in the *New York Journal*. Serviss went on to write other science fiction stories, arguably making him the first American to write science fiction professionally.

An early example of what would later be called space opera, Edison's Conquest of Mars was also a particularly literal Edisonade. The book contains some notable firsts in science fiction: alien abductions, spacesuits called air-tight suits (see *Spacesuits in fiction*), aliens building the Pyramids, space battles, oxygen pills, asteroid mining, and disintegrator rays.
