**Popular Armed Forces for the Liberation of Angola** Miguel Junior, 2019-12-10 By studying FAPLA, we want to make a profound examination on the military edification process from 1976 to 1991. We need to understand the processes of its conversion into a national army and verify the path it has taken during its seventeen years of existence. Thus, the aspects of the edification of FAPLA are a precept, and the references help explain the present. By analysing the process, we learn aspects of the war conduct and see how they made military campaign against armed insurgency. In addition, we created conditions for an in-depth understanding on how Angola prepared itself to face the aggression perpetrated by South Africa and how it was able to obtain supremacy on some fields over the external enemy as well as allowed us to understand their military misfortunes.

**Structure for Architects** Ramsey Dabby, Ashwani Bedi, 2012-04-17 An introduction to the concepts and principles of architectural structures in an easy-to-read format. Written as an easy-to-understand primer on the topic, *Structure for Architects* engages readers through instruction that uses a highly visual format and real-world examples to underline the key facets of structural principles that are essential to the design process. Highlights of this book include a rich collection of drawings, photographs, and diagrams spread throughout the text, which demonstrate fundamental structural concepts using everyday examples. An overview of structural design basics as well as a summary of structural forms. A look at the design implications of steel, reinforced concrete, and wood. **Rollback** Richard Harrison, 2016-01-19 Rollback The Red Army's Winter Offensive along the Southwestern Strategic Direction 1942-43 covers the period from mid December 1942 to mid February 1943 one of the most critical periods of the war on the Eastern Front It was here that following the encirclement of an entire German army at Stalingrad the Soviets sought to take advantage of the ruptured Axis front in southern Russia to finish off the Germans Italian

and Hungarian allies and liberate the economically vital areas of eastern Ukraine This study is drawn from a number of wartime and postwar articles published by the General Staff's directorate for the study of wartime experience Also featured are documents relating to the operational strategic conduct of the various operations which were compiled and published after the fall of the Soviet Union Several articles deal with the preparation for and conduct of the Southwestern Front's Middle Don operation of December 1942 Originally intended as an ambitious offensive to cut off the German forces in the North Caucasus by driving on to Rostov the operation was later reoriented to meet the threat of the German effort to relieve Stalingrad The offensive not only accomplished its objective of turning back the German attack thus dooming the Stalingrad garrison but also destroyed the Italian army in the East as well The Soviet Voronezh Front then struck further up the Don River and in the Ostrogozhsk Rossosh operation destroyed what remained of the Italian forces in the area as well as the Hungarian army This enabled the Red Army to capture Khar'kov and push nearly to the Dnepr River by mid February before being thrown back by a skillful German counteroffensive The territorial results of this operation set the stage for the front's subsequent Voronezh-Kastornoe operation which enabled the Soviets to push as far west as Kursk before exhaustion and growing German resistance brought the offensive to a halt Further to the south the Soviets were able to capture Voroshilovgrad and penetrate into the industrial Donets Basin The book also contains a detailed Soviet examination of the employment of tank and mechanized corps during the campaign The conclusions reached here had a direct bearing on the restructuring of the Red Army's tank armies in time for the summer campaign of 1943
