Forensic Taphonomy and Ecology of North American Scavengers Susan N. Sincerbox, Elizabeth A. DiGangi, 2017-11-15 Forensic Taphonomy and Ecology of North American Scavengers compiles research on vertebrate scavenging behavior from numerous academic fields including ecology and forensic anthropology Scavenging behavior can displace remains from their depositional context confound postmortem interval estimation destroy osteological markers and inflict damage that mimics or disguises perimortem trauma Consequently the actions of vertebrate scavengers can significantly impact the medicolegal investigation of human remains It is therefore critical when interpreting a death scene and its associated evidence that scavenging be recognized and the possible effects of scavenging behavior considered This book is an ideal reference for both students and medicolegal professionals serving as a field manual for the identification of common scavenging species known to modify human remains in North America In addition this book presents a framework to guide investigators in optimizing their approach to

scavenged cases promoting more complete recovery of human remains and the accuracy of forensic reconstructions of peri and postmortem events Examines scavenging behavior through an evolutionary and ecological lens integrating research from diverse fields Includes brief summaries of the taphonomic signatures and ecological contexts of common or well studied North American scavenging taxa Proposes strategies to maximize the recovery of vertebrate scavenged human remains and improve forensic reconstructions of peri and postmortem events *Post Mortem Fate of Human Remains* William D.

Márquez-Grant, Rob Janaway, 2015-02-17 Forensic archaeology is mostly defined as the use of archaeological methods and principles within a legal context. However, such a definition only covers one aspect of forensic archaeology and misses the full potential this discipline has to offer. This volume is unique in that it contains 57 chapters from experienced forensic archaeological practitioners working in different countries, intergovernmental organisations or NGOs. It shows that the practice of forensic archaeology varies worldwide as a result of diverse historical, educational, legal and judicial backgrounds. The chapters in this volume will be an invaluable reference to forensic archaeologists, forensic anthropologists, humanitarian and human rights workers, forensic scientists, police officers, professionals working in criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident. This volume promotes the development of forensic archaeology worldwide. In addition, it proposes an interpretative framework that is grounded in archaeological theory and methodology, integrating affiliated behavioural and forensic sciences. **Forensic**
