Forecasting And Management Of Technology:

Forecasting and Management of Technology Alan L. Porter, Scott W. Cunningham, Jerry Banks, A. Thomas Roper, Thomas W. Mason, Frederick A. Rossini, 2011-07-12 Published in 1991 the first edition of *Forecasting and Management of Technology* was one of the leading handful of books to deal with the topic of forecasting of technology and technology management as this discipline was emerging The new revised edition of this book will build on this knowledge in the context of business organizations that now place a greater emphasis on technology to stay on the cutting edge of development The scope of this edition has broadened to include management of technology content that is relevant to now to executives in organizations while updating and strengthening the technology forecasting and analysis content that the first edition is reputed for Updated by the original author team plus new author Scott Cunningham the book takes into account what the authors see as the innovations to technology management in the last 17 years the Internet the greater focus on group decision making including process management and mechanism design and desktop software that has transformed the analytical capabilities of technology managers Included in this book will be 5 case studies from various industries that show how technology management is applied in the real world

Forecasting and Management of Technology Alan L. Porter, 1991 Consistently practical in its coverage the book discusses general issues related to forecasting and management introduces a variety of methods and shows how to apply these methods to significant issues in managing technological development With numerous exhibits case studies and exercises throughout it requires only basic mathematics and includes a special technology forecasting TOOLKIT for the IBM and compatibles along with full instructions for installing and running the program

Intellectual Property Russell L. Parr, Gordon V. Smith, 2005-04-29 This book is designed to simplify the process of attaching a dollar amount to intangible assets be it for licensing mergers and acquisitions loan collateral or investment purposes It provides practical tools for evaluating the investment aspects of licensing and joint venture decisions and discusses the legal tax and accounting practices and procedures related to such arrangements examines the business economics of strategies involving intellectual property licensing and joint ventures and provides analytical models that can be used to determine reasonable royalty rates for licensing and for determining fair equity splits in joint venture arrangements

Commercializing Micro-Nanotechnology

Products David Tolfree, Mark J. Jackson, 2007-11-19 Micro nanotechnologies MNT are already making a profound impact on our daily lives New applications are well underway in the US Asia and Europe However their potentially disruptive nature along with the public's concerns has produced a number of challenges Commercializing Micro Nanotechnology Products provides a snapshot of the current state of the field

Strategic Information Systems: Concepts, Methodologies, Tools, and Applications Hunter, M. Gordon, 2009-08-31 This 4 volume set provides a compendium of comprehensive advanced research articles written by an international collaboration of experts involved with the strategic use of information systems Provided by publisher

Persistent Forecasting of Disruptive Technologies National Research Council, Division on Engineering and Physical Sciences, Committee on Forecasting Future Disruptive Technologies, 2010-02-15 Technological innovations are key causal agents of surprise and disruption In the recent past the United States military has encountered unexpected challenges in the battlefield due in part to the adversary's incorporation of technologies not traditionally associated with weaponry Recognizing the need to broaden the scope of current technology forecasting efforts the Office of the Director Defense Research and Engineering DDR E and the Defense Intelligence Agency DIA tasked the Committee for Forecasting Future Disruptive Technologies with providing guidance and insight on how to build a persistent forecasting system to predict analyze and reduce the impact of the most dramatically disruptive technologies The first of two reports this volume analyzes existing forecasting methods and processes It then outlines the necessary characteristics of a comprehensive forecasting system that integrates data from diverse sources to identify potentially game changing technological innovations and facilitates informed decision making by policymakers The committee's goal was to help the reader understand current forecasting methodologies the nature of disruptive technologies and the characteristics of a persistent forecasting system for disruptive technology Persistent Forecasting of Disruptive Technologies is a useful text for the Department of Defense Homeland Security the Intelligence community and other defense agencies across the nation

Contested Futures Nik Brown, Brian Rappert, 2017-03-02 In a unique volume Contested Futures brings together a group of scholars to examine the relationships between social action and the future Rather than speculating upon what the future might bring the volume interrogates the metaphors and practices through which the future is mobilized as an object of present day action and agency The book shifts the analytical gaze from looking into the future to looking at the future as a sociological phenomenon in its own right Futures are thus contested in as much as they register differences of interest time frame or organizational and political form Contestation is also evident in the ascendancy of certain discourses languages and metaphors which foreclose some futures whilst facilitating others But futures are far from being simply linguistic abstractions and in fact can often be seen to harden into material entrenchment as expectations become scripted into path dependency and lock in Contested Futures is an invaluable analysis for both academics and policy actors seeking a better understanding of the ubiquity of futures discourse in the context of today's uncertainties

