News under Fire Shuge Wei, 2017-09-05 *News under Fire* China's Propaganda against Japan in the English Language Press 1928-1941 is the first comprehensive study of China's efforts to establish an effective international propaganda system during the Sino-Japanese crisis. It explores how the weak Nationalist government managed to use its limited resources to compete with Japan in the international press. By retrieving the long neglected history of English language papers published in the treaty ports, Shuge Wei reveals a multilayered and often chaotic English language media environment in China and demonstrates its vital importance in defending China's sovereignty. Chinese bilingual elites played an important role in linking the party-led propaganda system with the treaty port press. Yet the development of propaganda institutions did not foster the realization of individual ideals. As the Sino-Japanese crisis deepened, the war machine absorbed treaty port journalists into the militarized propaganda system and dashed their hopes of maintaining a liberal information order. A superbly researched and well-nuanced account of an overlooked topic: nationalist China's propaganda system and the multiple ways in which it intersected with the treaty port foreign language press of the time. Combining a wealth of archival and newspaper sources, it is destined to be on the must-read list of all who are interested in state propaganda and news dissemination in the Republican period. Julia C. Strauss, professor of Chinese politics, SOAS University of London. An absorbing and well-sourced study of KMT propaganda efforts to convince the United States to side with China rather than Japan in WWII. The study shows how the KMT, facing a massive power asymmetry compared to its Japanese opponent, managed to effectively use the soft power of foreign propaganda. Rudolf G. Wagner, senior professor of Chinese studies, Cluster of Excellence Asia and Europe, Heidelberg University, Germany.

The Disaster Experts Scott Gabriel Knowles, 2012-07-02 In the wake of 9/11 and Hurricane Katrina, many are asking what, if anything, can be done to prevent large-scale disasters. How is it that we know more about the hazards of modern American life than ever before, yet the nation faces ever-increasing losses from such events? History shows that disasters are not simply random acts. Where is the logic in creating an elaborate set of fire codes for buildings and then allowing structures like the Twin Towers to be tall, impressive, and risky to go up as design experiments? Why prepare for terrorist attacks above all else when floods, fires, and earthquakes pose far more consistent threats to American life and prosperity? *The Disaster Experts* takes on these questions, offering historical context for understanding who the experts are that influence these decisions, how they became powerful, and why they are only slightly closer today than a decade ago to protecting the public from disasters. Tracing the intertwined development of disaster expertise, public policy, and urbanization over the past century, historian Scott Gabriel Knowles tells the fascinating story of how this diverse collection of professionals—insurance inspectors, engineers, scientists, journalists, public officials, civil defense planners, and emergency managers—emerged as the authorities on risk and disaster and, in the process, shaped modern America.

The Metal Worker, 1912 *Fire in California's Ecosystems* Jan W. van Wageningen, 2018-06-08 Fire in

California's Ecosystems describes fire in detail both as an integral natural process in the California landscape and as a growing threat to urban and suburban developments in the state. Written by many of the foremost authorities on the subject, this comprehensive volume is an ideal authoritative reference tool and the foremost synthesis of knowledge on the science, ecology, and management of fire in California. Part One introduces the basics of fire ecology, including overviews of historical fires, vegetation, climate, weather, fire as a physical and ecological process, and fire regimes, and reviews the interactions between fire and the physical plant and animal components of the environment. Part Two explores the history and ecology of fire in each of California's nine bioregions. Part Three examines fire management in California during Native American and post-Euro American settlement and also current issues related to fire policy, such as fuel management, watershed management, air quality, invasive plant species at risk, species, climate change, social dynamics, and the future of fire management. This edition includes critical scientific and management updates and four new chapters on fire, weather, fire regimes, climate change, and social dynamics.

The Technique of Film and Video Editing Ken Dancyger, 2007 Providing a detailed, precise look at the artistic and aesthetic principles and practices of editing for both picture and sound, this handbook contains analyses of photographs from dozens of classic and contemporary films and videos to provide a sound basis for the professional filmmaker and student editor.

The Food Section Kimberly Wilmot Voss, 2014-04-24 Food blogs are everywhere today, but for generations information and opinions about food were found in the food sections of newspapers in communities large and small. Until the early 1970s, these sections were housed in the women's pages of newspapers where women could hold an authoritative voice. The food editors, often a mix of trained journalist and home economist, reported on everything from nutrition news to features on the new chef in town. They wrote recipes and solicited ideas from readers. The sections reflected the trends of the time and the cooks of the community. The editors were local celebrities, judging cooking contests and getting calls at home about how to prepare a Thanksgiving turkey. They were consumer advocates and reporters for food safety and nutrition. They helped make James Beard and Julia Child household names as the editors wrote about their television appearances and reviewed their cookbooks. These food editors laid the foundation for the food community that Nora Ephron described in her classic 1968 essay *The Food Establishment* and eventually led to the food communities of today. Included in the chapters are profiles of such food editors as Jane Nickerson, Jeanne Voltz, and Ruth Ellen Church, who were unheralded pioneers in the field, as well as Cecily Brownstone, Poppy Cannon, and Clementine Paddleford, who are well known today. An analysis of their work demonstrates changes in the country's culinary history. The book concludes with a look at how the women's pages folded at the same time that home economics saw its field transformed and with thoughts about the foundation that these women laid for the food journalism of today.
