Yu, 2006-12-30 Until recently issues of intellectual property were relegated to the experts: attorneys, legal scholars, rightsholders, and technology developers who wrangled over interpretations and enforcement of copyright, patent, and trademark protections. But in today's knowledge-based economy, intellectual property protection has taken on fundamentally new proportions as a subject of urgency for businesses whose survival depends on protection of their intangible assets and as a subject of cultural importance that grabs front-page headlines as the controversy over Napster and high-profile revelations of plagiarism, for example, have illustrated. The author investigates the institutional forces shaping the emerging information society and the contradictions between those forces and the ways that people use
