Cultural Heritage Interpretation: Problems and Proposals for the Medieval Churches in the Walled City of Famagusta, Northern Cyprus Dr. Narmin Babazadeh Asbagh, 2024-12-12 Interpretation has recently become a more focused topic in the cultural heritage conservation field due to the increasing concern about the involvement of the stakeholders and the social pillar of sustainability As the enhancement of participation of the stakeholders in the conservation processes can be achieved by increasing their awareness and appreciation of cultural heritage sites interpretation has a considerable role in this process This research aims to search for methods for developing interpretation approaches for cultural heritage sites through the assessment of the responses of the stakeholders The churches of the Walled City of Famagusta have been chosen as the case study for this research due to the apparent interpretation problems Assessment of the responses of the stakeholders is accepted as a tool for developing a better interpretation of the cultural heritage buildings preventing them from further neglect or possible extinction This research proposes the advancement of interpretive approaches for similar undervalued and underappreciated sites There are many abandoned heritage buildings worldwide and due to the lack of function and maintenance deteriorate easily and are ruined Similarly abandoned valuable religious buildings have faced vandalism deliberately because of the decreasing demand for use or lack of their communities and many of them have been insufficiently interpreted for their visitors This research aims to develop an interpretive plan for the churches in the Walled

City of Famagusta to overcome their current problems I would like to acknowledge that this book is the result of several pieces of research such as the published papers presented at international conferences from September 2014 until September 2024 and especially derived from my Ph D dissertation entitled Interpretation Problems and Proposals for the Churches in the Walled City of Famagusta under the supervision of Associate Professor Dr Ege Uluca T mer at the Architecture Department Architecture Faculty of Eastern Mediterranean University Famagusta Northern Cyprus defended in July 2023
