The Richest Woman in America Janet Wallach, 2013-06-04 No woman in the Gilded Age made as much money as Hetty Green Now the acclaimed author of Desert Queen delivers the definitive biography of America's first female tycoon an investment pioneer who matched her male counterparts in ambition and guile and never backed down from a fight Filled with colorful historical details of an economic time that eerily parallels our own San Francisco Chronicle Hetty Green was a strong woman who forged her own path she was worth at least 100 million by the end of her life in 1916 equal to about 2.5 billion today Green was mocked for her simple Quaker ways and her unfashionable frugality in an era of opulence and excess the press even nicknamed her The Witch of Wall Street But those who knew her admired her wit and wisdom and while financiers around her rose and fell as financial bubbles burst she steadily amassed a fortune that supported businesses churches municipalities and even the city of New York Janet Wallach's engrossing biography reveals striking parallels between past financial crises and current recession woes and speaks not only to history buffs but to today's investors who just might learn a thing or two from Hetty Green

Regulation and the Credit Rating Agencies Daniel Cash, 2018-08-06 This book examines the transgressions of the credit rating agencies before during and after the recent financial crisis It proposes that by restricting the agencies ability to offer ancillary services there stands the opportunity to limit in an achievable and practical manner the potentially negative effect that the Big Three rating agencies Standard Poor's Moody's and Fitch may have upon the financial sector and society moreover The book contains an extensive and in depth discussion about how the agencies ascended to their current position why they were able to do so and ultimately their behaviour once their position was cemented This work offers a new framework for the reader to follow suggesting that investors issuers and the state have a desired version of the agencies in their thinking and operate upon that basis when in fact those imagined agencies do not exist as demonstrated by the actual conduct of the agencies The book primarily aims to uncover this divergence and reveal the real credit rating agencies and

then on that basis propose a real and potentially achievable reform to limit the negative effects that result from poor performance in this Industry It addresses the topics with regard to financial regulation and the financial crisis and will be of interest to legal scholars interested in the intersection between business and the law as well as researchers academics policymakers industry and professional associations and students in the fields of corporate law banking and finance law financial regulation corporate governance and corporate finance
