Performance: From J.S. Bach to M. Alunno (1972-) Michael Maul, Alberto Nones, 2020-02-04 Today Bach is one of the most revered and studied figures of classical music despite there being a time in which he was almost forgotten Divided into two sections this volume explores research on J S Bach and more broadly examines the topics of music and performance

studies with the latter focusing on composers active today such as Marco Alunno or those from the recent past who are lesser known and performed such as Pietro Cimara and Leo Ornstein Following from Nones s ed previous publication Music as Communication Perspectives on Music Image and Performance ABE 2018 this work provides a rather unique contribution as a choral attempt at exploring performance today The intention of this book and the downloadable audio content with live recordings of the music explored at the conference from which the volume originated is to inspire fresh approaches to the study of a monument like Bach while also encouraging original research of modern composition and performance Recordings of the performances given over the two days of the conference serve either to clarify arguments made in the papers or to attest to the music explored more generally This volume is founded on the belief that the history of music is comprised of many figures some of whom are undeservedly forgotten and that our understanding of and approach to music is simultaneously shaped by the past and directed by the continual evolution of sounds and attitudes of the present Examining music styles from baroque Bach to contemporary Alunno Forms of Performance will be of particular interest to Bach and performance studies scholars as well as advanced researchers and PhD students in this field

Elie, 2012-09-18 The story of a revolution in music and technology told through a century of recordings of the music of Johann Sebastian Bach In Reinventing Bach his remarkable second book Paul Elie tells the electrifying story of how musicians of genius have made Bach's music new in our time at once restoring Bach as a universally revered composer and

revolutionizing the ways that music figures into our lives As a musician in eighteenth century Germany Bach was on the technological frontier restoring organs inventing instruments and perfecting the tuning system still in use today Two centuries later pioneering musicians began to take advantage of breakthroughs in audio recording to make Bach's music the sound of modern transcendence The sainted organist Albert Schweitzer played to a mobile recording unit set up at London's Church of All Hallows in order to spread Bach's organ works to the world beyond the churches Pablo Casals recording at Abbey Road Studios made Bach's cello suites existentialism for the living room Leopold Stokowski and Walt Disney with Fantasia made Bach the sound of children's playtime and Hollywood grandeur alike Glenn Gould's Goldberg Variations opened and closed the LP era and made Bach the byword for postwar cool and Yo Yo Ma has brought Bach into the digital present where computers and smartphones put the sound of Bach all around us In this book we see these musicians and dozens of others searching experimenting and collaborating with one another in the service of Bach who emerges as the very image of the spiritualized technically savvy artist Reinventing Bach is a gorgeously written story of music invention and human passion and a story with special relevance in our time for it shows that great things can happen when high art meets new technology
