Letters of James Bradley James E. Bradley,1992 This is a compilation of the letters of James E Bradley 1838 87 a soldier in
both the Confederate and Union Armies during the Civil War Also included are a copy of a letter from his daughter Mary Ann
Victoria Bradley and diary entries recorded by his brother and correspondent Charles E Bradley Introduction

Observations & Correspondence of Rev.d James Bradley Rev D. James Bradley,2019-04-09 The publication of Bradley s
observations was delayed by disputes about their ownership but they were finally published in two folio volumes 1798 1805
This book is volume one of a two book set The Rev d James Bradley was an English astronomer and priest who served as
Astronomer Royal from 1742 succeeding Edmond Halley He is best known for the discovery of the aberration of light 1725
1728 and the nutation of the Earth s axis 1728 1748 *The Life and Work of James Bradley* John Fisher,2024-03-08 James
Bradley once the most celebrated astronomer in Europe is now an obscure figure surprising given that he was the first to
establish empirically that the Earth was a planet in motion around the Sun Introduced to the science of positional astronomy
by his uncle James Pound he excelled in his abilities to make precise observations Mentored by Edmond Halley he observed
Jupiter and its satellites identifying the gravitational resonances of the three innermost Galilean satellites before being
proposed to the fellowship of the Royal Society by Halley with the approval of Newton Elected to the Savilian Chair in
Astronomy at Oxford he joined Samuel Molyneux and George Graham in the attempt to observe annual parallax at Kew based
on the attempt of Robert Hooke This experiment revealed a counter intuitive motion of the object star that defied all attempts
at the resolution of the problem He designed a research programme at Wanstead when he studied the motions of 70 stars
identifying a new discovered motion later called the aberration of light Recognising another motion within the residuals of
his observations he identified it as a nutation of the Earth s axis He taught experimental philosophy at Oxford for 31 years
His final work as Astronomer Royal was a stellar survey of unprecedented dependability taking note of every possible cause
of error later reduced by Friedrich Wilhelm Bessel in his *Fundamenta Astronomi* producing a stellar catalogue of 3 222 stars