Management Arthur G. Bedeian, 1993 **Tech**

Mining Alan L. Porter, Scott W. Cunningham, 2004-11-26 Tech Mining makes exploitation of text databases meaningful to those who can gain from derived knowledge about emerging technologies. It begins with the premise that we have the information, the tools to exploit it, and the need for the resulting knowledge. The information provided puts new capabilities at the hands of technology managers. Using the material present, these managers can identify and access the most valuable technology information resources: publications, patents, etc. search, retrieve, and clean the information on topics of interest and lower the costs and enhance the benefits of competitive technological intelligence operations. *Research and Development Management* Tugrul Daim, Jisun Kim, Kenny Phan, 2017-05-23 This book introduces readers to essential technology assessment and forecasting tools, demonstrating their use on the basis of multiple cases. As organizations in the high tech industry need to be able to assess emerging technologies, the book presents cases in which formal decision making models are developed, providing a framework for decision making in the context of technology acquisition and development. Applications of different technology forecasting tools are also discussed for a range of technologies and sectors, providing a guide to keep R D organizations abreast of technological trends that affect their business. As such, the book offers a valuable theoretical and practical reference guide for R D managers responsible for emerging and future technologies.

Technology and Strategy Richard Arthur Goodman, Michael W. Lawless, 1994 Technology and Strategy is a comprehensive guide to creating a strategic plan that incorporates technological growth. Using real life examples from industries from electronics to bio technology, the authors present the tools planners need to integrate a firm's technological capabilities with its strategic plan. Importantly, the book also addresses broader questions about the role of technology, clarifying when it aids innovation, when it is evolutionary, and when it is revolutionary. These questions are tested against trends such as Total Quality Management, the resource based view of strategy, and the increase in external acquisition of technology. Offering clear guidance through an increasingly complex area, Technology and Strategy will be a valuable reference for practising executives, general managers, strategic planners, R D executives, and manufacturers. **Handbook of Research on Challenges and Opportunities in Launching a Technology-Driven International University** Khosrow-Pour, D.B.A., Mehdi, 2019-02-22 The global digital economy continues to demand the need for educated and highly trained professionals, requiring higher learning institutions to provide accessible technology driven experience to prepare future leaders effectively. However, there are challenges involved in creating a robust curriculum and recruiting top notch faculty all over the world while also meeting the academic criteria to offer effective academic programs and degrees to students. The Handbook of Research on Challenges and Opportunities in Launching a Technology Driven International University is a pivotal reference source that provides empirical and theoretical research focused on the effective construction of technology driven higher learning international universities. While highlighting topics such as accelerated and innovative curriculum, recruitment of international faculty, on campus development, and distance learning systems, this publication

explores the financial and economic impacts of launching a university and the methods of how to identify the appropriate locale for universities and or branch campuses that will ideally complement the local interest of business sectors within the selected location This book is ideally designed for entrepreneurs practitioners academicians administrators government officials researchers and consultants

Forecasting Technology for Planning Decisions Harry Jones, Brian C.

Twiss, 1978 **MARAD** United States. Maritime Administration, 1984 **Forecasting for Technologists and Engineers**

Brian C. Twiss, 1992 This book is written for all technologists and engineers To those unfamiliar with forecasting it may appear a somewhat esoteric activity with little relevance to the everyday technical concerns of the reader This is not so The aim of this book is to show how forecasting can improve the quality of technical decision making Furthermore this can be accomplished without the use of highly sophisticated techniques which can only be applied by specialists The approaches described in this book can be easily understood and used by all its readers

Managing Technology and Innovation

Robert Verburg, J. Roland Ortt, Willemijn M. Dicke, 2006-06-19 Modern technology and innovation are vital to the success of all companies be they hi tech firms or companies seemingly unaffected by technology and innovation whether established firms or business start ups This book focuses on understanding technology as a corporate resource covering product development design of systems and the managerial aspects of new and high technology Topics investigated include the internal organization of high technology firms the management of technology in society managing innovation dilemmas and strategies The wide ranging experience of the teachers and experts contributing to this book has resulted in an integrated multi disciplinary textbook that provides an introductory overview to managing technology and innovation in the twenty first century This text is essential reading for students of business and engineering concerned with technology and innovation management

Methods and Models in Transport and Telecommunications Aura Reggiani, Laurie A.

Schintler, 2006-03-30 One aspect of the new economy is a transition to a networked society and the emergence of a highly interconnected interdependent and complex system of networks to move people goods and information An example of this is the increasing reliance of networked systems e g air transportation networks electric power grid maritime transport etc on telecommunications and information infrastructure Many of the networks that evolved today have an added complexity in that they have both a spatial structure i e they are located in physical space but also an a spatial dimension brought on largely by their dependence on information technology They are also often just one component of a larger system of geographically integrated and overlapping networks operating at different spatial levels An understanding of these complexities is imperative for the design of plans and policies that can be used to optimize the efficiency performance and safety of transportation telecommunications and other networked systems In one sense technological advances along with economic forces that encourage the clustering of activities in space to reduce transaction costs have led to more efficient network structures At the same time the very properties that make these networks more efficient have also put them at a

greater risk for becoming disconnected or significantly disrupted when super connected nodes are removed either intentionally or through a targeted attack
