History Its Purpose And Method Rose:

History, Its Purpose and Method Gustaaf Johannes Renier, 1950 *History* G. J. Renier, 2016-04-14 This treatise of historical methodology originally published in 1950 is based upon a liberal conception of history which excludes no narrator of past events from the ranks of historians It defines history as the accurate story which preserves the memory of the past experiences of human societies The function of history determines its method and provides the answer to the question how secure is our knowledge of the past In the author's view history is empirical and its results are for ever provisional The relative merits of dogmatism and scepticism are examined and several interpretations among English historians are scrutinized

Why History? Donald Bloxham, 2020-07-09 What is the point of history Why has the study of the past been so important for so long Why History A History contemplates two and a half thousand years of historianship to establish how very different thinkers in diverse contexts have conceived their activities and to illustrate the purposes that their historical investigations have served Whether considering Herodotus medieval religious exegesis or twentieth century cultural history at the core of this work is the way that the present has been conceived to relate to the past Alongside many changes in technique and philosophy Donald Bloxham's book reveals striking long term continuities in justifications for the discipline

Approaches to History Sabyasachi Bhattacharya, 2011 History as a social science is arguably more self reflective than associated disciplines in that family Other social scientists seem to see little reason to look beyond the paradigm they are developing in the present times Historians on the other hand tend to depend on the cumulative process of the development of their craft and the fund of accumulated knowledge Yet while this is acknowledged in the practice of research Historiography in itself as a subject of study has rarely found its place in the syllabi of Indian universities Knowledge of Historiography is taken for granted when a scholar plunges into research In an attempt to address this lacuna the Indian Council of Historical Research ICHR has planned a series of volumes on Historiography comprising articles by subject specialists commissioned by the ICHR The first volume in the series *Approaches to History Essays in Indian Historiography* brings to the readers the first fruits of that endeavour While the essays encompass areas of research presently at the frontiers of new research scholars will also find the bibliographies accompanying the essays of significant appeal

The Rose Amateur's Guide Thomas Rivers,1843 **A History of Global Health** Randall M. Packard,2016-09-15 A sweeping history explores why people living in resource poor areas lack access to basic health care after billions of dollars have been invested in international health assistance Over the past century hundreds of billions of dollars have been invested in programs aimed at improving health on a global scale Given the enormous scale and complexity of these lifesaving operations why do millions of people in low income countries continue to live without access to basic health services sanitation or clean water And why are deadly diseases like Ebola able to spread so quickly among populations In A History of Global Health Randall M Packard argues that global health initiatives have saved millions of lives but have had limited impact on the overall health of people living in underdeveloped areas where health care workers are poorly paid infrastructure and basic supplies such as disposable gloves syringes and bandages are lacking and little effort has been made to address the underlying social and economic determinants of ill health Global health campaigns have relied on the application of biomedical technologies vaccines insecticide treated nets vitamin A capsules to attack specific health problems but have failed to invest in building lasting infrastructure for managing the ongoing health problems of local populations Designed to be read and taught the book offers a critical historical view providing historians policy makers researchers program managers and students with an essential new perspective on the formation and implementation of global health policies and practices The Vienna School of Art History Matthew Rampley,2015-06-26 Matthew Rampley s

The Vienna School of Art History is the first book in over seventy five years to study in depth and in context the practices of art history from 1847 the year the first teaching position in the discipline was created to 1918 the collapse of Austria Hungary It traces the emergence of art history as a discipline the establishment of norms of scholarly inquiry and the involvement of art historians in wider debates about the cultural and political identity of the monarchy The so called Vienna School plays the central role in the study but Rampley also examines the formation of art history elsewhere in Austria Hungary Located in the Habsburg imperial capital Vienna art historians frequently became entangled in debates that were of importance to art historians elsewhere in the Empire and Rampley pays particular attention to these areas of overlapping interest He also analyzes the methodological innovations for which the Vienna School was well known Rampley focuses most fully however on the larger political and ideological context of the practice of art history particularly the way in which art historical debates served as proxies for wider arguments over the political social and cultural life of the Habsburg Empire

Old and New London: a Narrative of Its History, Its People and Its Places George Walter Thornbury,1873

Social Theory after the Holocaust Robert Fine,Charles Turner,2000-11-01 This collection of essays explores the character

and quality of the Holocaust's impact and the abiding legacy it has left for social theory. The premise which informs the contributions is that ten years after its publication Zygmunt Bauman's claim that social theory has either failed to address the Holocaust or protected itself from its implications remains true.

Translating Investments Judith H. Anderson, 2005

The title *Translating Investments* a manifold pun refers to metaphor and clothing, authority and interest and trading and finance. Translation Latin *translatio* is historically a name for metaphor and investment etymologically a reference to clothing participates both in the complex symbolism of early modern dress and in the cloth trade of the period. In this original and wide ranging book Judith Anderson studies the functioning of metaphor as a constructive force within language, religious doctrine and politics, literature, rhetoric and economics during the reigns of the Tudors and early Stuarts. Invoking a provocative metaphorical concept from Andy Clark's version of cognitive science she construes metaphor itself as a form of scaffolding fundamental to human culture. A more traditional and controversial conception of such scaffolding is known as sublation. Hegel's *Aufhebung* or raising as the philosophers Jacques Derrida and Paul Ricoeur have understood this term. Metaphor is the agent of raising or sublation and sublation is inseparable from the productive life of metaphor as distinct in its death in code or cliché. At the same time metaphor embodies the sense both of partial loss and of continuity or preservation also conveyed by the term *Aufhebung*. Anderson's study is simultaneously critical and historical. History and the theory are shown to be mutually enlightening as are a wide variety of early modern texts and their specific cultural contexts. From beginning to end this study touches the present engaging questions about language, rhetoric and reading within post structuralism and neo cognitivism. It highlights connections between intellectual problems active in our own culture and those evident in the earlier texts, controversies and crises Anderson analyzes. In this way the study is bifocal like metaphor itself. While Anderson's overarching concern is with metaphor as a creative exchange, a source of code breaking conceptual power, each of her chapters focuses on a different but related issue and cultural sector. Foci include the basic conditions of linguistic meaning in the early modern period instantiated by Shakespeare's plays and related to modern theories of metaphor; the role of metaphor in the words of eucharistic institution under Archbishop Cranmer; the play of metaphor and metonymy in the writings of Luther, Zwingli and Calvin and in John Donne's *Devotions*; the manipulation of these two tropes in the politics of the controversy over ecclesiastical vestments and in its treatment by John Foxe; the abuse of figuration in the house of Edmund Spenser's *Busirane* where catachresis, an extreme form of metaphor, is the trope du jour; the conception of metaphor in the Roman rhetorics and their legacy in the sixteenth century and the concept of exchange in the economic writing of Gerrard de Malynes, merchant and metaphorist in the reigns of Elizabeth and James. What emerges at the end of this book is a heightened critical sense of the dynamic of metaphor in cultural history.
